

Product information No. 2/2025

Product optimisation: TALO.YOU
gas lift tables

Scheduling:

OFML selection from May 2025

Product benefits

As part of the continuous improvement process, we aim to offer user-oriented solutions that reflect the latest developments in technology. The following benefits are associated with a new gas lift concept:

1. Gas lift tables are available with improved characteristics in terms of smooth operation and feature an extended range of dimensions. With column cross-section 70 x 70 mm, the column can be combined with all TALO. YOU cantilever feet.
2. These tables can be offered with a much more attractive price-performance ratio thanks to their intelligent design.
3. It reflects the requirements of the circular economy and allows replacement of individual columns and components.

Product specifications:

- + Column cross-section: 70 x 70 mm, can be combined with all TALO.YOU cantilever feet
- + Height adjustment: 680 - 1180 mm, lift 500 mm
- + Payload selection: 20 kg or 40 kg \pm 10 kg
- + Components: individual columns in left and right versions, separate synchroniser rod
- + Operation: ergonomic release catch with Bowden cable
- + Gas compression spring: specifications depend on desk size and payload selection
- + Gas spring replacement: weight-dependent gas spring – or alternatively the complete column – can be replaced/retrofitted

- + Sustainability: 90% of all components are from Germany, manufactured in Karben
- + Frame colours: aluminium coloured (AL), pure white (WI), black (KS), anthracite metallic (AM)
- + Ordering in pCON / OFML: TALO.YOU option HV62

Changes

- + TALO. S gas lift tables 20 kg/40 kg (HV20/HV21) are being replaced with an optimised desk design, and there is a new supplier for TALO.YOU components.
- + The TALO.S lift table variant with weight adjustment 50 kg (HV27) has been discontinued due to low demand.
- + TALO.YOU gas lift tables as nesting and meeting tables with column cross-section 70x70 mm (HV54) have been discontinued due to low demand.

TALO.YOU gas lift tables with valve or individually rechargeable gas spring (HV55) and height adjustment 650-1250 mm remain in the range and are not affected by the design changes.

In the future, the gas lift table portfolio will focus on our successful TALO.YOU desking range. TALO.S gas lift tables are thereby replaced and after a phase-out period will no longer be available for selection in the OFML data. Cantilever feet in TALO.S design are available on request for lift tables in the TALO.YOU range.

The OFML data, as well as all product-related documents, will be adjusted accordingly.

Product Management April 2025
