SAFETY DATA SHEET

Glass Mineral Wool Insulation (Brown)

According to WHMIS 2015, in compliance with the Hazardous Product Act (HPA, as amended) and the requirements of the Hazardous Product Regulations (HPR)

1. Identification

Product identifier

Product name Glass Mineral Wool Insulation (Brown)

Product number MA_DP_101

Synonyms; Common Names Akousti-Liner™, Akousti-Liner R™, Alley Wrap B™, Akousti-Shield™, Akousti-Board Black™, AK Board™, High Temperature Board, High Temperature Blanket, High Temperature Panel, High Temperature Batt, High Temperature HD Blanket, Alley K™ Pipe Insulation (*See section 2, 8, 10)

Revision date: 10/22/2020

Recommended use of the chemical and restrictions on use

Restriction on use Thermal and/or acoustic insulation for use in technical applications, industrial applications and in building construction.

Uses advised against None known.

Details of the supplier of the safety data sheet

Supplier Manson Insulation Products Ltd
One Knauf Drive
IN 46176-1 Shelbyville
800 825 4434
sds@knaufinsulation.com
www.imanson.com

Region: Canada

Emergency telephone number

Emergency telephone 24hrs: Chemtrec Tel: 800 424 9300
# Glass Mineral Wool Insulation (Brown)

## 2. Hazard identification

<table>
<thead>
<tr>
<th>Classification of the substance or mixture</th>

### Label elements

- **Hazard statements**: NC Not Classified
- **Contains**: None.
- **Hazard pictogram**: None.
- **Signal word**: None.
- **Precautionary statements**: None.
- **Supplemental label information**: None.

The following sentences and pictograms apply to this product:
The mechanical effect of fibers in contact with skin may cause temporary itching.

http://www.knaufinsulation.com/comfort-and-handling

### Other hazards

- **Physical Hazards**: None.
- **Health Hazards**: Mechanical irritation of the skin, eyes and upper respiratory system.
- **Environmental Hazards**: None.
- **Main symptoms**: Contact with skin, eyes and upper respiratory system may cause mechanical irritation. Biosoluble glass mineral wool is classified as a nuisance dust.
- **Heat-Up Precautions**: When heated to temperatures above 200°C (400°F) for the first time, release of binder components and binder decomposition products can occur which, in high concentrations, may irritate eyes and the respiratory system. See section 8 & 10

The full text for all hazard statements is displayed in Section 16.

**Ingredient notes**

(1) Man made vitreous (silicate) fibers with random orientation with alkaline oxide and alkali earth oxide (Na₂O+K₂O+CaO+MgO+BaO) content greater than 18% by weight meeting the requirements of Note Q of regulation n° 1272/2008 and therefore not classified carcinogenicity.

(2) All Knauf Insulation products covered by this SDS are independently certified by EUCEB to be manufactured using biosoluble glass formulations.

Specific chemical identity and/or exact percent concentration is withheld as trade secret.
Glass Mineral Wool Insulation (Brown)

4. First-aid measures

**Description of first aid measures**

**General information**
Show this Safety Data Sheet to the medical professional in attendance. If symptoms occur, follow first aid measures as appropriate.

**Notes to Physician:**
No specific recommendations.

**Inhalation**
Remove from exposure. Rinse the throat and clear dust from airways.

**Ingestion**
Drink plenty of water if accidentally ingested.

**Skin contact**
If mechanical irritation occurs, remove contaminated clothing and wash skin gently with cold water and soap.

**Eye contact**
Rinse abundantly with water for at least 15 minutes.

**Most important symptoms and effects, both acute and delayed**

**General information**
Contact with skin, eyes and upper respiratory system may cause mechanical irritation.
Biosoluble glass mineral wool is classified as a nuisance dust.

**Indication of any immediate medical attention and special treatment needed**

**General information**
If any adverse reaction or discomfort continues from any of the above exposures, seek professional medical advice.

