

LIFE.S motorised desks 680-1180 mm

Discontinuation of single telescopic column and replacement with double telescopic column

### **Changeover/ scheduling:**

Depending on stock availability June 2021

### **Change:**

In future the desk with adjustment range 680 - 1180 mm (Option HV22) will no longer be supplied with a single telescopic column, instead it will only be available with a double telescopic column. The main purpose of this optimisation is to improve stability and column rigidity.

Prices for Option HV22 and the other height adjustment ranges remain unchanged.

The single telescopic column will only be installed while stocks last.

### **Discontinuation:**

On the same subject, we have already informed you that LIFE.S motorised desks are likely to be discontinued by the end of 2021. We can already offer you an alternative with the launch of our TALO.YOU desk system, which now comes in a round tube variant.
