
**Flexible and
functional screen
system** with a
contemporary design.

INSIDE.
25 | 60 | 80

Elegant, functional, versatile. The INSIDE range features three systems that complement each other in thicknesses of 80, 60 and 25 mm with a uniform appearance. With this system, offices of any size can be arranged individually to facilitate an efficient and enjoyable working environment throughout.

In theory: a screen system that adapts to any situation and offers additional functions. In practice: the INSIDE series offers everything you need to structure office spaces efficiently and aesthetically – from the screen and modules with acoustic properties to the fly-by panel. Matching organiser elements can be integrated easily as well. So that you can furnish your open space from a single source.

Designing your open space perfectly. With its elegant, light-weight looks it can easily be connected with workstation and storage systems: office areas can be furnished both functionally and efficiently with INSIDE.25. The elements are just 25 mm thick, making them simple to set up – and the room structure can easily be adapted to suit new requirements at any time.

Chairs: OKAY.II product family page 4-12

Open space with privacy. Thanks to the fabric-covered acoustic screens, intrusive noises and conversations from adjacent workstations are kept out. The acoustics of the room as a whole are improved too. As a result, it is possible to concentrate on your work, and at the same time the floor space is utilised to its full potential. An especially practical feature is that all elements are available with pinnable infill panels.

Desks: DO IT.4 product family, page 6-9

One look, many functions. That makes it easy to keep track of what's on your desk: organiser rails can be integrated into both sides of a screen or panel: there are a variety of hook-in/hook-over organiser elements and shelves available for these. Equipment such as copiers, printers and fax can be visually and acoustically screened off with a technology enclosure – which also means they integrate perfectly into the room design.

Organisation is everything. Everyone has their own way of arranging their desk – and can put this into practice perfectly with INSIDE.25.

1 | Variable: the height-adjustable fly-by panel can be adjusted to suit the employee's height.

2 | Universal: desk-mounted screens help you organise your personal desk space.

3 | Flexible: the mobile TFT monitor holder on the organiser rail.

4 | Straightforward: the desk-mounted screens can also be fitted with clamp adapters.

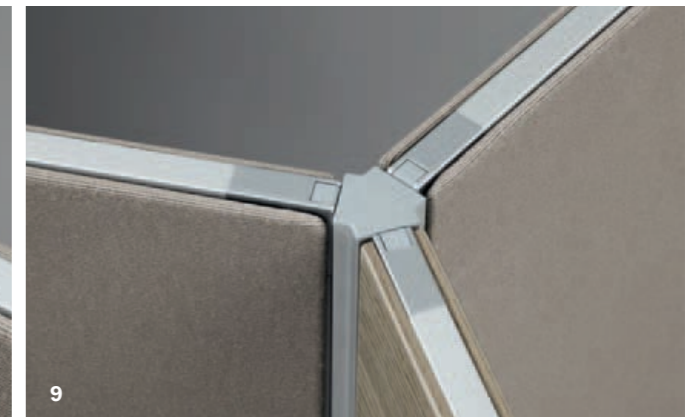

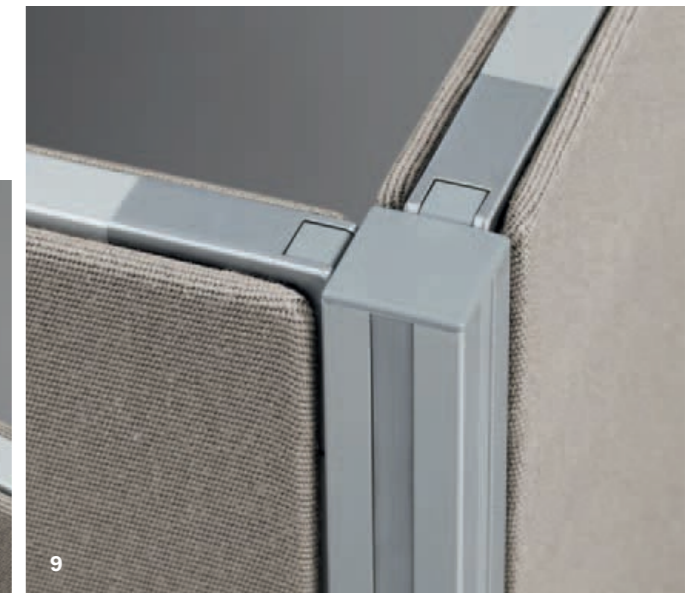

5 | Informative: panels are available with pinnable panels (not in conjunction with organiser rail).

Beautifully practical. A wide range of organiser elements and extras make the workstation functional and add a personal touch.

Creating the best connections simply.

