<td>Not Classified</td>
</tr>
</tbody>
</table>

### Label elements

#### Hazard symbols

- ![Hazard Symbol](image)

#### Signal word

Danger

#### Hazard statements

- H317 May cause an allergic skin reaction.
- H350 May cause cancer.

#### Precautionary statements

- P201 Obtain special instructions before use.
- P202 Do not handle until all safety precautions have been read and understood.
- P261 Avoid breathing dust.
- P272 Contaminated work clothing must not be allowed out of the workplace.
- P280 Wear protective gloves/ protective clothing/ eye protection/ face protection.
- P302+P352 If on skin: Wash with plenty of water.
- P308+P313 If exposed or concerned: Get medical advice/ attention.
- P321 Specific treatment (see Section 4 of the SDS).
- P333+P313 If skin irritation or rash occurs: Get medical advice/ attention.
- P362+P364 Take off contaminated clothing and wash it before reuse.
- P405 Store locked up.
- P501 Dispose of contents/ container in accordance with national regulations.

### Contains

Urea extended phenol formaldehyde resin, Formaldehyde

### Supplemental label information

See Section 16.

### Other hazards

- **Physical Hazards**: None.
- **Health Hazards**: May cause cancer. Mechanical irritation of the skin, eyes and upper respiratory system.
- **Environmental Hazards**: None.
- **Main symptoms**: Prolonged and repeated exposure may cause cancer. Repeated or prolonged exposure may cause an allergic skin reaction. Contact with skin, eyes and upper respiratory system may cause mechanical irritation. Biosoluble glass mineral wool is classified as a nuisance dust by OSHA.
## Uncured Glass Mineral Wool Insulation

The full text for all hazard statements is displayed in Section 16.

Ingredient notes:
1. Man made vitreous (silicate) fibers with random orientation with alkaline oxide and alkali earth oxide (Na₂O+K₂O+CaO+MgO+BaO) content greater than 18% by weight meeting the requirements of Note Q of regulation n° 1272/2008 and therefore not classified carcinogenicity.
2. All Knauf Insulation products covered by this SDS are independently certified by EUCEB to be manufactured using biosoluble glass fibers formulations and thus the glass wool fibers are exempt from labelling under NTP or California Prop 65 requirements.

Specific chemical identity and/or exact percent concentration is withheld as trade secret.

4. First-aid measures

Description of first aid measures

General information
Show this Safety Data Sheet to the medical professional in attendance. If symptoms occur, follow first aid measures as appropriate.

Notes to Physician:
No specific recommendations.

Inhalation
Remove from exposure. Rinse the throat and clear dust from airways.

Ingestion
Drink plenty of water if accidentally ingested.

Skin Contact
Wash with mild soap and warm water after each exposure. If skin irritation or rash occurs: Get medical advice/attention. Wash contaminated clothing before reuse. If mechanical irritation occurs, remove contaminated clothing and wash skin gently with cold water and soap.

Eye contact
Rinse abundantly with water for at least 15 minutes.

Most important symptoms and effects, both acute and delayed

General information
Prolonged and repeated exposure may cause cancer. Repeated or prolonged exposure may cause an allergic skin reaction. Contact with skin, eyes and upper respiratory system may cause mechanical irritation. Biosoluble glass mineral wool is classified as a nuisance dust by OSHA.

Indication of immediate medical attention and special treatment needed

General information
If any adverse reaction or discomfort continues from any of the above exposures, seek professional medical advice.

Specific treatments
No specific recommendations.

5. Fire-fighting measures
Uncured Glass Mineral Wool Insulation

**Extinguishing media**

**Suitable extinguishing media**
Water, foam, carbon dioxide (CO2), and dry powder.

**Special hazards arising from the substance or mixture**

**General information**
Products do not pose a fire hazard in use; however, some packaging materials or facings may be combustible. In fire conditions, the binder will decompose giving off carbon monoxide, carbon dioxide, carbon particulate and traces of hydrogen cyanide from pyrolysis of the resin.

**Advice for firefighters**

**General information**
In large fires in poorly ventilated areas involving packaging materials respiratory protection / breathing apparatus may be required.

6. **Accidental release measures**

**Personal precautions, protective equipment and emergency procedures**

**Personal precautions**
Minimize direct contact with skin in order to prevent mechanical itching. In dusty environments, use suitable respiratory protection such as 3M 8210, N95 or equivalent. Use glasses or goggles when working with mineral wool insulation above shoulder height or in dusty environments. Where possible, use natural ventilation during installation in order to minimize dust levels.

