LIVE

At Lippert, our goal is to make products that help you discover the ultimate sense of freedom. With thousands of team members globally, innovation is at our core, and we will never wait to see what can be done better. Our products are inventive and inspired. We strive for the best Customer Service, period. Why? Because your adventure is on the line, and it's our job to make every future journey even better than those of the past.

Our purpose is clear: We are a Company where Everyone Matters. Every Customer. Every Team Member. We support the Communities we work in with over 100,000 hours of collective service every year. We make lives better.

Whenever, wherever we make your experience better.™
SPACE ON DEMAND

Experience the freedom of the open road with our integrated Vela popup, perfect for creating more headroom in your camper van. For those moments when you need extra room, our Lippert slide-out provides space on demand, ensuring maximum comfort and convenience wherever your journey takes you.

VELA

Pop-up roof

- Designed for third generation Fiat Ducato H2
- Robust top and bottom panels are constructed with thermoformed technology using acrylonitrile butadiene styrene (ABS) and polymethyl methacrylate (PMMA) with closed-cell extruded polystyrene foam spacers
- Testing and quality protocols ensure performance, durability, and reliability
- Construction materials make this pop top lighter than standard rooftop units
- Canvas made from 100% double-coated polyester
- Two LED map lights illuminate the area around the bed for safety
- Pre-wired with electric cable to manage the roof light and solar panel (not included)
- Folding ladder available upon request
- Large aluminum bed frame with wooden slats provides ample sleeping space (mattress not included)
- Available only with blind spoiler

Provides an extra sleeping area with access through the roof of the unit

Integrated USB ports conveniently charge phones, tablets and more
Two rooftop LED light strips provide overhead lighting
Part #	Space	⬈ Length	⬈ Width	⬈ Height	🛍	Solar Panel Allowance

BELVEDERE

Pop-up roof

- Designed for fourth generation Ford Transit
- Provides an extra sleeping area with primary access through the roof of the unit
- Top is constructed out of fiberglass-laminated external sheets with closed-cell extruded polystyrene foam panels and a PVC frame for increased resistance to wear and tear
- Robust bottom panel is constructed with thermoformed technology using acrylonitrile butadiene styrene (ABS) and polymethyl methacrylate (PMMA) with closed-cell extruded polystyrene foam spacers
- Testing and quality protocols ensure performance, durability, and reliability
- Construction materials make this pop top lighter than standard rooftop units
- Thermo-insulated panels keep campers warm
- Canvas made from 100% double-coated polyester
- Two LED map lights illuminate the area around the bed for safety
- Integrated USB ports conveniently charge phones, tablets, and more
- Folding ladder available upon request
- Large aluminum bed frame with wooden slats provides ample sleeping space (mattress not included)
- Available with or without blind spoiler (ask about VISTA window system)

BIKE CARRIERS

Lippert bike carriers are designed to take your bikes on any adventure. We offer a variety of styles to seamlessly integrate with your van or campervan layout. Our versatile designs provide a reliable solution for confidently transporting all types of recreational equipment.

R-BIKE VAN

Bike carrier I Van

• Designed for conversion vans

• Accepts two e-bikes or standard bikes

• Extends to fit three standard bikes with
  R-Bike 3Rail accessory (sold separately)

• Designed for easy installation and mounting

• Designed for serviceability and
  compatible with multiple accessories

• Comes standard in anodized aluminum or
  upgrade to corrosion-resistant automotive finish

• Meets ECE R26 vehicle safety mounting regulations

Built-in anti-vibration device deters unwanted
noise when traveling on rough terrain

Accepts two e-bikes or standard bikes
(up to three standard bikes with 3Rail accessory)

Robust and secure construction
protects valuable bikes

Tray-style rail folds up when
not in use for compact storage

WINDOWS & ROOF VENTS

Polyplastic caravan, camper, and van window systems provide a clear view of the adventure, featuring quality construction and intuitive functionality coupled with seamless integrated designs. We offer standard window systems and custom solutions to provide countless options in varying configurations and sizes.

