Glides
for carpets or hard floors

FABRICS AND EXAMPLES OF COMBINATIONS

Create a more welcoming atmosphere with cosy, tactile fabrics.
Discover how we combine a wide range of colours with sustainability. Our high-quality fabric collection offers you a wealth of design options for adding splashes of colour to your office environment. The strong self-adhesive properties of each fabric ensure a secure hold and effectively prevent slipping.
We welcome fabric combinations!

Zip	A visible element running around the centre, single-colour top cushion with concealed zip, concealed
Seat height with base unit	1 cushion: 260 mm 2 cushions: 460 mm

1 | SIMPLE CONCATENATION

The base elements are securely connected to one another by the linking element. This creates a stable unit that can also be easily reconfigured if necessary.

1

2 | DESIGN FREEDOM

Cushions can be used directly on the floor without a base unit and can be combined in a variety of ways.

3 | BASIC ELEMENT

Base units are available in two sizes. Glides can be fitted on either side of the base panel, allowing it to be rotated and used in a new orientation. Upholstery brackets are available in textured black, textured white, aluminium, metallic anthracite, yellow gold, quartz green, ant red and muted turquoise.

4 | THE ZIP AS A DESIGN FEATURE

The zip can be used to combine two different fabrics or to add a splash of colour between the cushions. This makes it possible to change the cover.
