

Pass-through oven

UF160TS

The Memmert pass-through oven saves time when loading and reduces the danger of contamination, especially when directly transporting the chamber load between the grey room and the clean room.

The Memmert heating oven with fully insulated stainless steel door on both sides saves time during loading and reduces the risk of contamination, specially when handling sensitive load between grey and clean rooms. On this page, you can find all the essential technical data on our pass-through oven. Our customer relations team will be pleased to help if you want further information. If you should require a customised special solution, please contact our technical specialists at myAtmoSAFE@memmert.com.

Working temperature range at least 10 above ambient temperature to +250 °C Setting accuracy temperature up to 99.9 °C: 0.1 / from 100 °C: 0.5 Setting temperature range +20 to +250°C resolution of display for actual values 0.1°C Control technology 2 Pt100 sensors DIN Class A in 4-wire-circuit for mutual monitoring, taking over functions in case of an error Control technology TwinDISPLAY. Adaptive multifunctional digital PID-microprocessor controller with 2 high-definition TFT-colour displays. Language setting German, English, Spanish, French, Polish, Czech, Hungarian Timer Digital backwards counter with target time setting, adjustable from 1 minute to 99 days Function HeatBALANCE adapting the distribution of the heating performance of the upper and lower heating circuit from -50 % to +50 % Function SetpointWAIT the process time does not start until the set temperature is reached Calibration three freely selectable temperature values Ventilation forced air circulation by quite air turbine, adjustable in 10 % steps for each segment individually Vent vent connection with restrictor flap Communication poocumentation Documentation programme stored in case of power failure

Communication
Programming AtmoCONTROL software on a USB stick for programming, managing and transferring programmes via Ethernet interface or USB port
Safety
Temperature control independently working, digitally adjustable electronic micro-processor overtemperature monitor TWW, protection class 3.1 (max-value for overtemperature, min-value for undertemperature)
Temperature control mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature
AutoSAFETY additionally integrated over- and undertemperature protection "ASF", automatically following the setpoint value at a preset tolerance range, alarm in case of over- or undertemperature, heating is switched off in case of overtemperature
Autodiagnostic system for fault analysis
Alarm visual and acoustic

Standard equipment

Internals	2 stainless steel grid(s), electropolished
Door	fully insulated stainless steel doors on two sides
Installation	with feet

Stainless steel interior

easy-to-clean interior,made of stainless steel, reinforced by deep drawn ribbing with integrated and protected large-area heating on four sides
161 I
$w_{(A)} \times h_{(B)} \times d_{(C)}$: 560 x 720 x 400 mm
8
210 kg
20 kg

Textured stainless steel casing

Dimensions	$W_{(D)} \times h_{(E)} \times d_{(F)}$: 745 x 1233 x 582 mm (d +2x56mm door handle)
pass-through version	

Ambient conditions

Altitude of installation	max. 2,000 m above sea level
Ambient temperature	+5 °C to +40 °C
Humidity rh	max. 80 %, non-condensing
Overvoltage category	II
Pollution degree	2

Packing/shipping data

Transport information	The appliances must be transported upright
Customs tariff number	8419 8998
Country of origin	Federal Republic of Germany
WEEE-RegNo.	DE 66812464
Dimensions approx incl. carton	w x h x d: 830 x 1300 x 800 mm
Net weight	approx. 120 kg
Gross weight carton	approx. 146 kg

Standard units are safety-approved and bear the test marks
