

Product information No. 6/2022

Pull-out sidefilers ACTA.PLUS

Product optimisation

Scheduling:

Available to order from
01.06.2022

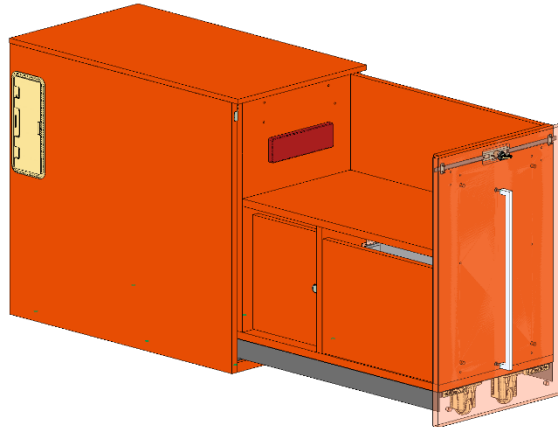

Delivery from August / Week 31

The current runner system is no longer available from our supplier. For this reason we are switching to new runners for our pull-out sidefilers. We have had to redesign the internal structure to accommodate this change. We have taken this opportunity to optimise the variant selection.

Changes:

- In future, the cupboard will be supplied with a new runner system. There is a slight change to the drawer depth, but the external dimensions will remain as before.
- This top panel can be specified as an option and retrofitted.
- The Type 3 cabinet with wardrobe outfitting is no longer available due to lack of demand.
- The 1.5 x A4 telescopic filing frame option is no longer available. The suspension file drawer can still be included by selecting the hanging file drawer option.
- The charging point and double organiser rail have been discontinued. Instead there is a 3-gang socket on the back of the inner carcass. It is at the height of the top filing level and facilitates an integrated wiring solution that can be tailored to requirements. The 3-gang socket can also be combined with a safe etc.
- A variant without a lock in the drawer front is a new addition to the programme.
- The cable pass-through inserts are available in black and white as well as aluminium coloured.
- The inner carcass can be dismantled without tools.

Sample sidefiler configuration with 1.5 filing levels and pre-fitted 3-gang socket

Ordering:

After the changeover, the pull-out sidefilers can only be ordered using the new article numbers. Older versions will not be available in future.

Prices:

Prices remain unchanged. This design optimisation allows us to waive the material surcharge that was scheduled for 01.07.2022.