**Specific treatments**
No specific recommendations.

5. Fire-fighting measures

**Extinguishing media**

**Suitable extinguishing media**
Water, foam, carbon dioxide (CO2), and dry powder.

**Specific hazards arising from the hazardous product**

**General information**
Products do not pose a fire hazard in use; however, some packaging materials or facings may be combustible. Products of combustion from product and packaging - carbon dioxide, carbon monoxide and some trace gases such as ammonia, nitrogen oxides and volatile organic substances.

**Advice for firefighters**

**General information**
In large fires in poorly ventilated areas involving packaging materials respiratory protection / breathing apparatus may be required.
Glass Mineral Wool Insulation (Brown)

6. Accidental release measures

**Personal precautions, protective equipment and emergency procedures**

**Personal precautions**
Minimize direct contact with skin in order to prevent mechanical itching. In dusty environments, use suitable respiratory protection such as 3M 8210, N95 or equivalent. Use glasses or goggles when working with mineral wool insulation above shoulder height or in dusty environments. Where possible, use natural ventilation during installation in order to minimize dust levels.

After contact with the product, rinse skin in cold water to reduce potential effects of mechanical itching. Dispose of surplus product in accordance with local regulations.

Use personal protection recommended in Section 8 of the SDS.

**Environmental precautions**
Not relevant.

**Methods and material for containment and cleaning up**

**Methods for cleaning up**
In dusty environments, use vacuum equipment where possible to minimize dust levels.

**Reference to other sections**
For personal protection, see Section 8. For waste disposal, see Section 13.

7. Handling and storage

**Precautions for safe handling**

**Usage precautions**
Assure proper respiratory protection if potential dust exposure exceeds occupational exposure limits.

**Conditions for safe storage, including any incompatibilities**

**Storage precautions**
To ensure optimum product performance; when packaging is removed or opened; products should be stored inside or covered to protect them from ingress of rain water or snow. Storage arrangements should ensure stability of stacked products and use on a first in first out basis (FIFO) is recommended.

**Specific end use(s)**
Thermal and/or acoustic insulation for use in technical applications, industrial applications and in building construction.
Glass Mineral Wool Insulation (Brown)

8. Exposure controls/Personal protection

Control parameters

Occupational exposure limits

Biosoluble glass mineral wool

Long-term exposure limit (8-hour TWA): New Brunswick (Notes: (A3), ACGIH 2015) 1 f/cc Glass wool fibers
Long-term exposure limit (8-hour TWA): Saskatchewan 1 f/cc Glass wool fibers
Short-term exposure limit (15-minute): Saskatchewan 3 f/cc Glass wool fibers
Long-term exposure limit (8-hour TWA): Nunavut 1 f/cc Glass wool fibers
Short-term exposure limit (15-minute): Nunavut 3 f/cc Glass wool fibers
Long-term exposure limit (8-hour TWA): Newfoundland-Labrador (Note: (A3)) 1 f/cc Glass wool fibers
Long-term exposure limit (8-hour TWA): Manitoba (Note: (A3)) 1 f/cc Glass wool fibers
Long-term exposure limit (8-hour TWA): Nova Scotia (Note: (A3)) 1 f/cc Glass wool fibers
Long-term exposure limit (8-hour TWA): Prince Edward Island (Note: (A3)) 1 f/cc Glass wool fibers
Long-term exposure limit (8-hour TWA): Yukon 10 mg/m³ Mineral wool fibers, respirable
Long-term exposure limit (8-hour TWA): NWT 1 f/cc Glass wool fibers
Short-term exposure limit (15-minute): NWT 3 f/cc Glass wool fibers
Long-term exposure limit (8-hour TWA): Quebec 2 f/cc Glass wool fibers
Long-term exposure limit (8-hour TWA): Alberta 1 f/cc Glass wool fibers
Long-term exposure limit (8-hour TWA): BC 1 f/cc Glass wool fibers
Long-term exposure limit (8-hour TWA): Ontario (Note: Ont) 1 f/cc Glass wool fibers
Long-term exposure limit (8-hour TWA): Alberta (Note: (3)) 10 mg/m³ Particulates not otherwise regulated (PNOR), total dust
Long-term exposure limit (8-hour TWA): Alberta (Note: (3)) 3 mg/m³ Particulates not otherwise regulated (PNOR), respirable fraction