POLYPLASTIC

BY **LiPPERT**

Polyplastic, a Lippert brand, offers a unique combination of state-of-the-art manufacturing and contactless thermoforming technology. We produce superb, transparent, lightweight cast acrylic-based solutions across a variety of industries. For more than 70 years, our customers have enjoyed the benefits of our passion for design, customized focus and rich industry experience, coupled with highly-engineered machinery, short lead times, and exceptional optical and thermal performance.

General Polyplastic by Lippert window system features

• In-house produced cast acrylic PMMA (Roxite® Premium)
• Stronger on impact compared to glass (approx. 11x)
• Made from shatterproof, high-transparent material
• Exceptional optical and thermal performance
• Higher light transmission versus other solutions
• 10-year UV protection against fade and discoloration
• Easy-to-clean and no maintenance required
• Specially designed accessories
• Decorative screen print options available
• Standard two-year warranty
• Homologated according to
  UN/ECE R43 and FMVSS 205 approved

Purchasing a Polyplastic window system requires a sequence of steps. Please reach out to our sales department for assistance with determining the best systems, accessories, sizing, and customization options for your unique setup. For questions or additional information, please visit lippertcomponents.eu. We are also available by phone or email at +31(0)104461100 / info@polyplastic.nl.

REPLACEMENT PARTS & ACCESSORIES

Catches

Screwed

- Universal screwed catches are used to open, close, and lock the windows
- Due to the locking plates, the catches have a special night position for extra ventilation; this cannot be seen standing at the outer side of the window
- Available with or without a lock button
- All catches come in black

2021104665   2021104737

Polyfix

- Polyfix is a patented, quick fit system that offers time savings when fitting accessories to the window
- The complete Polyfix system consists of catches, adapters, locking plates, and fill plates
- Easily slides across a Polyfix adapter into a locking position
- Saves time compared to a screwed version
- Most Polyfix adapters are already placed on the window in the factory

REPLACEMENT PARTS & ACCESSORIES

Rubber profiles

Standard

- Standard rubber profile to provide an optimum, watertight seal between the wall and window system
- The rubber profile is mounted on the inside of the wall aperture
- The rubber profile has a special designed soft bulb made of sponge rubber
- Special butyl adhesive layer inside the rubber profile ensures a perfect seal
- A decorative insert band complements the rubber profile
- Available in black

Fixed system

- Rubber profile for fixed window systems, to provide an optimum, watertight seal between the wall and window system
- The rubber profile is mounted on the inside of the wall aperture
- Rubber profile must be combined with key profile to lock the window in place
- Special butyl adhesive layer inside the rubber profile ensures a perfect seal
- Available in black

DOORS & SERVICE DOORS
STEPS

Our broad range of caravan and motorcaravan steps are available in steel, aluminum, and hi-tech polymer with manual and power configuration options to suit every need. We offer single, double, and triple entry steps for caravans and motorcaravans.

ALANERA

Slide-out step I Electric

- High-power 12V motor
- Automatic slide-out motion for a safe, comfortable, unobtrusive step
- Lightweight yet durable construction with high-tech, injection molded polymer
- Weatherproof and tested for the outdoors
- Integrated motor sensor for 'open step' warning
- Integrated thermal breaker in case of excessive strain
- Includes manual, quick-release emergency system
- Anti-slip finish for safe entry and exit
- Side wings help integrate the step with the vehicle and can support a person's weight
- Automotive-quality finish for lasting resilience to the elements
- Easy to clean – simply spray off with a hose
- Installation wiring cables included with electric models
- Installation kits available for: Fiat Ducato, Citroen Jumper, Peugeot Boxer and Ford Transit

