

TRAPANI BY KARMAN

SELECTION GUIDE

INSPIRED

European design, with tight tolerances and seams, results in clean graceful lines that turn any room into a showplace.

MAKE IT YOURS

Endless customization options, from colors to configurations, mean - if you can dream it, we can build it

QUALITY

The highest quality materials hand crafted to order with attention to detail in every piece.

Trapani Standard Features

In 2014 Karman ventured into the world of European Inspired Cabinetry. We had the opportunity to build a product from ground up with the designer and customer in mind, while keeping to the tradition of building a cabinet with all the robust features you see in our framed cabinet. It is ¾" construction with a wood edge band used on the face of the cabinet as standard. Soft Close integration is our starting point but there is much more we offer beyond that.

Euro Overlay

1/8" top and bottom, 1/16" sides, leaving a full 1/8" all around when cabinets are combined

Metal Shelf Pins. No plastic used in construction features

Face – Wood Edge Band is Standard

Ends – ¾" Thick Industrial Grade Furniture Core, Maple Grain Hot Pressed Laminated Sheet Material, Interior and Exterior

Tops & Bottoms – ¾" Thick Industrial Grade Furniture Core, Maple Grain Hot Pressed Laminated Sheet Material, Interior and Exterior

Backs – ¼" Thick Industrial Grade Furniture Core, Maple Grain Hot Pressed Laminated Sheet Material, Interior

Stretchers - ¾" Thick Industrial Grade Furniture Core, Maple Grain Hot Pressed Laminated Sheet Material, Interior and Exterior

Fully Adjustable Shelves

Fully Adjustable, ¾" Thick Industrial Grade Furniture Core, Maple Grain Hot Pressed Laminated Sheet Material Both Sides with Matching Front Edge Material, Full Depth

Solid Hardwood Drawers

Four-sided 5/8", Dovetail joined Solid Hardwood

Mounted on Full Extension, Soft Close, 100 lb. capacity drawer guides

Finish

Durable Catalyzed Conversion Varnish

Paint

Catalyzed process where pigmented primers and topcoats are chemically bonded to the paint layers

Trapani Upgrade Options

All Plywood Construction

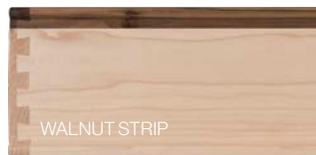

Ends, Tops, Bottoms, Backs, Shelving all Upgraded to Plywood Construction with Natural Wood Veneer Interior and Exterior

Designer Drawers & Rollouts

These gorgeous solid dovetail sculpted boxes add a unique look. Hand crafted drawer, built, sanded and finished after assembly. Profiled interior roll-out trays have 3-sided sculpting.

Door Styles

Contemporary

Walking a fine line between utilitarian and modern cabinetry, a contemporary design style is all about open spaces and clean lines. Contemporary cabinets rely on sleek, smooth and polished surfaces to create a modern level of elegance.

Species & Finish Options

Solid hardwood products are shaped by natural forces and may display a variety of character markings and colors. Color variation is influenced by moisture, exposure to sunlight and mineral content of the soil. Grain patterns are affected by changes in climate, growth rate, damage, as well as soil conditions.

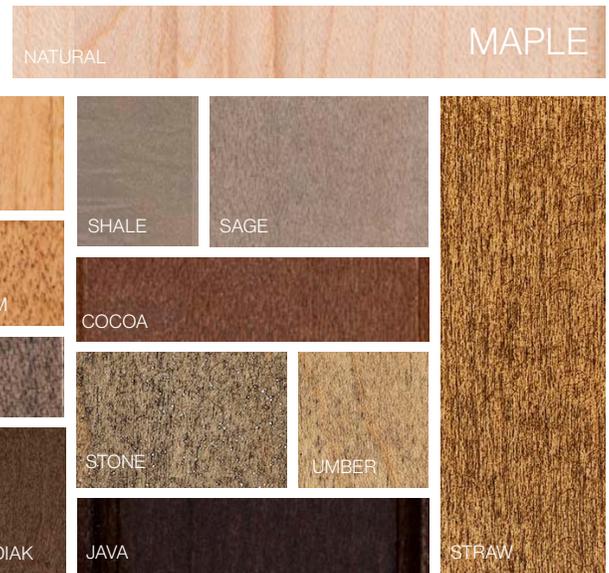

Each wood Species has unique features such as density, colors and grain patterns.

Finish Enhancements

Utilize Karman's enhancement program to provide your cabinetry with an "aged look".

Distressing

Includes random dents, nicks, rasp marks, worm-holing, bird-pecking and sanded or uneven edges.

Natural wear simulated by sanding edges and corners after paint finish has been applied.

Heavy distressing, corner rub-through, and glazing combine for a rich, well-loved appearance.*

Sanding

Subtle effect created by sanding the outside and detail edges of painted doors to expose the wood below.

