

LAMIGA

AN EMBRACE
FOR YOUR *BACK*

Seating ergonomics, taken one stage further

The idea: a chair that exceeds current ergonomic requirements and provides well-being in a completely new way. The implementation: LAMIGA by ITO® DESIGN with a flexible backrest which adapts to every movement of the user's back and can be adjusted via the ERGO-DISC to suit the individual user. In this way, the user's back is embraced and the neck supported. And the ERGO-DISC is a striking design touch marking the i-Punkt for ergonomic sitting.

THE BENEFITS OF LAMIGA

- 1 The flexible backrest supports the body during lateral rotation. The backrest can be adjusted to the sitter's weight using the integral Ergo-Disc to ensure individual comfort.
- 2 The flexible front edges of the seat (left and right) drop slightly when pressure is applied, which allows blood to circulate freely in the legs.
- 3 The optional lumbar support is adjustable in height and depth to take the strain off the lower back.
- 4 There is a quick-set control for convenient weight adjustment.
- 5 Ergonomic comfort for people weighing up to 150 kg.

»The first step towards a better working culture is the choice of the correct furniture.«

HEALTHY SITTING IS ALL A MATTER *OF ADJUSTMENT*

THE WEIGHT ADJUSTMENT IS MADE REALLY QUICKLY: 3 TURNS FROM 45 - 150 KG. THE CONTROLS FOR SEAT ADJUSTMENT ARE EASY TO USE, THANKS TO THEIR SENSIBLE POSITIONS. AND THE NECK SUPPORT ADJUSTS IN NO TIME IN HEIGHT, DEPTH AND TILT SO THAT THE HEAD IS ALWAYS WELL-SUPPORTED.

MORE FLEXIBILITY, SUPPORT *AND* *FREEDOM OF* *MOVEMENT*

▼
THE FLEXIBLE BACKREST
supports the body during lateral rotation.

LAMIGA'S SPECIAL ERGONOMIC DESIGN ALSO ALLOWS FOR LATERAL ROTATION OF THE USER'S BACK. EVEN WITH THESE MOVEMENTS, THE BACKREST GIVES SUPPORT IN EVERY POSITION, BECAUSE IT IS SO FLEXIBLE. THE DEGREE OF THIS FLEXIBILITY CAN BE ADJUSTED TO SUIT THE USER'S BODY WEIGHT – AN INNOVATION PERFECTLY IMPLEMENTED WITH THE ERGO-DISC.
