Kinetix' State-of-the-Art DeFi Hub

LITEPAPER V1.0

Built on Kava

Kinetix'

Introduction

Kinetix is building a comprehensive community-focused DeFi hub designed exclusively for the Kava ecosystem. The Kinetix team is acutely aware of the potential pitfalls of the current crop of centralized trading solutions. While such solutions often offer a more holistic trading experience, including more advanced tooling, leverage, and a variety of tradable assets, they lack transparency and are vulnerable to systemic vulnerabilities.

The Kinetix DeFi hub will encompass a suite of the most sophisticated and popular DeFi legos in the web3 landscape to provide Kava with a one-stop platform for all things DeFi. Kinetix's cohesive network of DeFi protocols includes a Perpetual Exchange (PEX), a Decentralized Exchange (DEX), and a market for sophisticated derivative instruments.

Users on Kinetix will be able to take on leverage with perpetual contracts (Perps), execute swaps in spot markets, provide liquidity, stake, and farm, and explore synthetic assets and other exotic derivatives.

Our Mission

At Kinetix, our mission is to build a fully integrated DeFi hub that provides users on Kava with a world-class trading experience. As believers in the Kava tech stack and the strength of the broader IBC community, we are very confident that the future of Cosmos DeFi will be on Kava. We're working day and night to handpick the best platforms, features, assets, and protocols DeFi has to offer, and we're bringing them together to create a kick-ass, Kavanative DeFi hub that has no equal.

Kinetix Roadmap

August	September	To Be Decided
 Launch Perpetuals Exchange Launch V3 DEX 	 Gamma active liquidity management for V3 DEX Partnership with Abracadbra (leverage and lending platform) 	• \$KFI Token Launch

Kava Partnership

The Kinetix team has secured a strategic partnership with Kava. This partnership includes strategic investment from the Kava Foundation. The foundation will also provide support in seeding initial liquidity and supporting platform rewards. This powerful partnership will strengthen ties between Kinetix and Kava, and create proper conditions for the Kava community to explore Kinetix's DeFi hub.

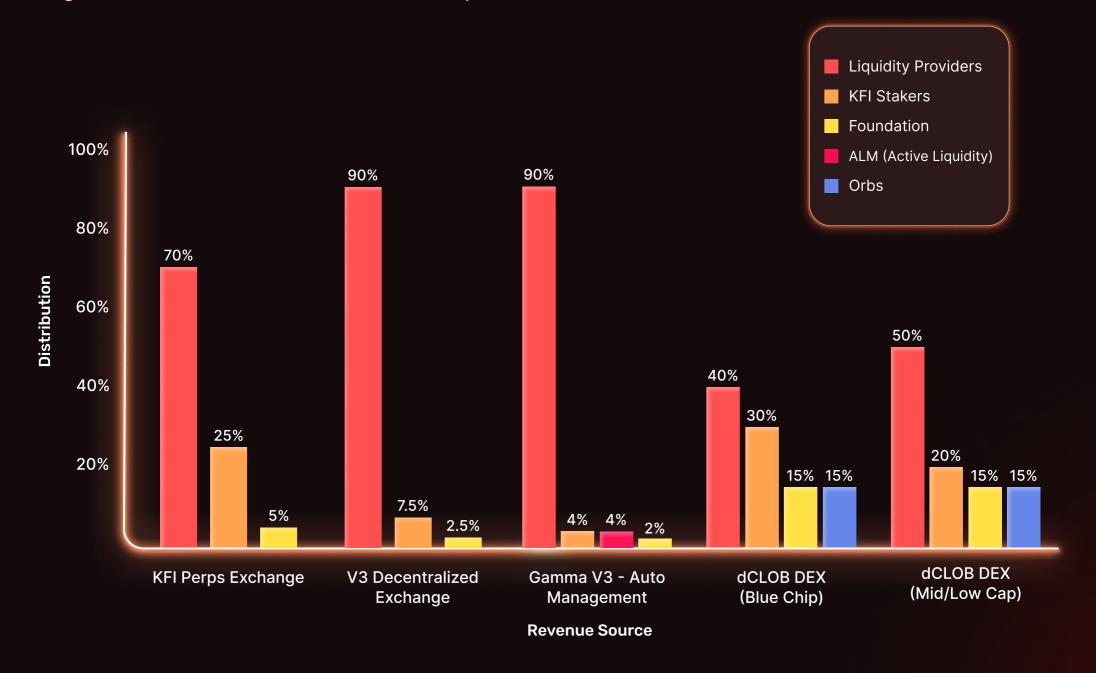

Decentralized Solutions

At Kinetix, the meltdowns, bankruptcies, and failures of 2022 — and the lessons they imparted — are still fresh in our minds. The inherent vulnerabilities of centralized systems are not to be overlooked in architecting a new DeFi ecosystem from the ground up.

Kinetix is principally and resolutely committed to implementing decentralized solutions that optimize user experience without creating systemic risk. Users on Kinetix will enjoy powerful liquidity management tools, cogent incentives, low fees, and competitive rates — all without any trusted intermediaries, KYC procedures, or exorbitant pay-to-play models.

Revenue Distribution

Sustainability is integral to our vision. As illustrated below, each platform and protocol within the Kinetix DeFi hub will play a unique role in building value for the Kinetix community at large, so both users and token holders reap rewards.

Kinetix Ecosystem

Derivatives Platform

A robust derivatives platform will be one of the cornerstones of the Kinetix DeFi hub. Derivatives play a vital role in hedging risk, deepening liquidity, and enabling sophisticated trading strategies. Kinetix Finance will offer a wide range of derivatives products, beginning with perpetual futures contracts and expanding to options, other forms of margin trading, spot markets, and more.