Simulated brush strokes are achieved via light sanding of the paint along the grain prior to glazing.*

Simulated brush strokes are achieved via heavy sanding of the paint along the grain prior to glazing.*

A special brown glaze, accents, and sand-through are applied to a painted finish.

Glazing

Hand-applied technique adds a highlight to door details with a thin line.

Glaze is wiped on and off, leaving lingering glaze in the open grain and details of the door.*

**The underlying color will be altered when the glaze is applied to the surface*

Paint Colors

Our Standard paint selections have been carefully chosen to match the more popular trends in color today. Our paint-grade Maple and pigmented conversion varnish top-coat technology combine to assure a smooth consistent finish. We also offer two flexible color customization programs to help you go beyond the norm and become your own color trendsetter.

Standard Paint Colors

Classic Select Program

Karman offers a flexible Classic Select paint program using the Benjamin Moore Classic Color chip deck. Choose from any of the more than 1,800 available colors. You are sure to find one that achieves the look of your dreams.

Custom Finish Program

Getting just the right feel in your home design is not always that simple, and truly customized finishes are not easily found. This program allows the flexibility to modify current finishes or to submit samples and swatches for consideration of color matching in either stain or paint. Wanting to match a particular stain or favorite finish technique? Your Karman Dealer can help make it happen.

Decorative Laminate Veneer

Decorative Laminate Veneers (textured laminate) are an excellent European design option for any room seeking a unique decor. Textured laminate grain provides increased scratch resistance and excellent color fastness. Matching interiors come standard on DLVs. Constructed with a high quality melamine-fused over dimensionally stable MDF.

