

Product information No. 3 / 2026

Product Optimization: Table panel fabric cover with acoustic properties

Scheduling:

OFML data update

From April 2026

1. The Acoustic table panels with fabric covers (option AKS) have been structurally optimised. The optimisation applies to assembly panels, centre panels and fly-by panels.
The design has been revamped with an MDF frame construction with acoustic filling and fleece covering. In addition, the panel frame is now manufactured in-house. The acoustic filling and previous acoustic values remain unchanged. This optimisation now comes with a significant price advantage without compromising on quality.
2. The fly-by panel range is being expanded by adding the new height of 600 mm. The current height of 805 mm will be revised to 800 mm
3. For differentiation purposes, panels with fabric covers have been assigned new item numbers: Assembly panel: PNESBV1H25W, Fly-by panel: PNESBFV1H25W, Centre panel: PNESBMVH25W
4. The prices for fabric cover panels without acoustic properties remain unchanged.

VK list prices B 1600 mm Old version with acoustics	VK-list.prices B 1600 mm Optimised design with acoustics	difference
construction panel: 691,- €	construction panel: 492, - €	- 199,- €
Fly-by panel: 1.129, - €	Fly-by panel: 682, - €	- 447,- €
centre panel: 1.010, - €	centre panel: 492,- €	- 518,- €

The list prices will be revised effective April 1st, 2026, accompanied by an update of the OFML data.