INNOLIGHT V6

Slide-out step I Electric

- High-power 12V motor
- 'C' aluminum profile guides reduce weight and increase efficiency during installation and performance
- Ergonomic footboard and side cover design
- Front covers available to integrate the step with the vehicle
- Lightweight yet durable mixed plastic, steel and aluminum construction
- Weatherproof and tested for the outdoors
- Integrated motor sensor for 'open step' warning
- Integrated thermal breaker in case of excessive strain
- Includes manual, quick-release emergency system
- Anti-slip tape for safe entry and exit
- Anodized aluminum with a black, painted finish for strong corrosion protection (finish requires proper handling to maintain appearance)
- Sturdy, one body anodized aluminum footboard for lasting corrosion resistance and noise reduction
- Installation wiring cables included
- Installation kits available for Fiat Ducato, Citroen Jumper, Peugeot Boxer, Ford Transit, and Volkswagen Crafter

Lightweight, durable plastic, steel, and aluminum construction with anti-slip surface for safe stepping

Front covers available to integrate the step with the vehicle for a clean, seamless look

TABLE LEGS

WATER TANKS

Lippert water tanks are available in a wide variety of shapes and sizes to provide an exact fit for campervans and caravans. They're constructed from high-quality plastic and are designed to integrate with the existing structure of the vehicle.

WATER TANKS

Water tank I Rotational molding

- NOTICE: If installation pipes and vents are not installed from the top of the water tank, capacity of the tank could be reduced by up to 6%
- Constructed from high-density polyethylene
- Compatible with a variety of caravans and motorcaravans
- Installation hardware not included
- Available in black and white (other colors available on request)
- Full assembly and single sub-components comply with KTW-BWGL and DIN 16421

POWER
ON BOARD
A steady, onboard power supply is an essential part of mobile travel. Charging systems from Lippert enable batteries to be perfectly charged and onboard electrical devices to be supplied with power in all situations.

EMPOWERING YOUR ADVENTURES

Experience seamless power management with our range of cutting-edge products. Our boosters, caravan power supplies, and electroblocks ensure efficient charging and reliable voltage for all your electrical devices. Advanced water tank level probes, solar regulators, and lighting control systems deliver precise power control, while our operation and display panels keep you informed. With specialized peripheral devices, Lippert addresses all your power needs for a comfortable journey.
Boosters

Intelligent charging with a boost

A device for boosting the current supplied by the vehicle (towing vehicle) to facilitate charging the living area battery while driving (supply voltage drop via the trailer socket can be very high). Device for boosting the voltage supplied by the vehicle (chassis) to facilitate charging the living area battery while driving (i.e. EURO6 alternators only supply 13V or less under certain operating conditions.
Caravan Power Supplies

All necessary power for caravan utilities

Devices generating a battery charging voltage in the caravan, alternatively supply voltage only without. Charging function (characteristic curve) distribution and protection of output circuits; overall supply switching via a main switch. They are suitable for caravans that do not have their own battery, but have electrical devices that are supposed to be operated solely via the campsite's mains power supply.

Electroblocks

Max performance and system availability

Devices for generating charging voltages for all batteries installed in the motorcaravan (living area, starter, or auxiliary battery). EBLs distribute and protect the output circuits. The overall supply switching is via two main switches, the living area supply on / off switch and the vehicle supply on / off switch with complete isolation of all consumers from the batteries (shutdown).
Water Tank Level Probes

Level up to optimal measurements

Probes to acquire levels in water tanks or wastewater tanks.

Chargers

Top rated, compact charging performance

Device for boosting the current supplied by the EBL (additional charger) or as a simple battery charger without voltage distribution.
Solar Regulators

Optimal conversion of solar rays

Device to facilitate connecting one or more solar panels. A charging voltage for one living area battery or two batteries (living area and starter battery) is available at the output. Charging voltage suitable for batteries, voltage and current display can be connected.

