

Introducing the Solano Foundry

A new home for frontier tech, an hour north of Silicon Valley

Turning a new page for California

The Solano Foundry is charting a new course to revitalize an industry that once defined California: high-tech manufacturing. Backed by top Silicon Valley investors, the 2,100-acre advanced manufacturing park is the largest in the United States and located just an hour north of Silicon Valley. Purpose-built for innovative, high-growth industries like advanced transportation, robotics, energy, and defense, the Solano Foundry is a space for state-of-the-art production facilities with rapid permitting, robust infrastructure, affordable power, and access to a skilled workforce.

Purpose-built for innovative, high-growth industries

Key features:

Clustered ecosystems

Incorporating lessons from China's hardware clusters, the Solano Foundry enables advanced transportation, robotics, energy and defense start-ups to co-locate R&D, prototyping, and scaled production on a single campus

90-day permitting & room to grow

By completing 90% of entitlement and utility connection steps upfront, the Solano Foundry enables companies to break ground quickly and expand to millions of square feet, without leaving the region.

Connected supply chains

Direct freight-rail links to the future Solano Shipyard, and manufacturing centers in Fremont, Reno, and Tracy reduce logistics friction and cost.

Strong transport

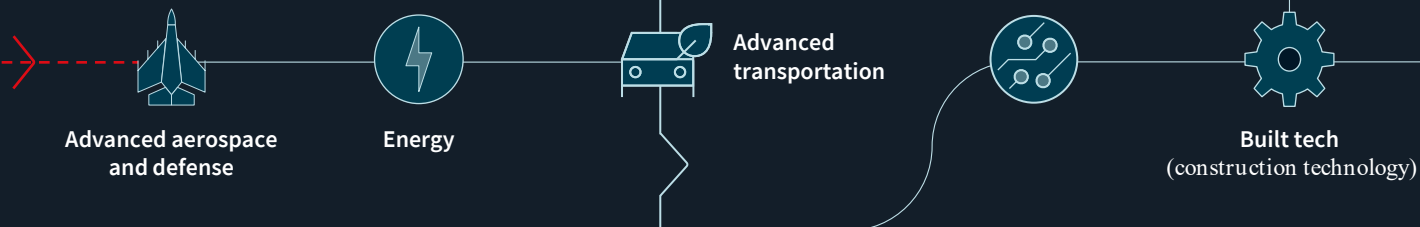

A range of transportation options connect the Solano Foundry to the new city and the broader region, slashing commute times.

An innovation hub to foster connection and help companies thrive

The Solano Foundry brings together entrepreneurs, capital, education and training, fostering the unique synergies that only a true innovation ecosystem can provide.

The Foundry serves the industries of tomorrow
Incubating the next wave of manufacturing innovation.

Research from JLL validates the vision

The Solano Foundry leads regional and national peers for talent access, speed to market, power availability, and proximity to innovation hubs. A new whitepaper from JLL's Advanced Manufacturing Group, "People, Power, Place: Making the Solano Foundry the new home of advanced manufacturing in California", benchmarked the Solano Foundry against 13 mega-industrial parks in California and nationwide and concluded that the evidence suggests that the Solano Foundry is the state's strongest opportunity to revitalize its manufacturing sector and bring manufacturing jobs back to California.

The Solano Foundry will be the largest advanced manufacturing park in the US – 2,100-acre at full build out.
Bringing ~40,000 generational jobs and billions of dollars in economic activity for Solano County.

Synergies with the Solano Shipyard and a new city

The Solano Shipyard

A parallel shipbuilding ecosystem, located seven miles south, will leverage shared supply chains and attract specialized suppliers, further diversifying the region's industrial base.

A new city

Appealing and affordable housing options in safe, walkable neighborhoods for the workforce
