## Experience the modularity, flexibility and planning on an 800 mm grid

The optimum size for universal system furnishing solutions is based on the 800 mm grid scale of the architecture. Floor space can be used effectively if the furniture is designed to this principle. Its modular structure means that components can be added and replaced in a flash. The resulting combinations are solutions that work well at an emotional level. Personalised working areas can be created afresh time after time in this way.

*The consistent 800 mm grid module defines all  
the furniture in the NET.WORK.PLACE range.*
