

Product information No. 1 / 2026

Product Optimization: Change of combination lock fixed code from Dial Lock 57 to successor Dial Lock Private

Scheduling:

From delivery week 09/2026

Product Optimization

As part of its continuous improvement process, supplier Lehmann Locks has redesigned the fixed code combination lock. The Dial Lock Private replaces the previous Dial Lock 57. The external distinguishing feature is the horizontal black lever (previously a vertical black lever with a small arrow).

OLD	NEW
	
<ul style="list-style-type: none"> ▪ Direction of rotation: There is only a right-hand lock mechanism, even for left-hand locks. ▪ Emergency opening: The code must be located with a pin if it is to be deleted after the emergency opening. ▪ Emergency key: S8NOTSCHL 	<ul style="list-style-type: none"> ▪ Direction of rotation: There is a left and right lock mechanism. ▪ Emergency opening: Now possible with emergency key with automatic code reset. ▪ Emergency key: Identical to the FREE Code Lock Dial Lock Public SXNOTSCHL ▪ The milling is identical to the Freecode lock Dial lock public.

The lock is used in ACTA.PRO and ACTA.LOCKER (series launch 1 February 2026) as well as in the safe deposit box for the pharmacy cabinet. ACTA.PLUS locker cabinets with Dial Lock 57 locks that expired on 1 February 2026 will no longer be converted. Compatibility is not guaranteed.

The following emergency key is required: RXNOTSCHL or SXNOTSCHL

The OFML image graphics and all product-related documents will be updated.