The modules are quick and easy to assemble.

6 | Elegant: a combination of glass, melamine and fabric finishes can be selected for screens.

7 | Harmonious: different heights can be connected with change-of-height elements.

8 | Undercover: the link nodes can be covered with plastic caps.

9 | Discreet: the posts in L, T, X and Y structures can be concealed with a trim as well.

It all adds up: The INSIDE.25 screens look good, are functional and always have a good basis – regardless of their location.

10 | Stylish: frame and organiser rails are available in aluminium or white powder-coated.

11 | Irresistible: screens with pinnable panels (compatible with organiser rails as well).

12 | Muted: all screens with acoustic infill are marked with the “acoustics inside” label.

13 | Straight lines: screens have cantilever feet on one side.

14 | Stable: stand-alone screens are securely supported by cantilever feet on both sides.

15 | Flat: the disc foot can conveniently slide under a cupboard.

16 | Adaptable: the adjustable glides can compensate for uneven floors.

INSIDE.60 grows with your requirements. With its clear-cut, elegant looks the screen system is more than just part of an attractive interior design. Its rapid, tool-free assembly and light-weight, modular construction makes it particularly functional, flexible and economical: the screens, which are available in different heights, can be reconfigured or extended exactly as required without high costs for installation and subsequent use.

Desks: DO IT.4 product family, page 18-25

Always well-connected. INSIDE.60 offers a variety of options for individual workstation wire management. Computers, telephones and other devices can be connected as required, either at skirting board height or at desk height. Electricity can come from individual power supplies or via wire management directly integrated in the screen. As a result it always looks neat and tidy behind the desk.