Decentralized Exchange

The Kinetix Hub will provide an immersive V3 experience by integrating a diverse range of liquidity pools and trading pairs. Users will benefit from an efficient, seamless trading experience where they have access to superior rates, prime liquidity, a breadth of popular asset pairs, and competitive staking and farming opportunities.

Active Liquidity Management

With the support of key partnerships and integrations, Kinetix will enable refined liquidity management strategies that can be implemented in a single click.

Community Governance

Decentralized governance will remain a foundational pillar guiding the development of the Kinetix DeFi hub and its growing body of protocols, features, and products. We value community involvement and will offer opportunities for active participation on an ongoing basis.

Our Team

The Kinetix team is comprised of industry veterans within the Decentralized Exchange & Perpetuals arena:

Building on Past Successes

The Kinetix team, headed by Alexi Atlas, has a wealth of experience from its past successes building QuickSwap, the largest DEX on Polygon, and Alexi's personal experience as a commodities trader. Alexi's passion for Kava and the broader IBC community led him to build a holistic DeFi hub for the Kava community.

Alexi Atlas

FOUNDER

- Head of Business Developement for QuickSwap
- Web3 Investor & Commodities trader in traditional finance

Sameep Singhania

- Co-Founder of QuickSwap
- Lead Developer of QuickSwap
- Early Developer on Polygon POS

ADVISOR

Roc Zacharias ADVISOR

- CEO of Lunar Digital Assets
- Co-Founder of QuickSwap, the largest DEX on Polygon

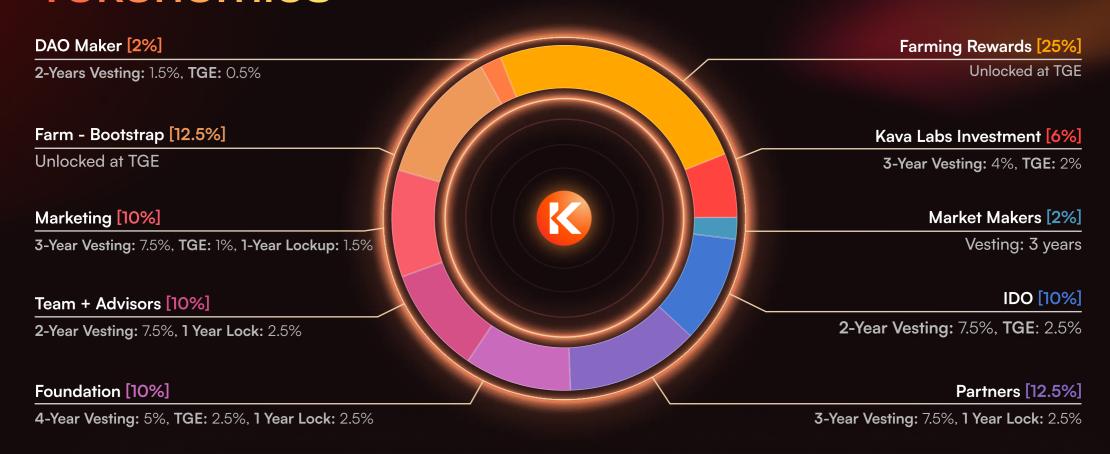

Steve Ox

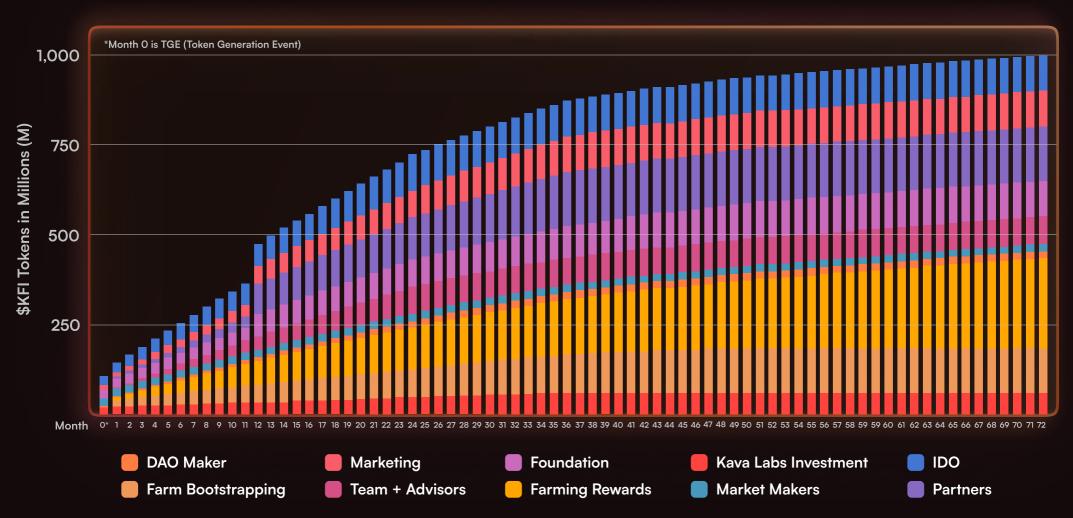

LEAD DEVELOPER

- CTO of a leading Sportsbook provider (b2b)
- Senior software architect
- Over 10 years of experience

Tokenomics

Conclusion

The Kava tech stack has a winning recipe to take the Cosmos DeFi race by storm. Kinetix is curating an unrivaled DeFi hub designed exclusively for Kava, and bringing the very best of derivatives, spot markets, and more, complete with cutting-edge features for perpetual contracts and active liquidity management. Kinetix is designed with a principled commitment to decentralization and community governance, so its users and token holders are steering the ship when it matters most.

Kinetix: Your best trade, every trade.