After contact with the product, rinse skin in cold water to reduce potential effects of mechanical itching. Dispose of surplus product in accordance with local regulations.

Use personal protection recommended in Section 8 of the SDS.

**Environmental precautions**

**Environmental precautions**
Not relevant.

**Methods and material for containment and cleaning up**

**Methods for cleaning up**
In dusty environments, use vacuum equipment where possible to minimize dust levels.

**Reference to other sections**
For personal protection, see Section 8. For waste disposal, see Section 13.

7. **Handling and storage**

**Precautions for safe handling**

**Usage precautions**
Provide adequate ventilation. Avoid breathing dust. Assure proper respiratory protection if dust potential exceeds PEL/TLV. Wear protective gloves/ protective clothing/ eye protection/ face protection. Wash thoroughly after handling.

**Conditions for safe storage, including any incompatibilities**

**Storage precautions**
To ensure optimum product performance; when packaging is removed or opened; products should be stored inside or covered to protect them from ingress of rain water or snow. Storage arrangements should ensure stability of stacked products and use on a first in first out basis (FIFO) is recommended.

**Specific end use(s)**
Thermal and/or acoustic insulation for use in technical applications, industrial applications and in building construction.

8. **Exposure controls/Personal protection**

**Control parameters**

**Occupational exposure limits**

**Biosoluble glass mineral wool**
Uncured Glass Mineral Wool Insulation

Long-term exposure limit (8-hour TWA): ACGIH, (Notes: (A3)) 1 f/cc Glass wool fibers
Long-term exposure limit (8-hour TWA): NIOSH 5 mg/m³ Mineral wool fiber, total particulate
Long-term exposure limit (8-hour TWA): OSHA 5 mg/m³ Particulates not otherwise regulated (PNOR), respirable fraction
Long-term exposure limit (8-hour TWA): OSHA 15 mg/m³ Particulates not otherwise regulated (PNOR), total dust

**Carbon black**

Long-term exposure limit (8-hour TWA): ACGIH 3 mg/m³ inhalable fraction
A3
Long-term exposure limit (8-hour TWA): OSHA 3.5 mg/m³

**Disposable Low Density Polyethylene Interleaving**

Long-term exposure limit (8-hour TWA): OSHA, ACGIH 5 mg/m³ respirable dust
Long-term exposure limit (8-hour TWA): ACGIH, OSHA 10 mg/m³ total dust

**Phenol**

Long-term exposure limit (8-hour TWA): NIOSH, (Notes: Sk, CT) 5 ppm 19 mg/m³
Ceiling exposure limit: NIOSH, (Notes: Sk, CT) 15.6 ppm 60 mg/m³
Long-term exposure limit (8-hour TWA): OSHA, (Notes: Sk) 5 ppm 19 mg/m³
Long-term exposure limit (8-hour TWA): ACGIH, (Notes: A4, Sk, BEI) 5 ppm 19 mg/m³

**Formaldehyde**

Ceiling exposure limit: ACGIH 0.3 ppm 0.37 mg/m³
A2, DSens, RSens
Long-term exposure limit (8-hour TWA): OSHA 0.75 ppm
Short-term exposure limit (15-minute): OSHA 2 ppm
ACGIH = American Conference of Governmental Industrial Hygienists.
A3 = Confirmed Animal Carcinogen with Unknown Relevance to Humans.
A2 = Suspected Human Carcinogen.
DSens = Dermal sensitizer.
RSens = Respiratory sensitizer.
NIOSH = The National Institute for Occupational Safety and Health.

**Ingredient comments**

(A3) - Fibers longer than 5 μm; diameter less than 3 μm; aspect ratio greater than 5:1 as determined by the membrane filter method at 400-450X magnification (4-mm objective) phase contrast illumination.
Biosoluble glass mineral wool - See section 3.
Ca = Potential occupational carcinogen
CT = Ceiling time.
DSens = Dermal sensitizer.
RSens = Respiratory sensitizer.
A2 = Suspected Human Carcinogen.
Sk = Danger of cutaneous absorption.
A4 = Not Classified as a Human Carcinogen.
BEI = Biological Exposure Index.