Chairs: SIGNETA product family page 18-25

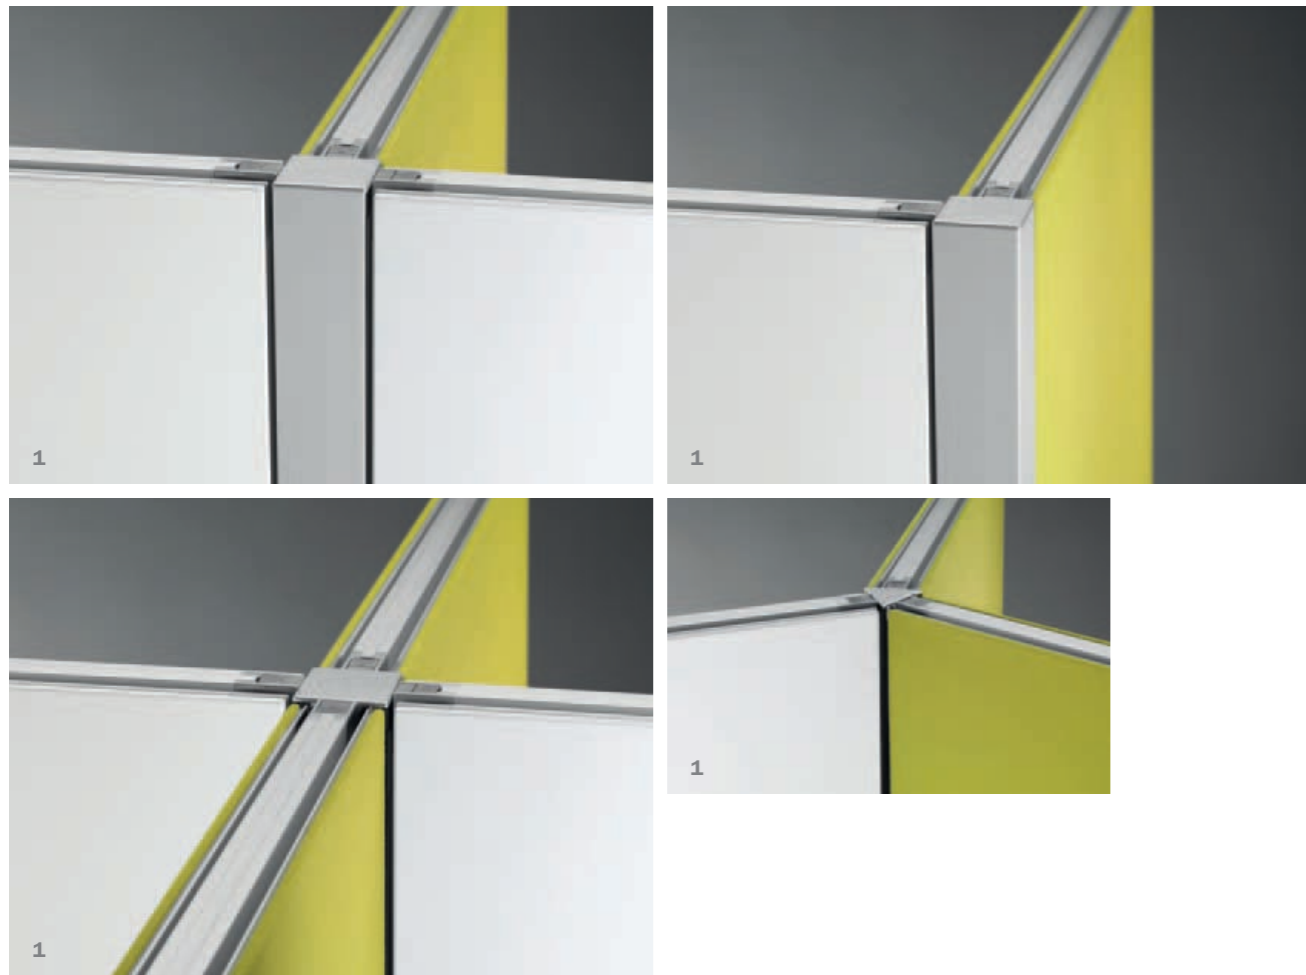

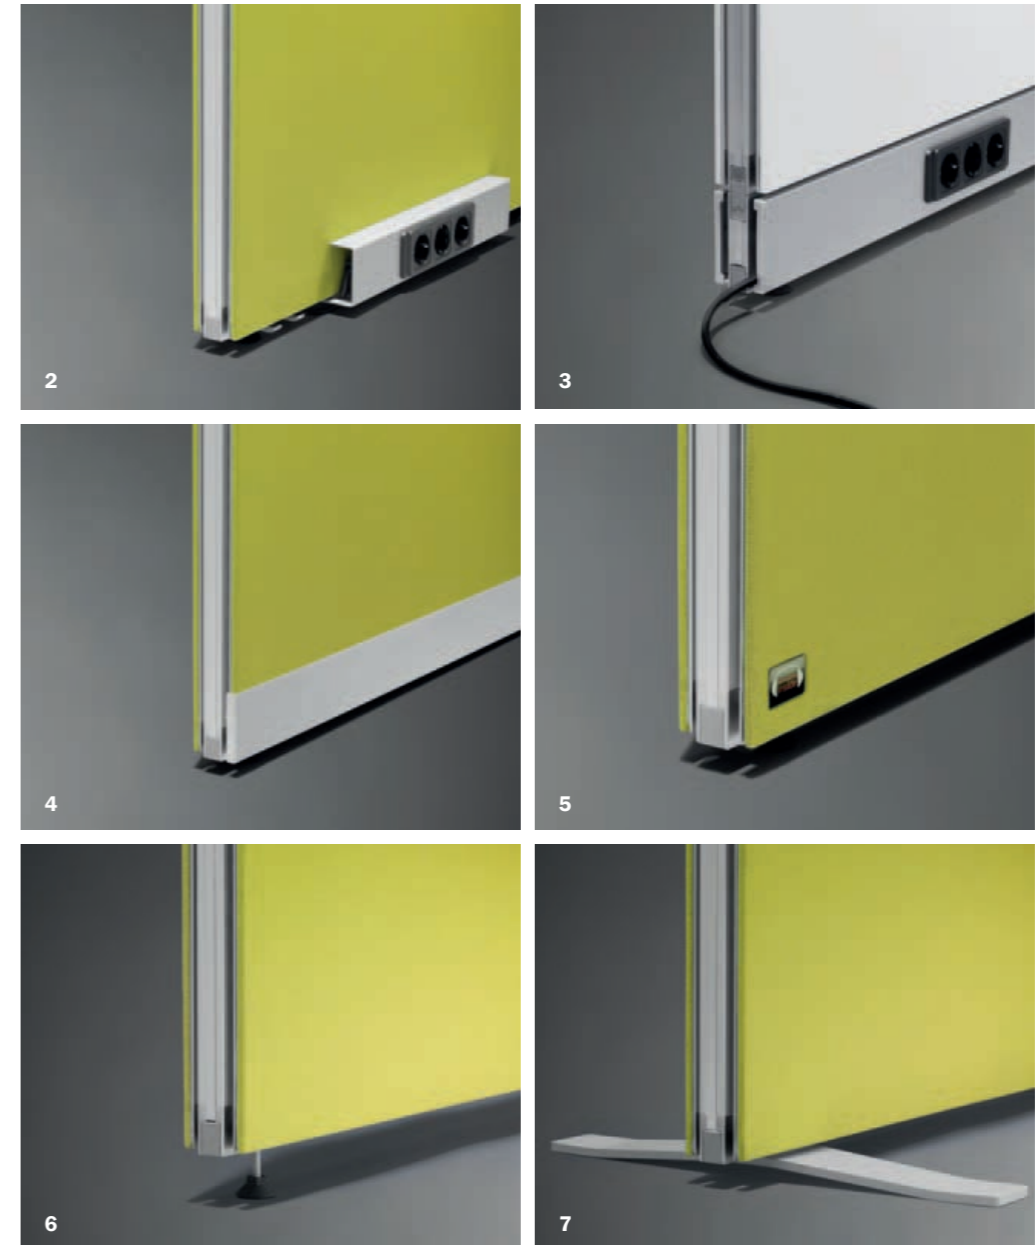

Light, structure, more space. A wide range of material and module variants makes it possible to design the room almost any way you like. The lightweight frameless appearance of INSIDE.60 is stylishly complemented by the coordinating organiser elements: the selection ranges from task lights and magnetic infoboards to shelves. This means that individually-designed workstations fit harmoniously into the overall room structure.

Concentrated working. Even though there's always something going on in the Open Space. With INSIDE.60 you can quickly create individual spaces for people to think in peace away from the hectic noise of the office. The acoustic versions of these elements not only meet extremely high technical standards, but also aesthetic requirements. As a result, everyone enjoys an all-round feeling of well-being at work.

Whatever you're planning: INSIDE.60 is always the right answer. The fact is, it's an intelligent solution from concept to details.

2 | On top: individual clip-on power supplies are available for the electrics.

3 | Powerful: the electrics can also be integrated into the screen.

4 | Clever: the optional privacy screen.

5 | Effective: the "acoustics inside" label represents highly efficient acoustic materials.

6 | Spontaneous: the adjustable glide means that you can compensate for height differences quickly and easily.

7 | Robust: the cantilever feet on both sides ensure stability.

1 | Expandable: the modular system with rapid tool-free assembly in T, L, X and Y configurations.

Design and function in perfect combination. The clear lines are used throughout the system, even for the organiser elements and other extras.

8 | Personal: individual accessories, for instance a magnetic board or flower vase.

9 | Welcoming: slot-in shelves provide display space.

10 | Confident styling: the glass fins as a design feature and the frameless styling create an impression of lightness.

11 | Tidy: there are concealed slots so that the shelf can be positioned to suit individual requirements.

12 | Illuminated: the accessories include matching lamps.

