"Self Drive Package" to enjoy Hokkaido trip with your family and friends without worrying about new coronavirus by Rental a car

Point 1 : Create a satisfying sightseeing and travel style.

We think that there are many people who want to visit many places and go sightseeing because they go on a trip. Hear the customer's desired process and create the process. Simply put, we can propose a trip that matches your needs.

Point 2 : Attractive for those who want to travel freely.

The appeal of using a rental car is that you can enjoy your trip with a wide range of activities and a wide range of freedom. I found a nice landscape so I want to stop. It can be said that only a rental car can handle such a situation. We would be happy if we could help you with your own journey.

Point 3 : Attractiveness for luggage and gait.

When there are elderly people or people with bad legs. Car rental is easy to use even if your luggage is heavy and large. For example, if you borrow at a store near a station or airport, you can enjoy your trip more stress-free.

Point 4 : Elimination of "over tourism".

If you use a rental car, you can avoid "over tourism" where people are too concentrated in a specific tourist spot, and you can enjoy sightseeing slowly.

NTA's Suggestion No. 3: UNESCO World Heritage Sites

日本の世界遺産

World heritage sites in Japan

There are a total of 25 world heritage sites in Japan, 20 cultural heritage sites and 5 natural heritage sites.

We are also good at proposing trips where you can feel the history of visiting world heritage sites.

Visiting a world heritage site should be a good opportunity to feel the history of Japan.

【Horyuji】

- Horyuji was founded in 607 by Prince Shotoku, considered by many to be the patron saint of Japanese Buddhism. It's renowned not only as one of the oldest temples in Japan but also as a repository for some of the country's rarest and most-outstanding examples of early Buddhist sculpture.

【Shirakawago】

- The Shirakawago Declared a UNESCO world heritage site in 1995, they are famous for their traditional gassho-zukuri farmhouses, some of which are more than 250 years old. Gassho-zukuri means "constructed like hands in prayer", as the farmhouses' steep thatched roofs resemble the hands of Buddhist monks pressed together in prayer.

【Mount Fuji】

- Mount Fuji is with 3776 meters Japan's highest mountain. It is not surprising that the nearly perfectly shaped volcano has been worshiped as a sacred mountain and experienced big popularity among artists and common people throughout the centuries.