**Carbon black (CAS: 1333-86-4)**

Immediate danger to life and health 1750 mg/m³

**Phenol (CAS: 108-95-2)**

Immediate danger to life and health 250 ppm

**Formaldehyde (CAS: 50-00-0)**
Uncured Glass Mineral Wool Insulation

Immediate danger to life and health

Exposure controls

Appropriate engineering controls
Maintain sufficient mechanical or natural ventilation to assure fiber concentrations remain below PEL/TLV. Use local exhaust if necessary. Power equipment should be equipped with properly designed dust collection devices.

Eye/face protection
Use glasses or goggles when working with mineral wool insulation above shoulder height or in dusty environments.

Other skin and body protection
Minimize direct contact with skin in order to prevent mechanical itching. Gloves suitable for protection from chemicals are recommended to minimize effects from uncured binder and fibers. Rinse washer thoroughly.

Hygiene measures
After contact with the product, rinse skin in cold water to reduce potential effects of mechanical itching.

Respiratory protection
In dusty environments, use suitable respiratory protection.

Thermal hazards
Not relevant.

Environmental exposure controls
Not relevant.

9. Physical and chemical properties

Information on basic physical and chemical properties

Appearance
Solid.
Rolls. Panel. Loose fiber.

Color
White. / Yellow. / Black.

Odor
Phenol formaldehyde odor

Odor threshold
No data available.

pH
Not relevant.

Melting point
Not relevant.

Initial boiling point and range
Not relevant.

Flash point
Not relevant.

Evaporation rate
Not relevant.

Flammability (solid, gas)
Not relevant.

Upper/lower flammability or explosive limits
Not relevant.

Vapor pressure
Not relevant.

Vapor density
Not relevant.

Relative density
7 - 96 kg/m³

Solubility(ies)
Generally chemically inert and slightly soluble in water.

Partition coefficient
Not relevant.

Auto-ignition temperature
Not relevant.

Decomposition Temperature
Not relevant.
Uncured Glass Mineral Wool Insulation

Viscosity
Not relevant.

Explosive properties
Not relevant.

Oxidizing properties
Not relevant.

Nominal diameter of fibers.
3 - 8μm

Length weight geometric mean diameter less 2 standard errors
< 6 μm

Orientation of fibers
Random

10. Stability and reactivity

Reactivity
None.

Stability
This is a stable, non-reactive product.

Possibility of hazardous reactions
None.

Conditions to avoid
None.

Materials to avoid
Hydrofluoric acid will react with and dissolve glass.

Hazardous decomposition products
Thermal decomposition of the resin may include carbon dioxide, carbon monoxide, and traces of carbon particulate.

11. Toxicological information

Information on toxicological effects

Acute toxicity - oral
Notes (oral LD₅₀)
Based on available data the classification criteria are not met. Estimated value.
ATE oral (mg/kg) 13,757.0

Acute toxicity - dermal
Notes (dermal LD₅₀)
Based on available data the classification criteria are not met. Estimated value.
ATE dermal (mg/kg) 57,951.0

Acute toxicity - inhalation
Notes (inhalation LC₅₀)
Based on available data the classification criteria are not met. Estimated value.
ATE inhalation (gases ppm) 231,500.0
ATE inhalation (dusts/mists mg/l) 138.0

Skin corrosion/irritation
May cause mechanical irritation to skin.

Serious eye damage/irritation
May cause mechanical irritation to eyes.

Respiratory sensitization
Based on available data the classification criteria are not met.

Skin sensitization
Uncured Glass Mineral Wool Insulation

Skin sensitization
Sensitizing. May cause an allergic skin reaction.

Germ cell mutagenicity
Genotoxicity - in vitro
Based on available data the classification criteria are not met.
Genotoxicity - in vivo
Based on available data the classification criteria are not met.

Carcinogenicity
Carcinogenicity
May cause cancer.

Reproductive toxicity
Reproductive toxicity - fertility
Based on available data the classification criteria are not met.
Reproductive toxicity - development
Based on available data the classification criteria are not met.

Specific target organ toxicity - single exposure
STOT - single exposure
Based on available data the classification criteria are not met.

Specific target organ toxicity - repeated exposure
STOT - repeated exposure
Based on available data the classification criteria are not met.

Aspiration hazard
Aspiration hazard
Not relevant.

General information
Formaldehyde was found to be corrosive to the eyes of rabbits. Formaldehyde was sensitizing in the guinea pig maximization test and the local lymph node assay with mice; however, there was no evidence of respiratory sensitization in various studies in mice.