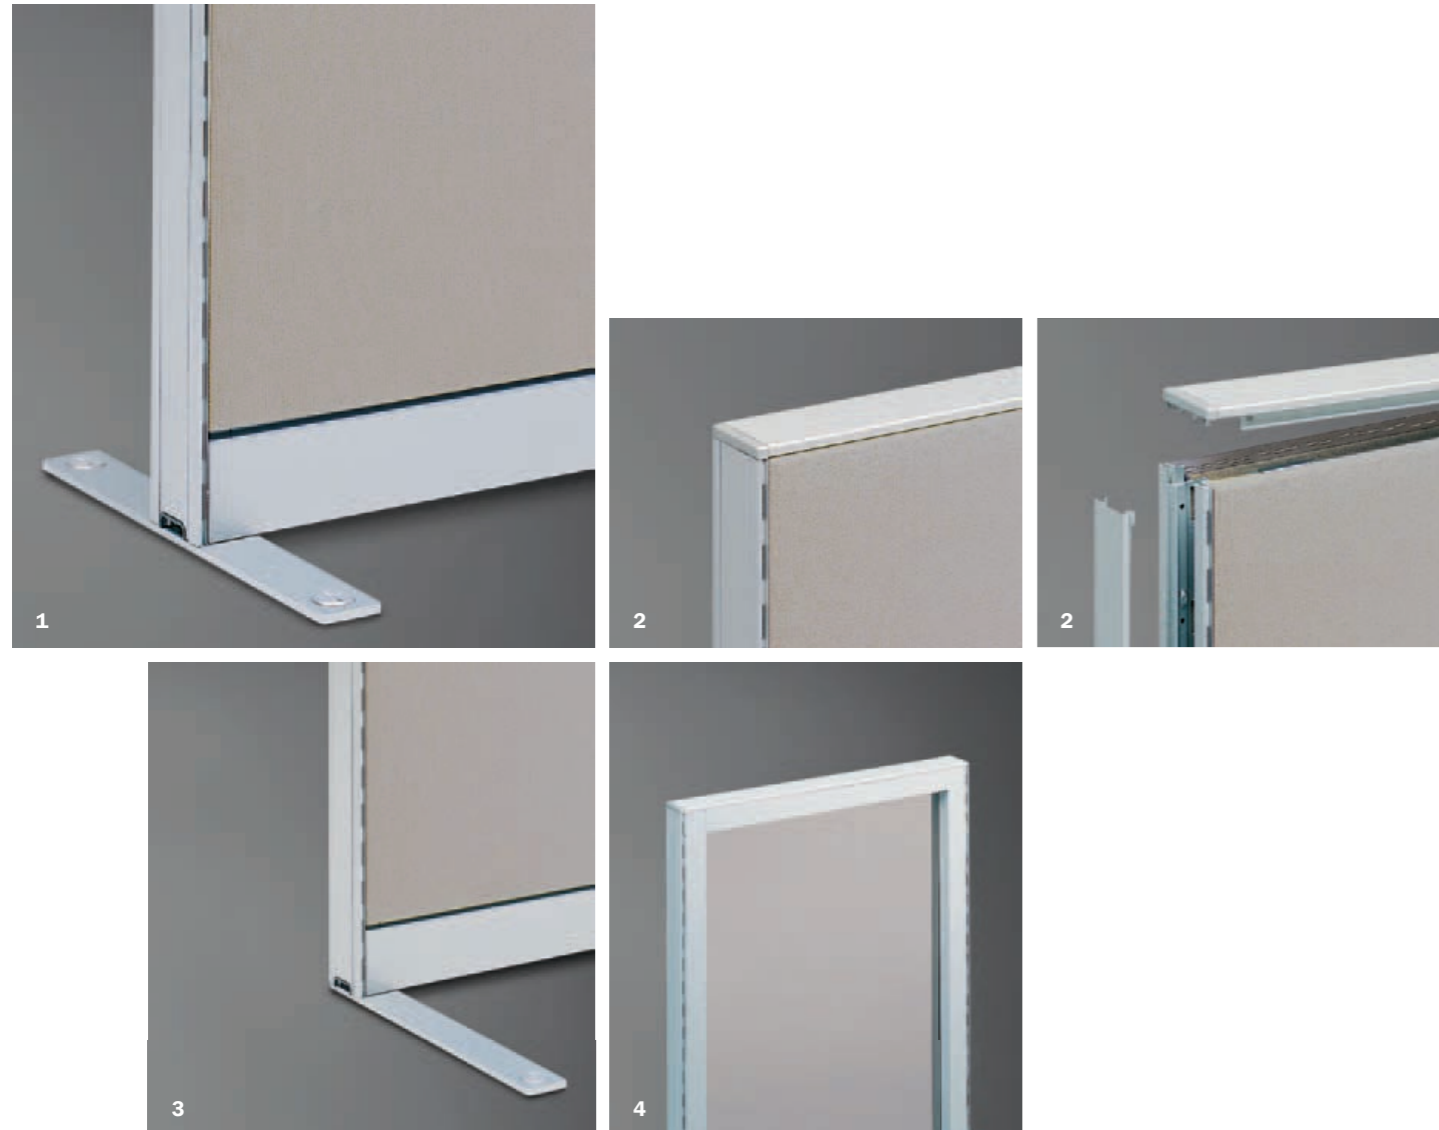

Organised and private. The generously-proportioned cable duct at desk height is concealed behind a lid and blends in harmoniously with the screen design. Electrical equipment can be plugged in at any point, annoying tangles of cable behind the desk are a thing of the past. Another plus point of INSIDE.80: its 80 mm thickness means that the elements are highly acoustically efficient.

Chairs: OKAY.II product family Desks: BASIC.4 product family, page 30-37

Flexibility of the system – carefully thought out to the finest detail and ideal for all requirements.

