

Is this calf
threatened
By dangerous
microorganisms?

Now you can confirm it, on site, quickly!

Enterichek

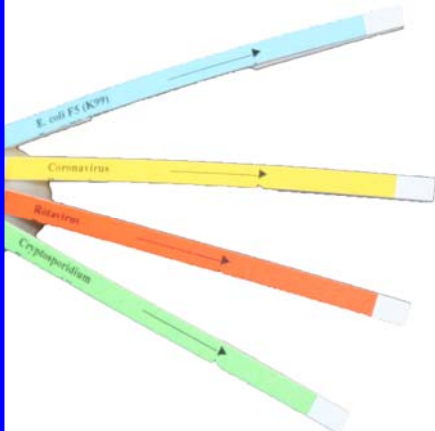

Enterichek detects the presence of 4 microorganisms in bovine feces present in the calf's environment:

Rotavirus - Coronavirus - E. Coli K99 (F5) - Cryptosporidium

Quick and accurate – definitive results in 10 minutes

Simple – no diagnostic lab, just 4 small testing strips

Portable – designed for field use
