

Changes to ACTIVE.T

Position of top cut-outs

Re-engineering / discontinuation

Delivery in Week 44 / 2020

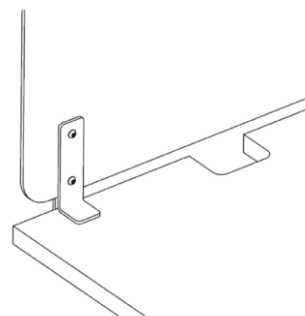

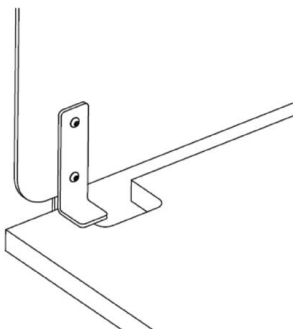

The position of the ACTIVE.T top cut-outs has undergone a structural design modification. Clamp adaptors for hygiene screens could not be fitted to the top before, as they fouled the cut-out.

Changes:

- The position of the cut-out has been shifted from 120 mm centre distance to 305 mm from the outside edge towards the centre of the table.

ACTIVE.T up to & incl. week 43 / 2020

ACTIVE.T from KW 44 / 2020

It will still be possible to attach fly-by screens or modesty panels using clamp adaptors.

This change is effective from week 44.