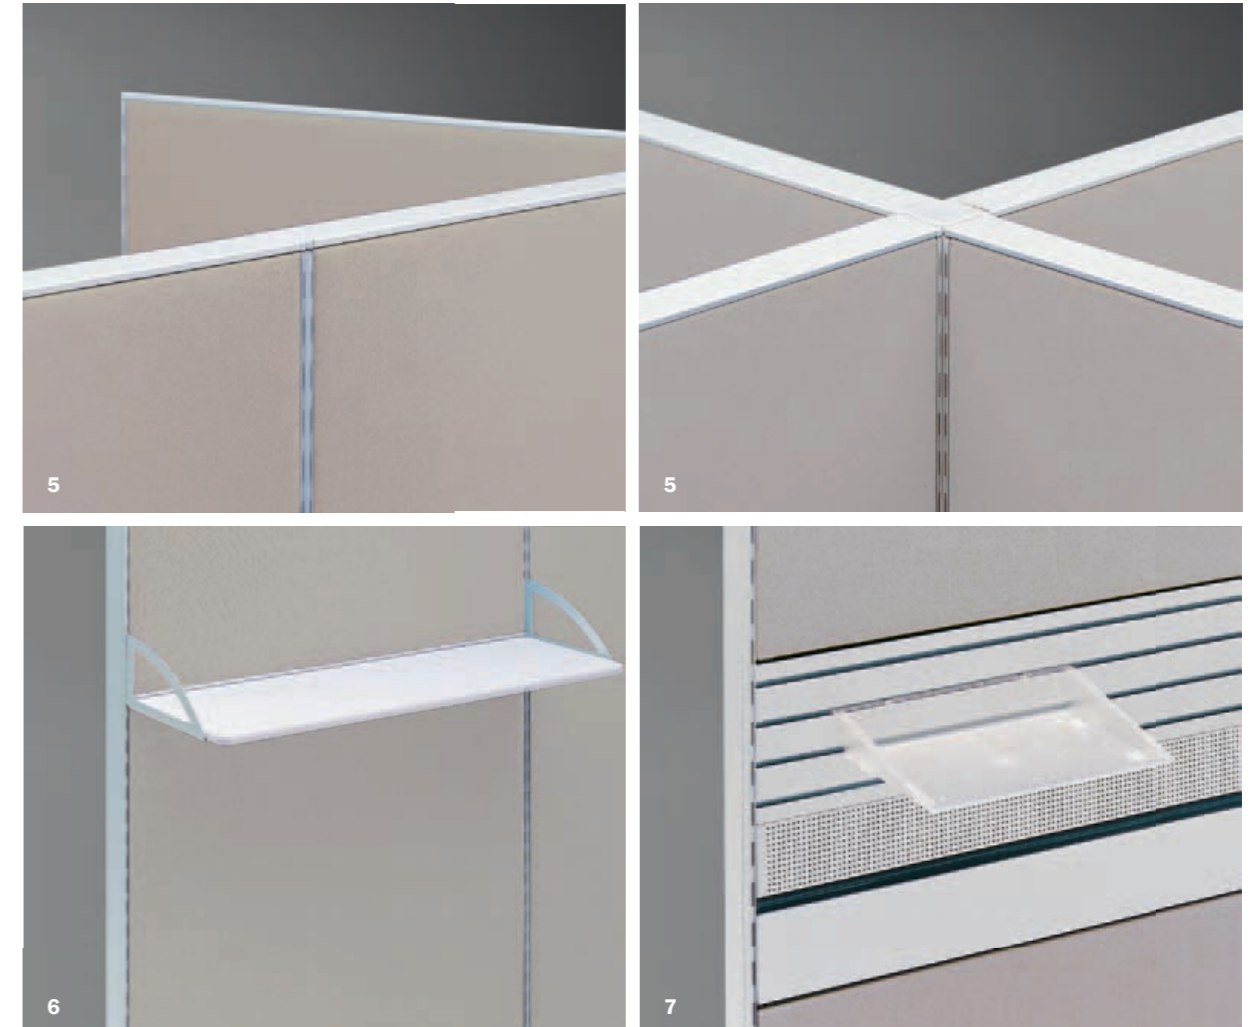

1 | Stable: cantilever feet on both sides to ensure high stability for stand-alone screens.

2 | Covered: the plastic edge trim ensures a neat and attractive finish.

3 | Pure: cantilever feet on one side give the front view an uncluttered look.

4 | Transparent: acrylic glass sections help to create an open atmosphere.