Standard Colors

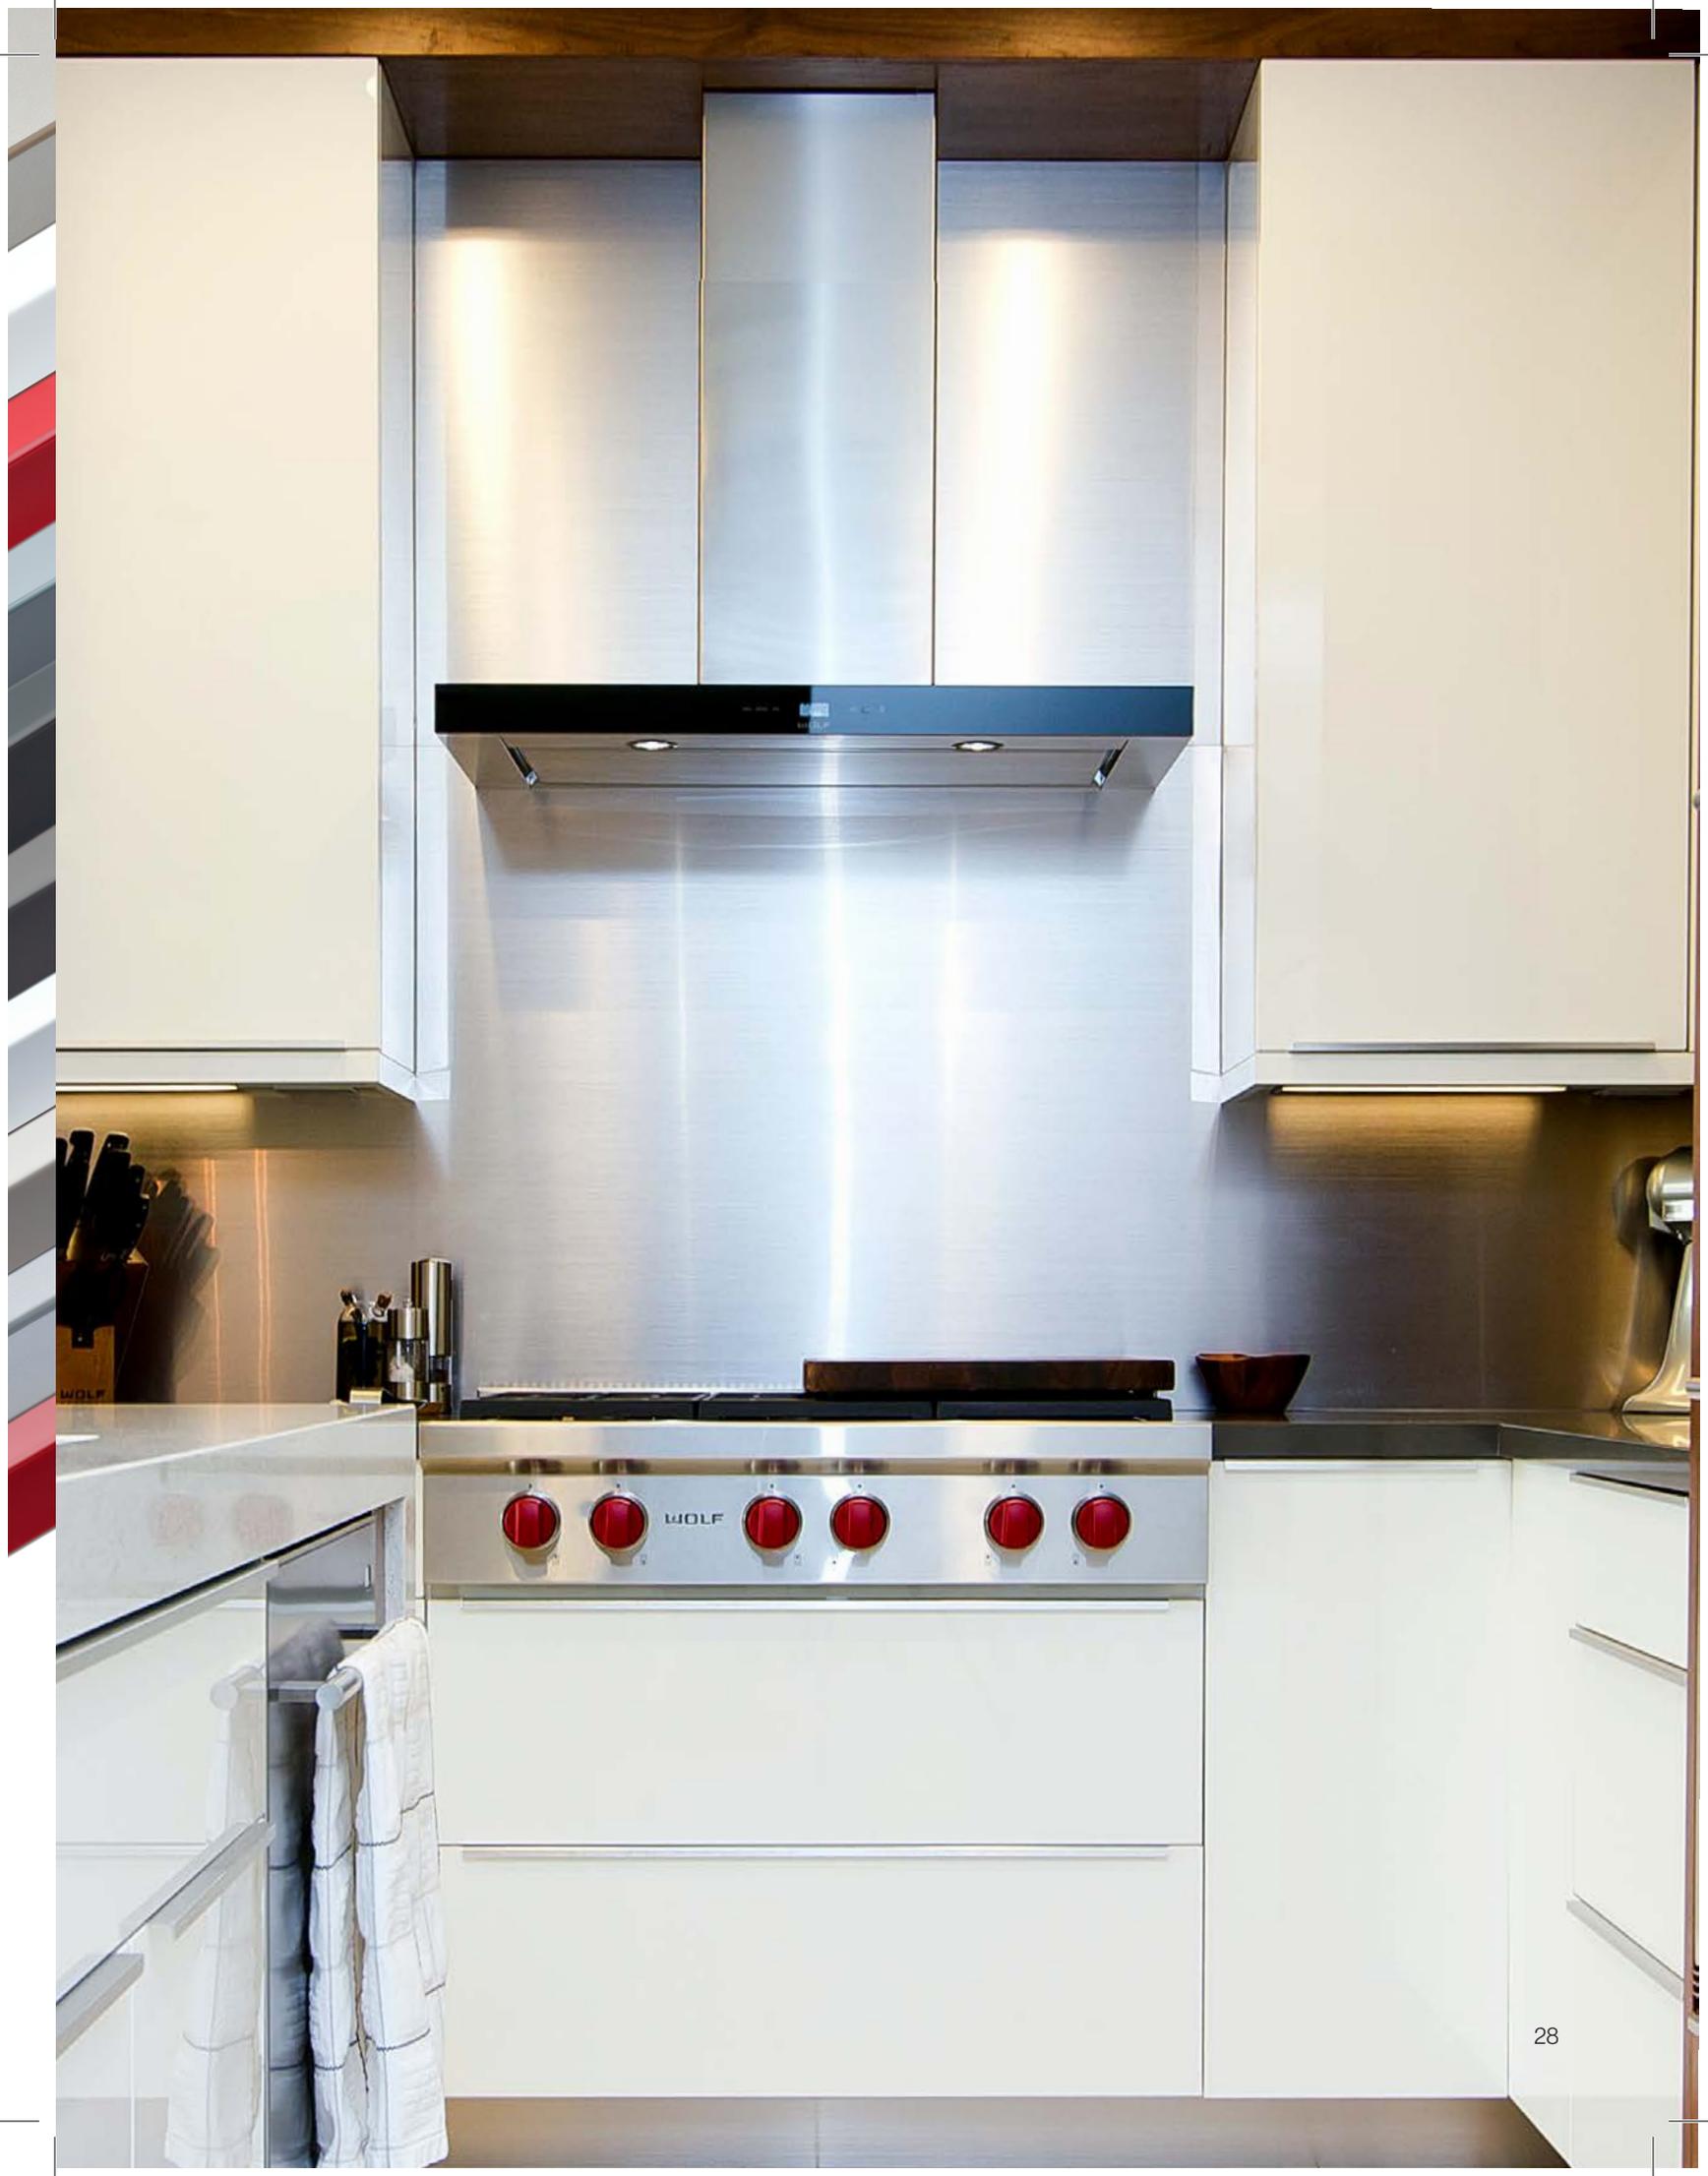

High Gloss Acrylic

Distinctively modern. High Gloss Acrylic cabinetry can create a stunning look or complement other materials as an accent.

High Gloss Acrylic is a highly durable and scratch resistant material with UV stabilization and low surface variance.

