

# Omni TH TISSUE HOMOGENIZER

The **Omni TH** is a powerful tissue homogenizer that was designed to handle a wide range of samples from <200 µL to 100 mL. The **TH** quickly and efficiently processes a wide variety of sample types and is compatible with several types of generator probes for flexibility in application requirements.

Patented **Omni Tip™ Plastic Generator Probes**, in both soft tissue and hard tissue versions, are available for customers concerned about cross-contamination between samples (see back page). Stainless steel generator probes are recommended for larger, tougher sample types. Specially designed Hybrid plastic/stainless steel probes are also available.

The **Omni TH** is ideal for a wide range of applications, such as tissue homogenization, emulsions and suspensions, cell disruption, protein extraction and medical research. It is lightweight enough to be hand-held and can also be mounted to a motor stand (clamp included) for lengthier processing.

ORDER NO. TH115

**Processing Range:**  
<200 µL to 100 mL

**Speed:** Variable from  
5,000 to 35,000 rpm

**Power Rating:** 125 watt max

**Dimensions:**  
9" H x 2.5" max diameter

**Weight:** 466 g (16.4 oz.)

# Omni Tip™ plastic disposable generator probes

*The Omni Tips' patented design eliminates the hassle of disassembly and maintenance of traditional stainless steel generators.*

## Features

- > **Economical:** <1% of the cost of stainless steel probes
- > **Eliminates Cross Contamination**
- > **Ideal for PCR, RNA, and DNA sample preparation**
- > **Maintenance Free**

Proprietary **Omni Tip™ Probes** are available in both soft tissue (deaggregation) and hard tissue versions. Engineered from durable plastics, **Omni Tips™** are reusable (by chemical sterilization or autoclave) and are economical enough to be disposed of after each use to eliminate cross contamination.

The outer tube of **Omni Tips™** is made of Lexan 144R, a polycarbonate. The inner shafts are made of Ultem 1000, a polyetherimide. The **Omni Tips'** patented design eliminates the hassle of disassembly and maintenance of traditional stainless steel generators. Treatable volume - 250 µL to 30 mL.

*"With Omni Tips™ I can be certain that all the tissue sample has been homogenized; there is no sample loss. I found that the Omni Tip™ hard tissue version worked as well as the stainless steel probe."*

— Rob T., National Institutes of Health

*"The Omni hard tissue tips have been indispensable to us in the analysis of heart, skeletal muscle and tumor tissue. Thank you for this product."*

— Caryl A., Methodist Research Center