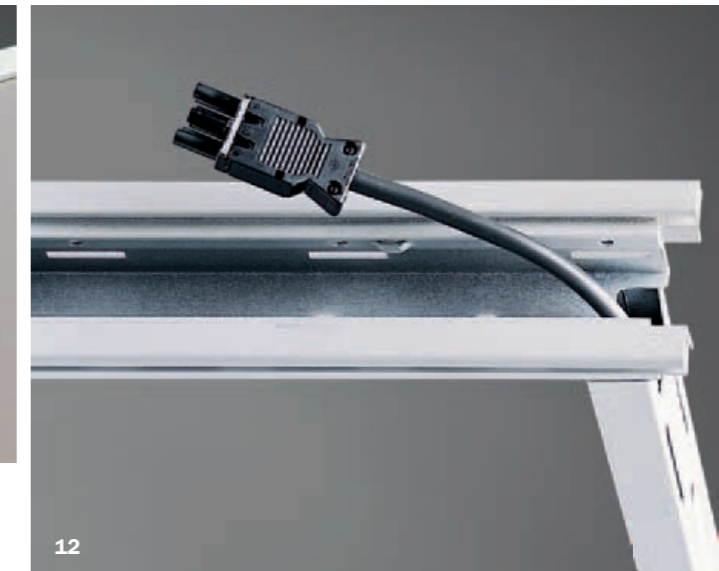

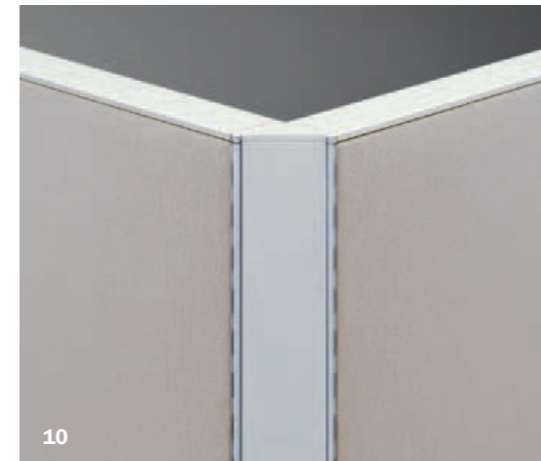

5 | Perfectly formed: there are plastic trims available for every type of connection.

6 | Space-saving: putting things on shelves keeps the workspace free.

7 | Collected: the tray for pins, paper-clips and other small items.

Inner values count, too. There are horizontal and vertical ducts in which the technology and electrics can be effectively concealed.

8 | Practical: the electrics can be integrated at desk height or in the skirting board.

9 | Invisible: you can hardly tell from the trim how much technology there is hidden behind it.

10 | Bundled: vertical cable management provides plenty of room and is cleverly concealed.

11 | Attractive: tidiness behind the desk instead of a tangle of cables.

12 | Useful: equipment can be plugged in exactly where it is required.