SILVER

RED

BLACK

BLUE

BRONZE

ION

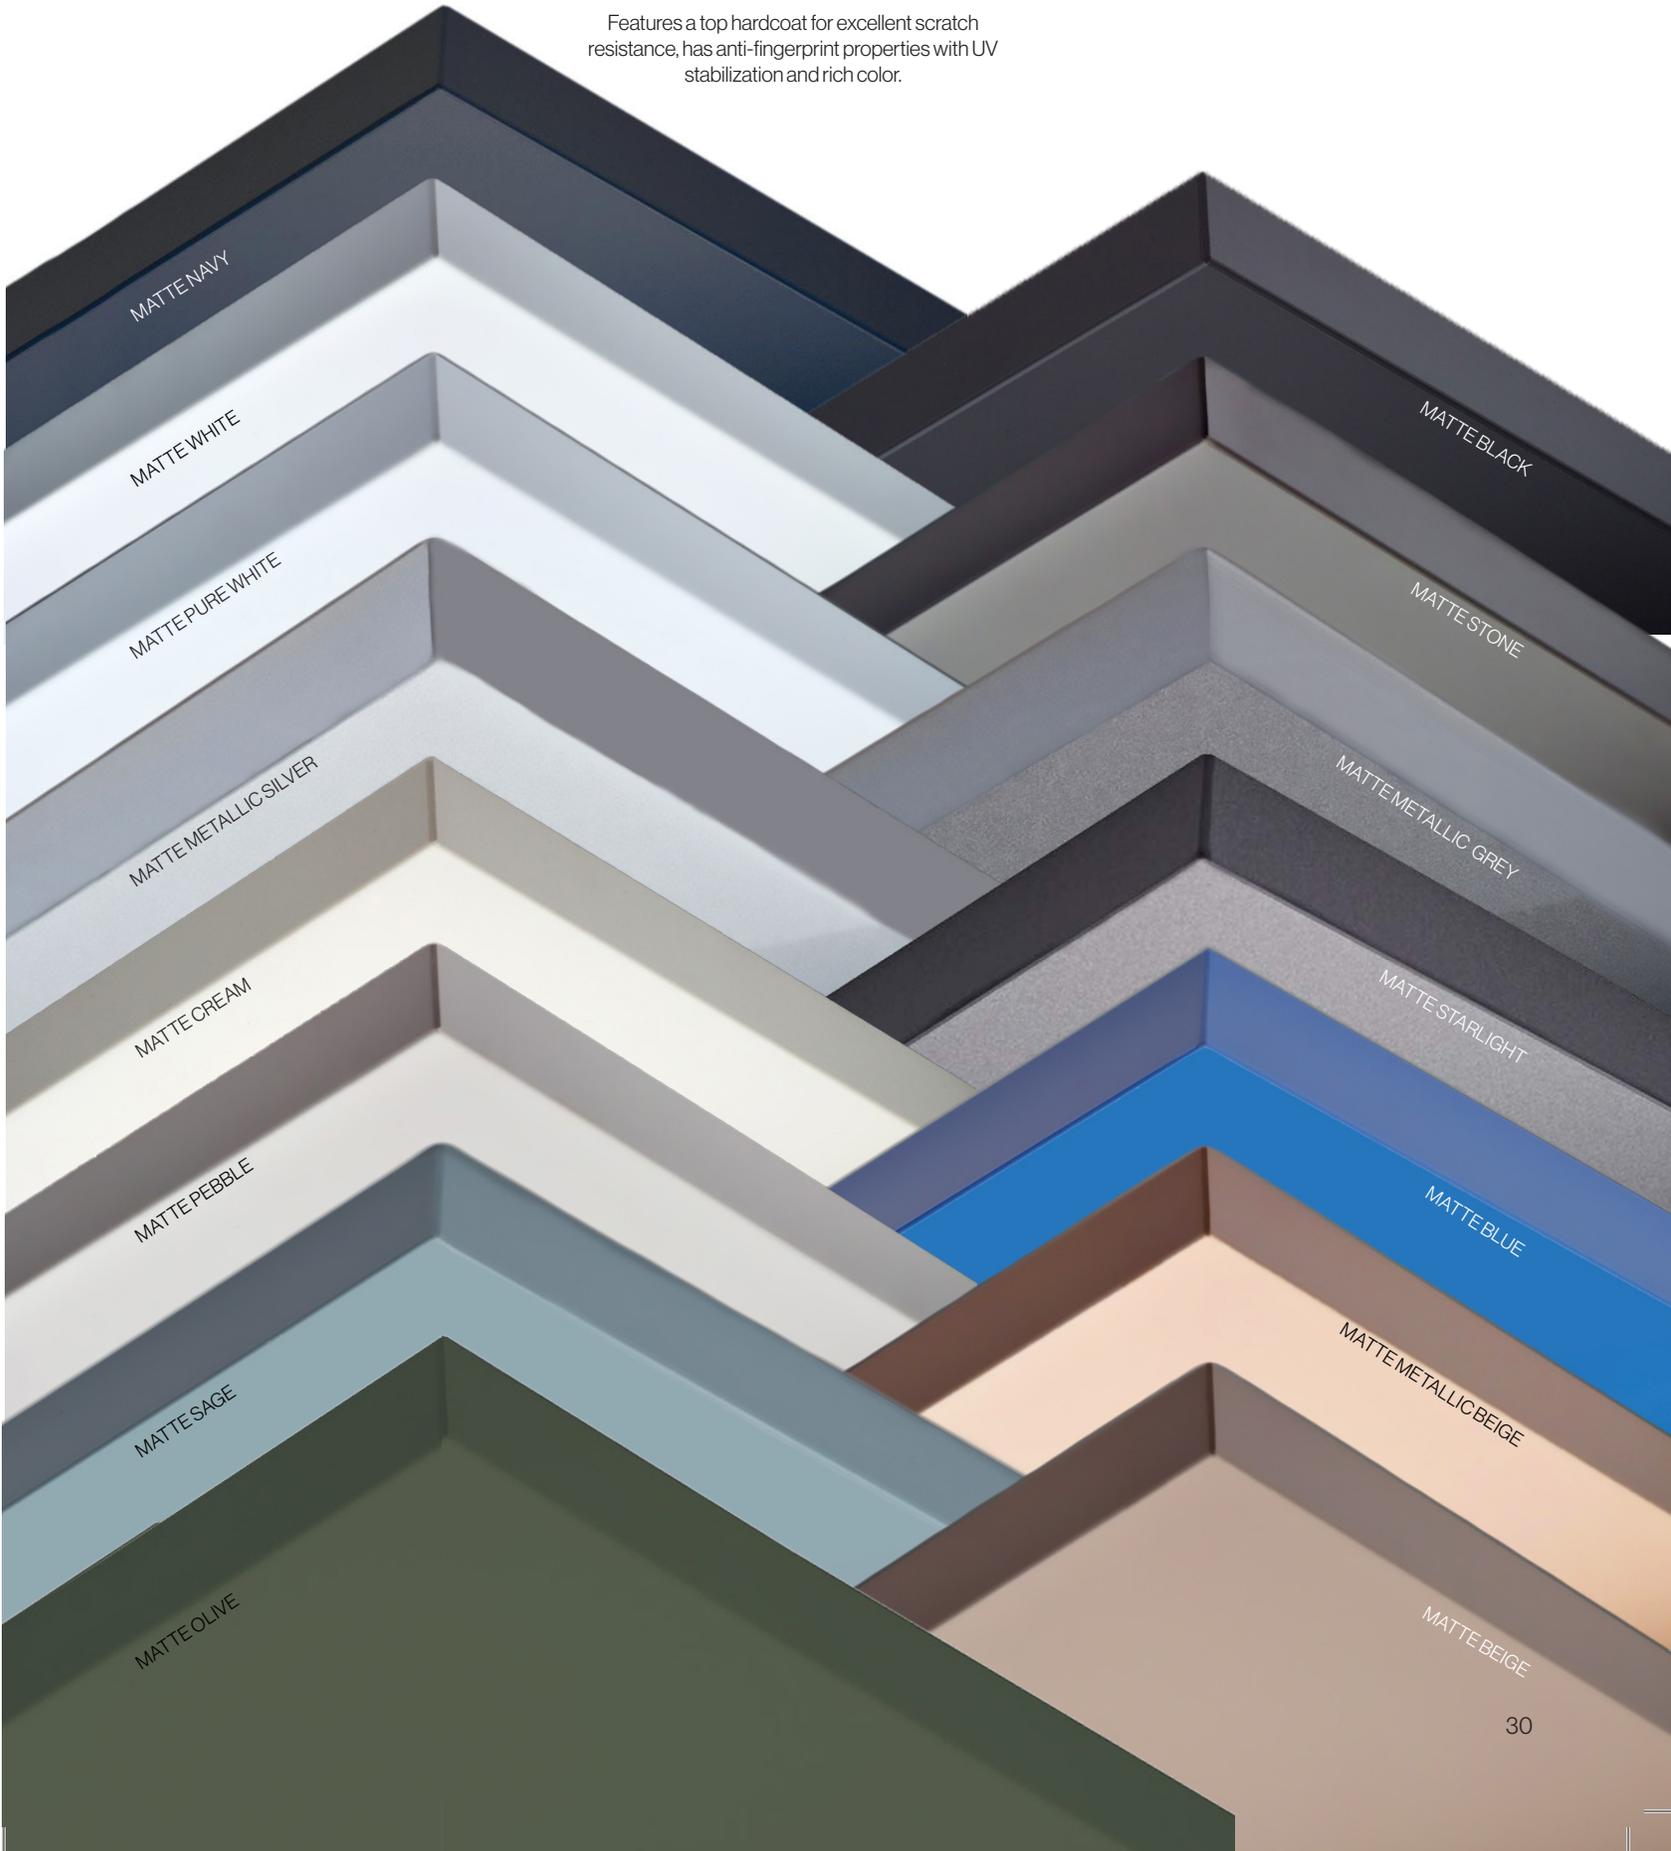

A decorative high-gloss film that has the stylish appearance of brushed metal with a luxurious gloss finish.

