

WALL DESIGN

with *volatiles* lighting modules

# SPACE AND LIGHT TO PROMOTE WELLBEING

# GLASS MOSAICS LIKE YOU'VE NEVER SEEN BEFORE

## ROOM DESIGN

You can integrate the *volatiles* lighting modules into your space concept whichever style collection you have: VISION, PURE, TIMELESS or FLOW

# ROOM ARCHITECTURE MEETS LIGHT DESIGN

The foyer is the company's business card. We are working with our network partners to design representative spaces that use design-conscious furniture and lighting to convey a specific work culture.

The result is an atmosphere in which both visitors and employees feel comfortable. **In our transparent THINK.TANK we combine room architecture with *volatiles* lighting modules.** Illuminated glass mosaic tiles with innovative LED technology provide a fascinating light experience. Touch the mosaic wall gently (touch-sensitive) to create a succession of unique light displays or a geometric pattern that reflects the mood and work scenario. You can also integrate your company log Invigorating red, relaxing green, shades of blue for concentration, sophisticated grey tones or warm beige – a choice of seven colours to bring out your creative spirit.

Sample arrangement of modules.

## INTUITIVE OPERATION

The interactive lighting system is simple to operate. The *volatiles* light modules are controlled **via an app (iOS or Android)**, which uses wifi to connect to the wall. You can adapt the lighting to suit your personal mood and work situation – adjust the brightness, colour temperature or speed or the different lightscares. The energy-saving LED modules last a long time even when used on a daily basis thanks to innovative technology.