The uncured resin contains up to 0.2 % free formaldehyde. The International Agency for Research on Cancer (IARC) has classified formaldehyde as a Group 1 human carcinogen (June 2004). Formaldehyde did not cause reproductive and/or developmental effects when tested in animals. Repeated formaldehyde exposure caused toxic effects only in the tissues of direct contact after inhalation, oral or dermal exposure characterised by local cytotoxic destruction and subsequent repair of the damage. The typical locations of lesions in experimental animals were the nose after inhalation, the stomach after oral administration and the skin after dermal application.

Inhalation
Mechanical irritation to upper respiratory tract.

Ingestion
Non-hazardous when ingested.

Skin Contact
Repeated or prolonged exposure may cause an allergic skin reaction. Mechanical irritation to skin.

Eye contact
Mechanical irritation to eyes.

Acute and chronic health hazards
May cause cancer. May cause an allergic skin reaction.

Medical Symptoms
Prolonged and repeated exposure may cause cancer. Repeated or prolonged exposure may cause an allergic skin reaction. Contact with skin, eyes and upper respiratory system may cause mechanical irritation. Biosoluble glass mineral wool is classified as a nuisance dust by OSHA.

STOT - repeated exposure Based on available data the classification criteria are not met.

Aspiration hazard
Aspiration hazard Not relevant.

12. Ecological information

Toxicity
This product is not ecotoxic to air, water or soil, by composition.

Persistence and degradability
No data available.

Bioaccumulative potential
Bio-Accumulative Potential No data available.

Mobility in soil
Mobility Not relevant.

Other adverse effects
None known.

13. Disposal considerations

Waste treatment methods
General information Dispose of in accordance with all applicable regulations. Empty containers should be taken to an approved waste handling site for recycling or disposal.

Disposal methods This product is not regulated under RCRA Hazardous Waste Regulations. May be disposed in landfill. If unsure, contact the local office of the USEPA, your local public health department or the local landfill regulators.

14. Transport information

General The product is not covered by international regulations on the transport of dangerous goods (IMDG, IATA, DOT).

UN Number
UN No. (International) Not applicable.

Proper shipping name
Proper shipping name (International) Not applicable.

Transport hazard class(es)
Transport Labels (International) No transport warning sign required.

Packing group
Uncured Glass Mineral Wool Insulation

Packing group (International) Not applicable.

Environmental hazards

Environmentally Hazardous Substance

No.

Special precautions for user

Not applicable.

Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code

Not applicable.

15. Regulatory information

Regulatory Status The product is classified as hazardous.

In accordance with industry practice, Knauf Insulation has decided to continue to provide its customers with the appropriate information for the purpose of assuring safe handling and use of mineral wool throughout the product life.

Abbreviations and acronyms used in the safety data sheet

- CAS: Chemical Abstracts Service.
- IATA: International Air Transport Association.
- NIOSH: The National Institute for Occupational Safety and Health.
- OSHA: Occupational Safety and Health Administration.
- PBT: Persistent, Bioaccumulative and Toxic substance.
- PEL: Permissible Exposure Limit.
- SARA: Superfund Amendments and Reauthorization Act.
- TLV: Threshold Limit Value.
- TSCA: Toxic Substances Control Act.
- USEPA: United States Environmental Protection Agency.
- vPvB: Very Persistent and Very Bioaccumulative.

General information

All products manufactured by Knauf Insulation are made of non-classified fibers and are certified by EUCEB. Products meeting EUCEB certification requirements can be recognised by the EUCEB logo printed on the packaging.

Hazard statements in full

H301 Toxic if swallowed.
H311 Toxic in contact with skin.
H314 Causes severe skin burns and eye damage.
H317 May cause an allergic skin reaction.
H318 Causes serious eye damage.
H330 Fatal if inhaled.
H331 Toxic if inhaled.
H335 May cause respiratory irritation.
H341 Suspected of causing genetic defects.
H350 May cause cancer.
H373 May cause damage to organs through prolonged or repeated exposure.
H411 Toxic to aquatic life with long lasting effects.

Other information

In 2001, the International Agency for Research on Cancer (IARC) reclassified glass mineral wool fibres from Group 2B (possibly carcinogenic) to Group 3 «agent which cannot be classified as for their carcinogenicity to humans». (See Monograph Vol 81, http://monographs.iarc.fr/)
Uncured Glass Mineral Wool Insulation

This Safety Data Sheet / Product Data Sheet does not constitute a workplace assessment. Information contained in this document represents the state of our knowledge regarding this product as of the date of issue of the document. Attention of users is drawn to possible risks taken when the product is used for other applications than the ones it has been designed for.
