

## Project Specification

### Tender details – the opportunity

Company name	Moov Tech Group Ltd (trading as Moovtech)
Company address	Lynton House, 7-12 Tavistock Square, London WC1 9BQ
Description of company activity/SIC code	62012
Objective of the proposed innovation project– this MUST involve activity that results in the development of or introduction to the market of a new product or service (max 300 words)	<p>To evaluate the current/future activity tracker market, establishing demand for innovation and uniqueness in a rapidly maturing sector. The objective is to provide users with a unique 'new to market' device plus free app to support.</p> <p>Device to offer a suite of health and activity data, eg body temperature, sleep quality and blood oxygen levels and potentially body temperature.</p> <p>Develop the technology to support and rewarding users for achieving daily steps targets via significant tree planting collaborations.</p> <p>Develop a new to sector teams feature offering users to set up private Steps Leagues to promote healthy competition.</p> <p>The device and our digital platform are both designed to help individuals and communities to become more active.</p> <p>Project split into 5 parts: Market Research, Technology development, Graphic/device product design, IP, and User Testing</p>
Company's current situation – existing project team and innovation project development stage (max 400 words)	<p>Moovtech has 3 core co-founders in C Suite</p> <p>We plan to use contracted resources to keep enable us to deliver quickly.</p> <p>We have built an MVP POC, based on steps data, which we have been testing using Google Fit and Apple Health.</p> <p>The next step for us is to work with an elected manufacturer to create a unique wearable device, exclusive to Moovtech by way of design and features.</p>

	Following this we will connect to the health and activity data collected by the device into our digital platform.
Business need – what expertise and support is required to reach the objective(s) above? (max 400 words)	A freelance UX researcher is required to source and co-ordinate user testing of a new 'fitbit' smartband device to discover users' needs, and how they interact with the product.