Ingredient comments

(A3) - Fibers longer than 5 μm; diameter less than 3 μm; aspect ratio greater than 5:1 as determined by the membrane filter method at 400-450X magnification (4-mm objective) phase contrast illumination.
ACGIH Carcinogen List.
Ont: Listed in Table 1 of Ontario Regulation 490/09.
(3) - Based on irritation effects. Adjustment to compensate for unusual work schedules is not required.
Biosoluble glass mineral wool - see section 3

Exposure controls

Appropriate engineering controls

Maintain sufficient mechanical or natural ventilation to assure fiber concentrations remain below occupational exposure limits. Use local exhaust if necessary. Power equipment should be equipped with properly designed dust collection devices.

Eye/face protection

Use glasses or goggles when working with mineral wool insulation above shoulder height or in dusty environments.

Other skin and body protection

Minimize direct contact with skin in order to prevent mechanical itching.

Hygiene measures

After contact with the product, rinse skin in cold water to reduce potential effects of mechanical itching.

Respiratory protection

In dusty environments, use suitable respiratory protection.

Thermal hazards

Not relevant.
Glass Mineral Wool Insulation (Brown)

* Heat-Up Precautions: When heated to temperatures above 200°C (400°F) for the first time, release of binder components and binder decomposition products can occur which, in high concentrations, may irritate eyes and the respiratory system. The duration of release is dependant upon the thickness of the insulation, binder content and the temperature applied. Adequate ventilation should be provided. In confined spaces or where ventilation is not possible, occupants should wear appropriate self-contained breathing apparatus.

10. Stability and reactivity

Reactivity                                      | None.                                    |
Glass Mineral Wool Insulation (Brown)

Stability
Binder will decompose above 400°F

Possibility of hazardous reactions
None.

Conditions to avoid
Heating above 400°F

Materials to avoid
Hydrofluoric acid will react with and dissolve glass.

Hazardous decomposition products
None in normal conditions of use. When heated to temperatures above 200°C (400°F) for the first time, release of binder components and binder decomposition products can occur which, in high concentrations, may irritate eyes and the respiratory system. The duration of release is dependant upon the thickness of the insulation, binder content and the temperature applied. Adequate ventilation should be provided. In confined spaces or where ventilation is not possible, occupants should wear appropriate self-contained breathing apparatus.

11. Toxicological information

Information on toxicological effects

Acute toxicity - oral
Notes (oral LD₅₀)
No data were identified for the product as a whole. Data are for constituents:
Biosoluble glass mineral wool - Not applicable.
Thermo set, inert polymer bonding agent derived from plant starches - Not applicable.

Acute toxicity - dermal
Notes (dermal LD₅₀)
No data were identified for the product as a whole. Data are for constituents:
Biosoluble glass mineral wool - Not applicable.
Thermo set, inert polymer bonding agent derived from plant starches - Not applicable.

Acute toxicity - inhalation
Notes (inhalation LC₅₀)
No data were identified for the product as a whole. Data are for constituents:
Biosoluble glass mineral wool - Not applicable.
Thermo set, inert polymer bonding agent derived from plant starches - Not applicable.

Skin corrosion/irritation
May cause mechanical irritation to skin.

Serious eye damage/irritation
May cause mechanical irritation to eyes.

Respiratory sensitization
No data were identified for this product or its constituents.

Skin sensitization
No data were identified for this product or its constituents.

Germ cell mutagenicity
No data were identified for this product or its constituents.

Genotoxicity - in vitro
No data were identified for this product or its constituents.

Genotoxicity - in vivo
No data were identified for this product or its constituents.

Carcinogenicity
Results from a biopersistence test by intratracheal instillation has shown that fibers in this product longer than 20 μm have a weighted half-life less than 40 days, thus this product is not classified as a carcinogen. None of the components of this product are listed by IARC as known or suspected carcinogens.

