

## Product information No. 1/2025

---

Product optimisation: ACTIVE.T

Integrated collision protection

### Scheduling:

from Week 16 / 2025

### Change

At the point of changeover, ACTIVE. T will be supplied with a new controller for the motorised column. The controller has been optimised by the supplier and now includes integrated enhanced collision protection as standard. The factory-installed sensor used previously will no longer be fitted. The new motor controller is bolted directly to the desktop from below.

All ACTIVE.T desks have the new controller installed. Desks that were previously supplied without enhanced collision protection now offer the best possible safety standard at no extra cost.

OLD	NEW
<b>ACTIVE.T campaign article (ASAP, SE, SE7)</b> Supplied without collision protection	<b>ACTIVE.T campaign article (ASAP, SE, SE7)</b> Supplied with integrated collision protection at no extra cost
<b>ACTIVE.T range</b> Optional collision protection available for a surcharge, €33	<b>ACTIVE.T range</b> Collision protection is not optional, supplied with integrated collision protection as standard, at no extra cost
<b>Project-specific articles</b> By individual agreement	<b>Project-specific items</b> By individual agreement

For after-sales parts requirements, the two available items will be available to order on an ongoing basis.

OTSTBOXV3HV33 Control box 640-1250 mm from 07.2020;

OTSTBOXV3HV56 Control box 640-1300 mm from 07.2020

The new controller will be delivered at the point of changeover.

The controller is fully backwards compatible and can be used instead of the previous controller. The factory-installed collision protection supplied previously will no longer be required when the replacement is carried out.

The OFML data, campaign-related documents and flyers, as well as all product-related documents, will be adjusted accordingly.
