

Change to USB charging pad

TABLE.T technical pedestal

### **Changeover / scheduling**

Delivery: from Week 40 / 2019

As the original supplier has ceased trading, we have had to replace the charging pad for the technical pedestal (width 1,400 mm / 1,800 mm) including option LAF2 with an alternative brand similar in function and looks. Since this model has different dimensions, the cut-out in the veneer / glass top inevitably has to be changed as well.

#### **Change:**

OLD:

The charging pad with connection points for 2 x USB charger and 1 x data transfer cable is no longer available. **Option LAF2**

NEW:

There is a choice of two alternatives from the Bachmann PIX range instead:

A. USB double charger with charging function only, incl. 1000 mm connecting cable. **Option LAF3**

B. Custom module for data transfer and/or charging function with 2 x USB 3.0 A/A, 1:1, front USB socket A, rear USB socket A. **Option LAF4**

Note, not included: The customer would have to provide their own 1000 mm USB A/A, male-male cable for data transfer. A mains power supply and a USB A/A, male-male cable are required to use the charging function.

## Product information No. 6/2019
