

The new ACTA.PRO shelving system

# FLEXIBLE ROOMS FOR FLEXIBLE WORKING

With ACTA.PRO, we are setting new standards in terms of design, flexibility and individualization.

Through the harmonious combination of room zoning and storage space, we create a homely atmosphere to offer you not just a product, rather a lifelong and sustainable solution.

Our company has been awarded:

[www.blauer-engel.de/uz38](http://www.blauer-engel.de/uz38)

## INTELLIGENT MODULAR SYSTEM

The modularity of the shelving system enables customized solutions for any working environment.

## FREEDOM OF DESIGN AND PLANNING

The different carcass depths and variable heights from 1 OH to 6 OH mean that every corner of the room can be optimally utilized.

## NUMEROUS APPLICATION AREAS

Whether sliding front made of recycled PET fleece for pinning or acoustic shielding, or as a whiteboard for workshops and agile working situations - the system knows no limits.

## FOR THE FUTURE

We rely on durable materials and use recycled PET fleece. Separation by type means that all components can be returned to the material cycle.

## SIMPLE REDESIGN

Our patent-pending click system for ladders and rungs makes assembly and disassembly very easy.

## FLEXIBLE ROOM ZONING

The double-sided usability allows a new definition of room zoning for dynamic and agile working environments.

## INSPIRING DESIGN DIVERSITY

The variety of different cabinet elements, movable acoustic elements, plant elements, seat cushions, textile surfaces and new frame and surface colors open up limitless design possibilities.

## MADE IN GERMANY

Our shelving system is completely made by us - therefore made in Germany - and is certified by the Blue Angel.