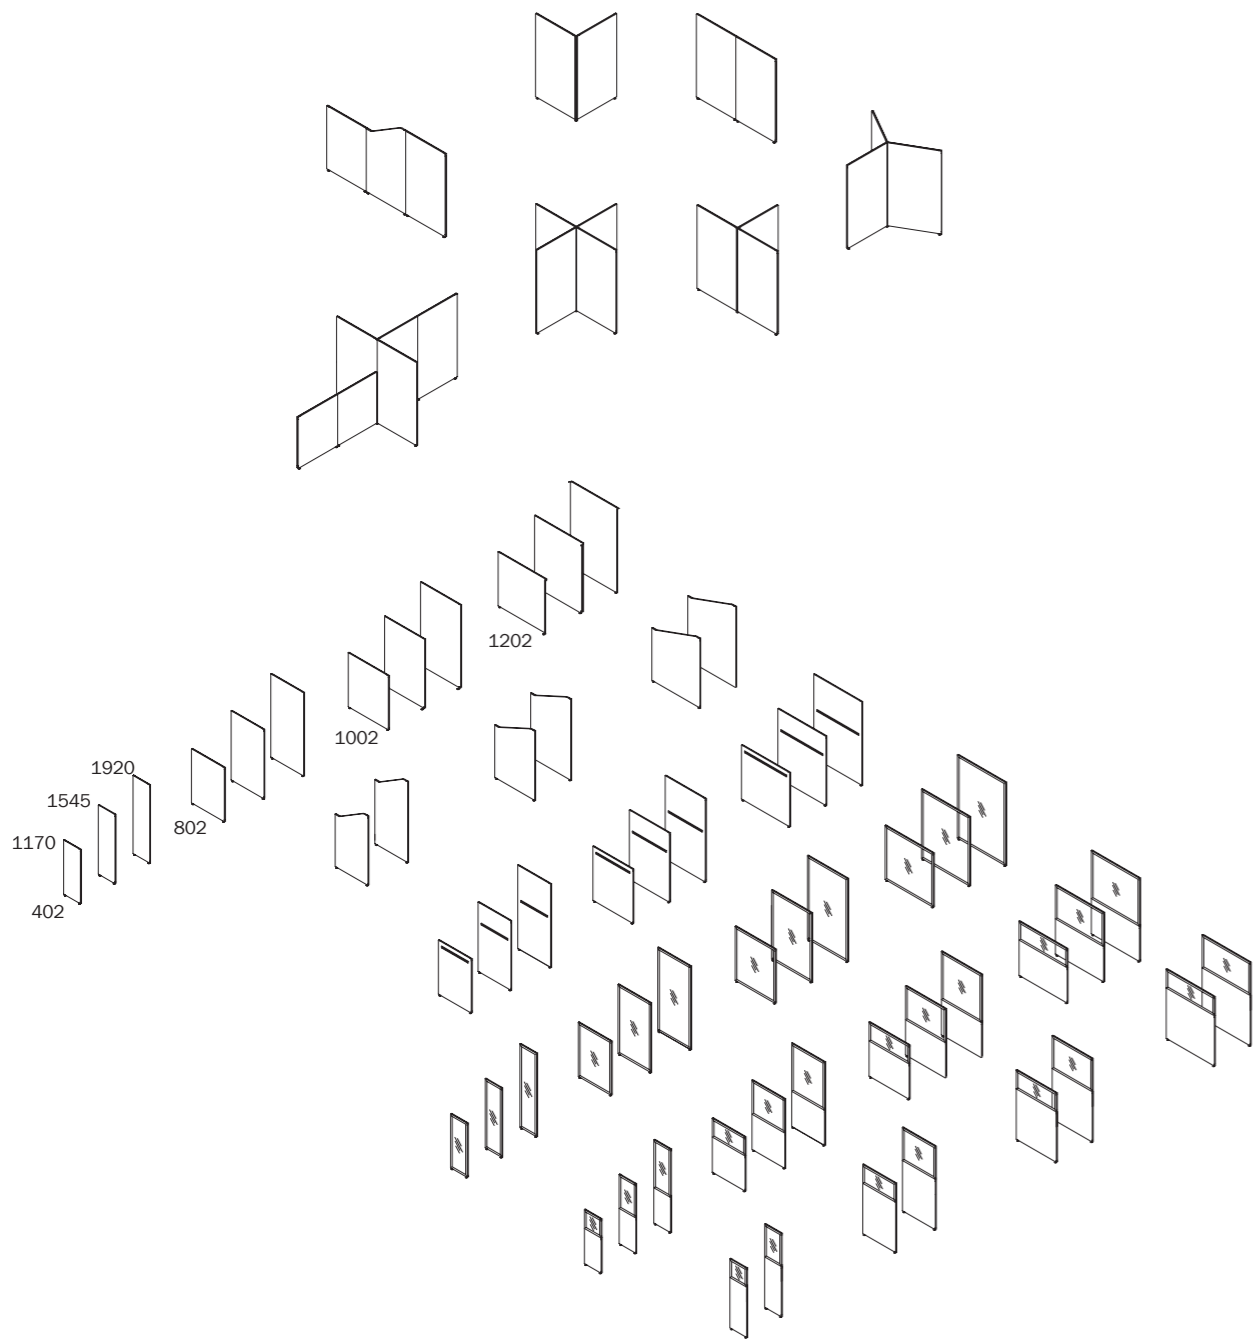

Scope for individuality. With INSIDE.80 you can structure the most diverse working areas to give them generous proportions. Whether you need an individual workstation or a team office – the system provides the right solution for every requirement. It can be used to create a communicative yet intimate atmosphere. One example is the curved glass screen, which gives an impression of openness, while shielding from intrusive noises.

Product overview

Acoustic efficiency

INSIDE.25

Design principle	
	frameless
	pipable fabric fits into frame slot
Assembly	
	Allen key/slot nut
Dimensions	
Thickness of system elements	25 mm
Heights	1,170 mm, 1,545 mm, 1,920 mm
Widths	402 mm, 802 mm, 1,002 mm, 1,202 mm
Finishes/panel materials	
Melamine	●
Fabric	●
Pinnable fabric	●
Acoustic fabric	●
Pinnable acoustic fabric	●
Acrylic	●
Element variants	
Single-piece elements	in all heights and widths
Split elements (bottom/top)	acrylic/fabric, acrylic/melamine
Change-of-height elements	●
Curved elements	○
Linking	
Linear	via slot nuts
L, T, X configuration 90°; Y configuration 120°	via corner posts and slot nuts
Linking with desk screen	●
Linking with screens of varying heights	via aluminium corner posts
Wire management	
Horizontal	○
Vertical	○
Organisation	
Fixed height	organiser rail slots into groove, one or both sides
Variable height	metal elements hook over top edge of element
Organiser elements	
	translucent plastic
	metal
Position of adjustable foot/cantilever foot	
	fixed, outside
Accessories	
Privacy screen	○

INSIDE.60

Design principle	
	aluminium frame profile with slots for organiser accessories
	pipable fabric fits into frame slot
Assembly	
	tool-free; adjustment with Allen key if required
Dimensions	
Thickness of system elements	60 mm
Heights	822 mm, 1,100 mm, 1,482 mm, 1,600 mm, 1,832 mm
Widths	402 mm, 802 mm, 1,002 mm, 1,202 mm, 1,602 mm
Finishes/panel materials	
Melamine	●