Reproductive toxicity
Glass Mineral Wool Insulation (Brown)

Reproductive toxicity - fertility  No data available for this product or its constituents.
Reproductive toxicity - development  No data available for this product or its constituents.

Specific target organ toxicity - single exposure
STOT - single exposure  No data were identified for this product or its constituents.

Specific target organ toxicity - repeated exposure
STOT - repeated exposure  No data were identified for this product or its constituents.

Aspiration hazard  Not relevant.

Inhalation  Mechanical irritation to upper respiratory tract.
Ingestion  Non-hazardous when ingested.
Skin contact  Mechanical irritation to skin.
Eye contact  Mechanical irritation to eyes.
Medical symptoms  Contact with skin, eyes and upper respiratory system may cause mechanical irritation. Biosoluble glass mineral wool is classified as a nuisance dust.

12. Ecological information

Toxicity  This product is not ecotoxic to air, water or soil, by composition.
Persistence and degradability  Inert inorganic product with Thermo set, inert polymer bonding agent derived from plant starches; 0 - 13%
Bioaccumulative potential  Will not bioaccumulate.
Partition coefficient  Not relevant.
Mobility in soil  Not considered mobile. Less than 1% leachable organic carbon if landfilled.
Other adverse effects  None known.

13. Disposal considerations

Waste treatment methods
General information  Dispose of in accordance with all applicable regulations. Empty containers should be taken to an approved waste handling site for recycling or disposal.
Disposal methods  This product is not regulated under RCRA Hazardous Waste Regulations. May be disposed in landfill. If unsure, contact your local public health department or the local landfill regulators.

14. Transport information

General  The product is not covered by international regulations on the transport of dangerous goods (IMDG, IATA, TDG).
UN number
Glass Mineral Wool Insulation (Brown)

UN No. (International) Not applicable.

UN proper shipping name
Proper shipping name (International) Not applicable.

Transport hazard class(es)
Transport Labels (International) No transport warning sign required.

Packing group
Packing group (International) Not applicable.

Environmental hazards
Environmentally hazardous substance/marine pollutant No.

Special precautions for user
Not applicable.

Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code Not applicable.

15. Regulatory information

Regulatory Status Not classified according to WHMIS
In accordance with industry practice, Manson Insulation has decided to continue to provide its customers with the appropriate information for the purpose of assuring safe handling and use of mineral wool throughout the product life.

Inventories
Canada – DSL/NDSL All the ingredients are listed or exempt.
CEPA - Priority Substances List All the ingredients are listed or exempt.
National Pollutant Release Inventory All the ingredients are listed or exempt.

16. Other information

Abbreviations and acronyms used in the safety data sheet
CAS: Chemical Abstracts Service.
CEPA: Canadian Environmental Protection Act.
DSL: Domestic Substances List.
IARC: International Agency for Research on Cancer.
IATA: International Air Transport Association.
IMDG: International Maritime Dangerous Goods.
NDSL: Non-Domestic Substances List.
PBT: Persistent, Bioaccumulative and Toxic substance.
vPvB: Very Persistent and Very Bioaccumulative.
Glass Mineral Wool Insulation (Brown)

**General information**
All products manufactured by Manson Insulation are made of non-classified fibers and are certified by EUCEB. Products meeting EUCEB certification requirements can be recognised by the EUCEB logo printed on the packaging.

**Revision**
2.2

**SDS number**
4616

**Other information**
In 2001, the International Agency for Research on Cancer (IARC) reclassified glass mineral wool fibres from Group 2B (possibly carcinogenic) to Group 3 «agent which cannot be classified as for their carcinogenicity to humans». (See Monograph Vol 81, http://monographs.iarc.fr/)

This Safety Data Sheet / Product Data Sheet does not constitute a workplace assessment. Information contained in this document represents the state of our knowledge regarding this product as of the date of issue of the document. Attention of users is drawn to possible risks taken when the product is used for other applications than the ones it has been designed for.
