

BooMAff

iGaming Traffic

simply. reliably. profitable.

BoomAff is:

-  An efficient team of affiliate managers with the experience in the gambling sphere of **3** years and more.
-  We stay in touch with more than **500** webmasters worldwide.
-  We cooperate with **8** online casino brands.

New online casinos spring up like mushrooms after the rain!

Nowadays there are a lot of online casinos in the world, so the competition is huge

Clients buy a White Label or turnkey solution, but over the long term the integrator earns nothing, since the client has no experience in this sphere.

Constant flow of income from the client in the form of royalty can stop already during the first year of work.

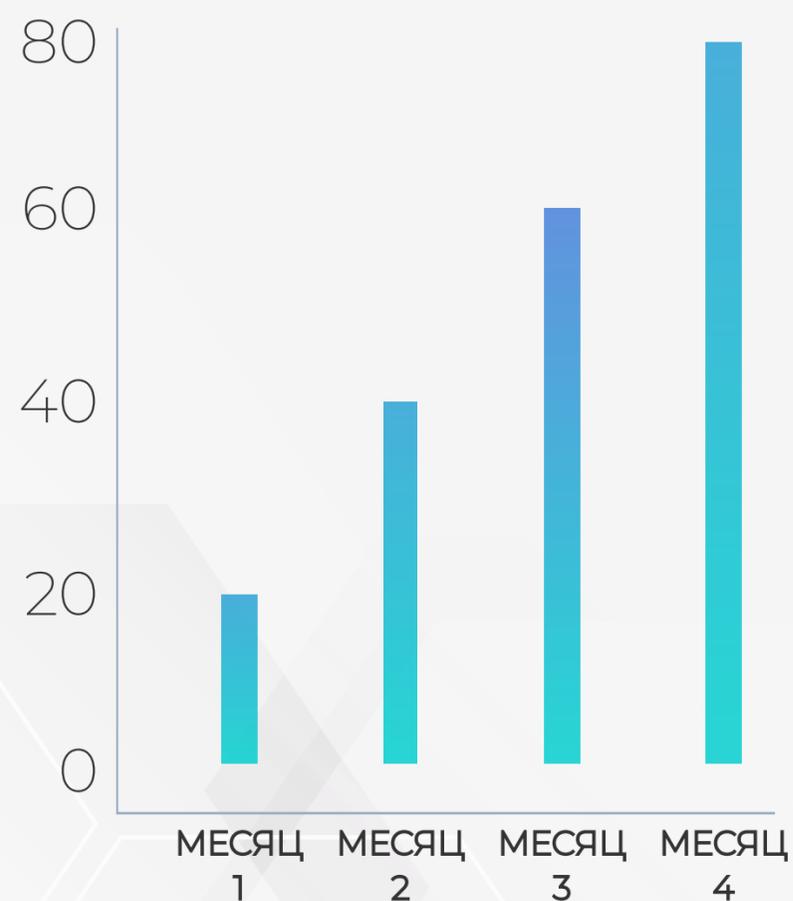

Even if the casino does not get closed down, it brings very small profit to the integrators.

Affiliate marketing managers often need several months to find nice webmasters who could perform good results right during the first MONTH of their work.

How We can help ou and your clients

ON

Right from the first days of our cooperation with an online casino the brand management will see new webmasters in the affiliate program.

The traffic from webmasters will be present already during the **first month** of their work in the affiliate program.

Our recommendations and support provided to the casino brand owners will positively influence both the casino management and the integrator, that is your company.

We will offer to you nice allocation on websites, advise on efficient teams for traffic attraction, and share our experience connected with **bonuses** and **retention** policy.

04

How our work looks like

Webmasters

We compose the **TOP** of our webmasters.

Introduce

Represent the new online casino to **them**. Provide all the basic information and do **everything** to make the webmaster interested.

Decision

Send the terms of the deal and the webmaster's **statistics** from some other brands, including **FTD's** and net revenue, to the casino brand management

Work

Give our comments on the webmaster: everything that can influence the decision making. If, because of some reasons, the casino management does not agree to the deal and demands some other terms, we try to persuade the webmaster to accept the terms of the brand management, which makes us full participants of the project we promote. We settle all major issues of the affiliate unit and lead our webmaster throughout the work.

Results

NET REVENUE

Today, our work brings **30-40** thousand euros of the **Net Revenue** per month in average for each brand we cooperate with.

SEO FTD

Our webmasters can attract **350-400 FTD's** per month in average

CPA FTD

Our contextual advertising experts can attract **150-200 FTD's** per month.

Your Profit

Based upon these figures, you can easily count what profit your integrating company will get from cooperation of our team and the casino brand.

07

What we will begin from

I, the team leader Alex Sibov, will constantly stay in touch with your managers.

At your discretion, we can sign a partnership agreement with you, which will include all the necessary points.

I will welcome and support all your clients (online casino owners) during the whole our cooperation.

We agree with the casino brand management on the services provided and explain to them how our partnership will look like.

An affiliate manager is pointed out for the casino brand. He will be responsible for the webmasters involved by him in the affiliate program of the casino brand.

Thank you for attention