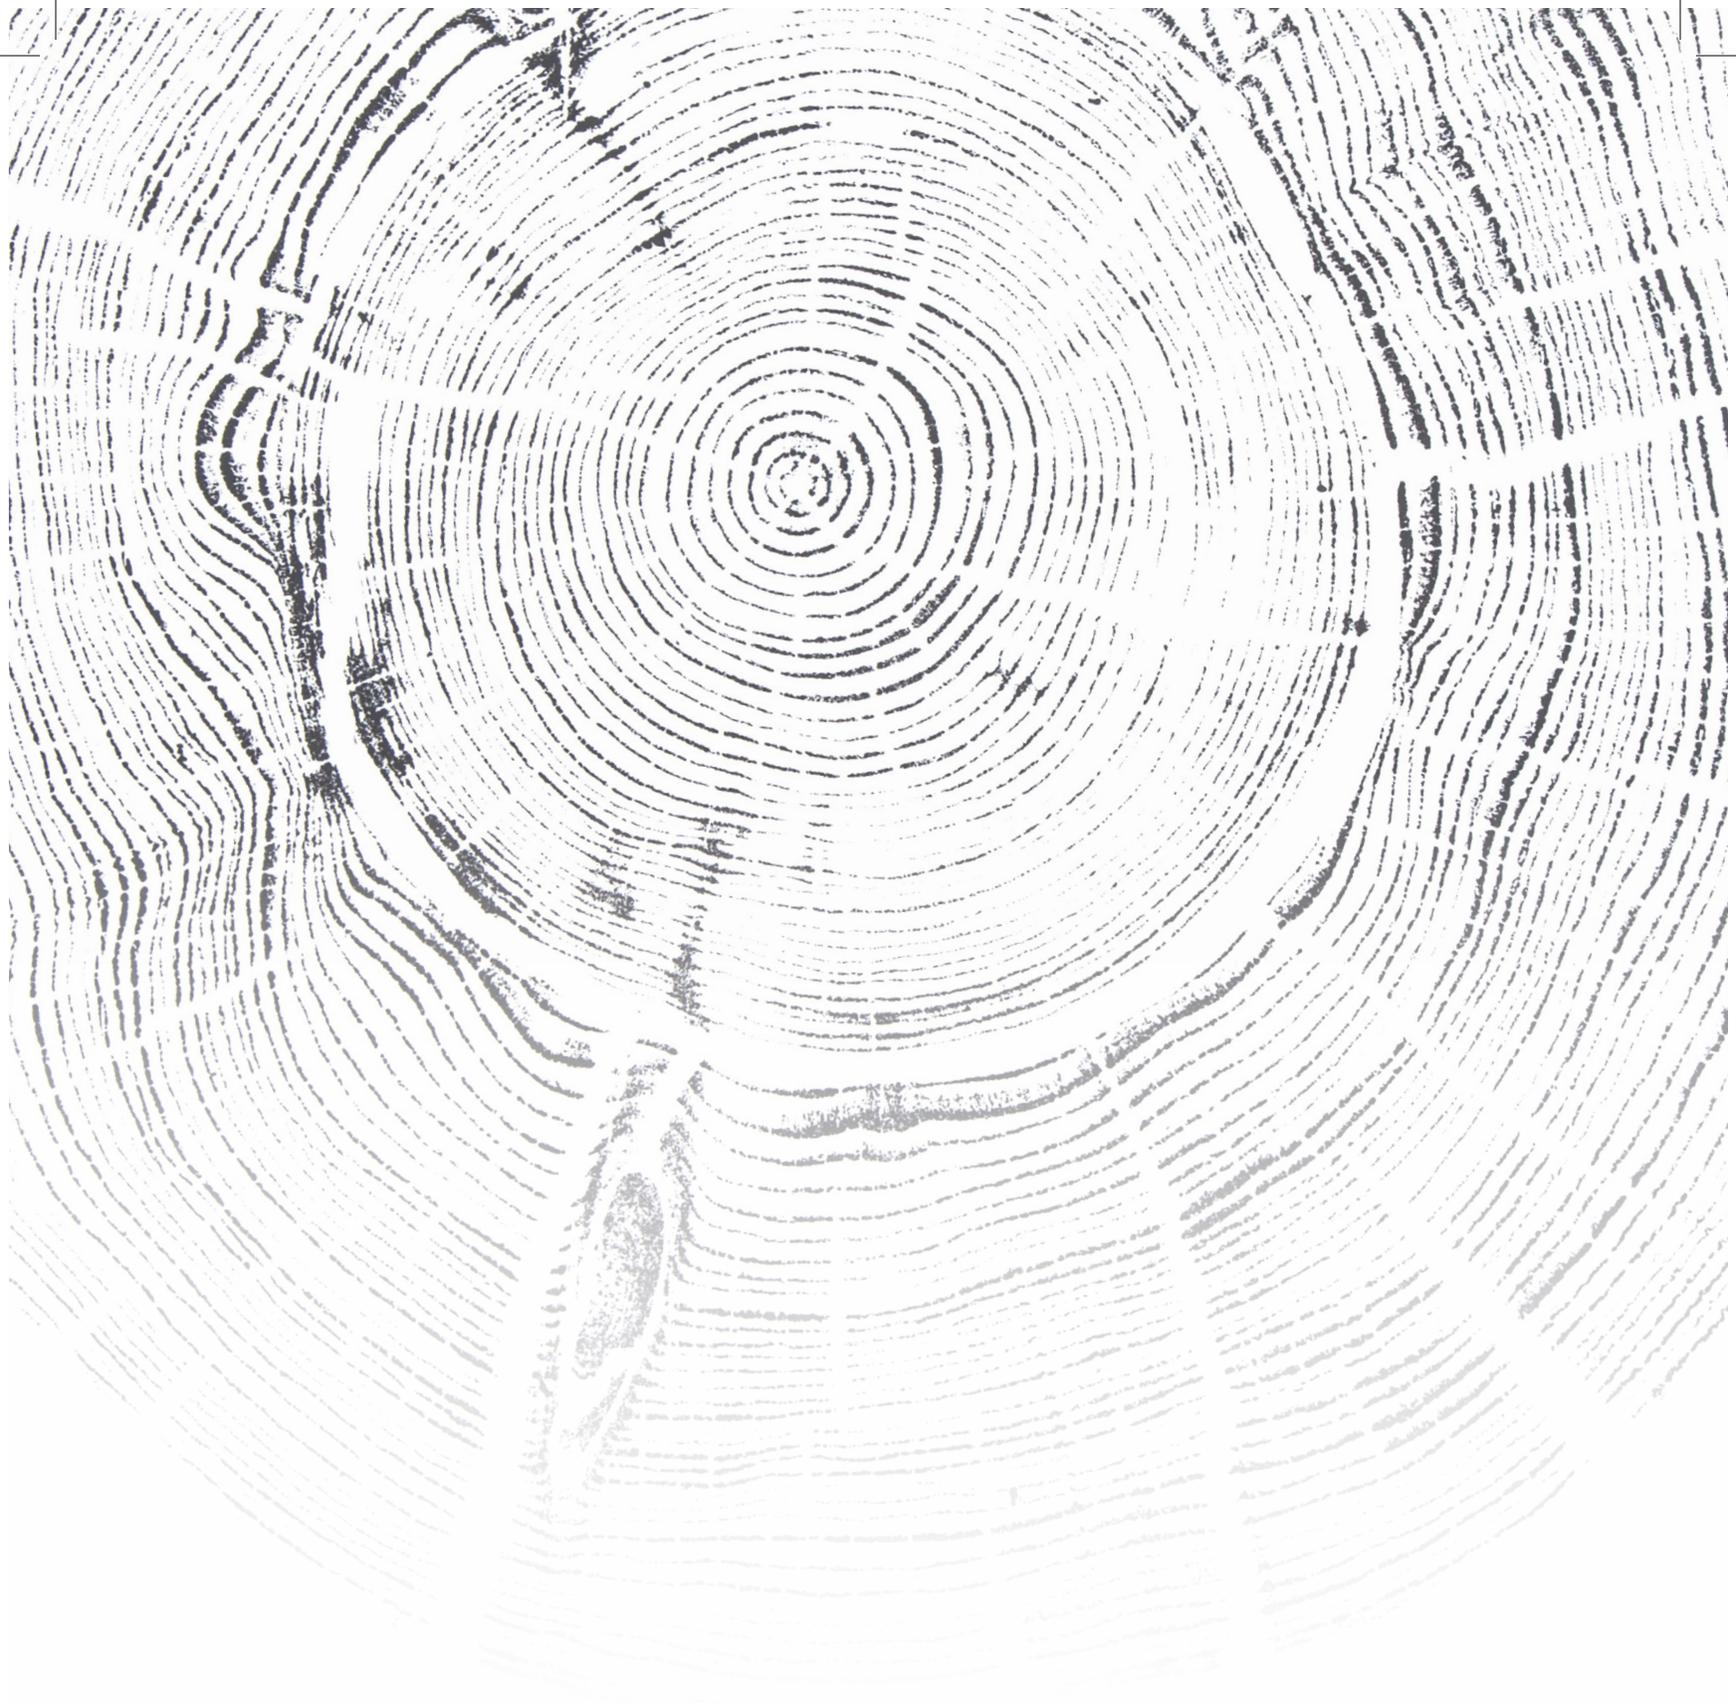

A stunning visual aesthetic is created through vibrant color, metallic shading and an 80% gloss level. No polishing or curing time after removal of protective peel coat. Perfect for any modern interior design.

Ultra Matte Acrylic

Incredibly smooth and soft to the touch, the enhanced surface properties make ultra matte acrylic beautiful and functional.

Features a top hardcoat for excellent scratch resistance, has anti-fingerprint properties with UV stabilization and rich color.
