

# Quantitative real-time PCR Standard *Salmonella enterica*

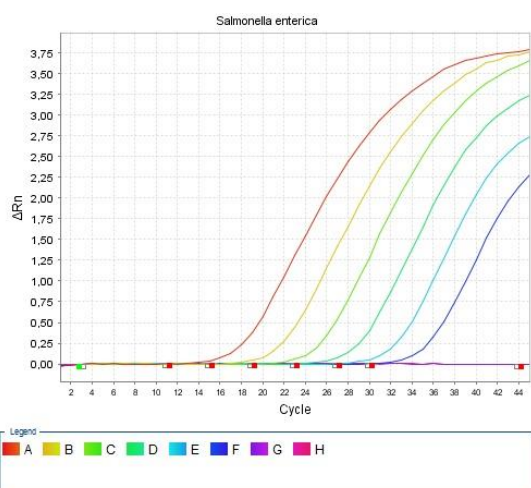

**Product Name:** Quantitative real-time PCR Standard *Salmonella enterica*

**Order No.:** PC600

**Unit:** 25 µl

**Description:** The **Quantitative real-time PCR Standard *Salmonella enterica*** is a quantitative real-time PCR standard for use with BactoReal® Kit *Salmonella enterica* (order no. DVEB02311, DVEB02313, DVEB02351, or DVEB02353). The standard contains a fragment of the *Salmonella enterica* DNA at a concentration of  $10^7$  copies/µl. The standard curve has been determined using ABI PRISM® 7500 (Fast).

**Use:** Add 1 µl of a 1:10 dilution series to 20 µl PCR reaction. Please refer to the corresponding BactoReal® Kit *Salmonella enterica* manual for further instructions.

ABI Prism® 7500:

1:10 serial dilution of *Salmonella enterica* standard (FAM channel, 530 nm)

ABI Prism® 7500:

Standard curve generated with *Salmonella enterica* standard (FAM channel, 530 nm)

*For veterinary use only*
