To all Customers

Subject: Update of Kiwa Certification Mark and Accredia Accreditation Body Certification Mark

Dear Customer,

it is with pleasure that we communicate a restyling of the certification mark that our body grants in use to the Customers of the conformity assessment services.

The new Kiwa certification mark, although in continuity with the previous one, has essential and professional characteristics that favour its legibility. The clean and elegant lines reflect Kiwa's identity and, at the same time, convey the ability to evolve and innovate.

At the same time as the restyling of the Kiwa certification mark, the certification marks of the Accredia Accreditation Body have also been updated (the latter to be used only in reference to certifications covered by accreditation).

The new Kiwa and Accredia certification marks, which will be transmitted to you following this communication, can be used immediately (if the certificate in your possession is valid and in force). However, aware of the need on your part to dispose of any stock of material bearing the current certification marks, you may use such material while stocks last, but **no later than 31 December 2028**.

The rules for the correct use of certification marks are set out in the Certification Regulations and the new Regulations for the use of the mark, which can be consulted and downloaded from our website [Kiwa Italia](#) (in the About Us/Terms, Conditions and Regulations section [Contractual Documents - Kiwa Ita](#)).

In the event of any doubts regarding the correct use of the certification marks, you can contact our offices, so that your contact person can provide support and all the necessary explanations.

Thank you for your attention, best regards.