Lighting Control Systems

Master light in the darkness

Lighting control systems for switching and dimming various light sources such as LEDs, RGB stripes, WW/CW stripes and incandescent lamps. One or more channels per device.
Operation & Display Panels

Discover an intuitive way of operating

Panels are designed to display vehicle data (tank levels, currents, operating states, status messages, temperatures, etc). Some panels allow operation of Lippert devices and systems and control / switching of third-party devices and systems.

Peripheral Devices

Ultimate caravan automation

Special devices developed by Lippert are available for various control or monitoring tasks. These devices are customized to the specific requirements in close cooperation with the OEMs.

WA 1208

Booster I Caravan

- Increases the charging voltage in the caravan so the caravan battery can be charged when driving
- Cut-off from towing vehicle when ignition is switched off
- Voltage compensation of fluctuating alternator voltage
- Selectable IU charging curve for the living area battery (two)
- Status info via LED
- D+ evaluation

Part #	Output Current	Max Input Current	Input Voltage	Output Voltage	Reverse Current Caravan Battery	Operation Ambient Temp.

WA 121525

Booster I Motorcaravan

When using an energy-saving charging alternator (Euro 6), using a booster is required because the charging voltage fluctuates very strongly (12,6V to 15V). When using a conventional alternator, the living area battery charge can be improved by using a booster.

- Charges 12V lead-acid, lead-gel, AGM, and lithium batteries while driving, regardless of alternator voltage
- Selectable characteristic curves can be any combination of lead-acid, lead-gel, AGM I, AGM II, lithium (CCCV)
- Charging characteristic curve: IUoU (current-dependent switchover to trickle charge)
- Bypass switch to facilitate starter battery charging when the connected electroblock is in grid mode
- Adjustable / curve-controlled charging current limitation / power limitation
- Charging current temperature compensation
- Current is adjustable in four increments: 45 A, 55 A, 63 A and 70 A
- Overheating protection
- D+ controlled

Caravan Power Supply

Power supply units supply 12V equipment such as immersion pumps, fans, lights and similar devices. They are most commonly used for caravans connected to a 230V network and power the utilities from the vehicle battery for a limited amount of time.

- For operation without battery
- Five separately fused 12V current circuits
- Installation space (mounting rail 35 mm, 4TE) for 230V basic distribution available
- Priority circuit for mains supply, otherwise supply of utilities from the car battery
- Low quiescent current consumption
CSV 400

Caravan Power Supply

Power supply units supply 12V equipment such as immersion pumps, fans, lights and similar devices. They are most commonly used for caravans connected to a 230V network and power the utilities from the vehicle battery for a limited amount of time.

- Output voltage 12,5V DC, output current 32 A
- Six separately fused 12V current circuits
- Priority circuit for mains supply, otherwise supply of utilities from the car battery
- Output voltage stabilized and screened
- Connection option for water tank monitoring control panel
- Connection option for refrigerator supply

Caravan Power Supply I Battery charger

Intended for use in autarkic caravan, our battery charging module features complete 12V distribution, fuse protection of the 12V current circuits, as well as other control and monitoring functions.

- Battery charging through 230V supply with 28 A, characteristic curve IUoU
- Selectable characteristic curves are lead acid or lead gel
- 8 A charging booster for battery charging while driving
- Bistable mains latching relay (12V)
- Connection facility for solar controllers LR 1218 and LRM 1218
- Automatic switch-off of utilities when ignition is switched on
- Battery charging from grid or while driving
- Selectable characteristic curves are lead acid or lead gel
- Refrigerator supply (configurable) for absorber, compressor, or AES refrigerators
- Low quiescent current consumption
- Also available with an analog panel

EBL E-SMARTWAVE NEW

Electroblock I Motorcaravan

- Cloud-free and anonymous (no sign-up)
- All-in-one solution with battery and control functions
- Global connectivity utilizing NB-IoT / LTE-M networks
- Integrated security and environmental sensorics
- Compatible with a wide range of RV devices
- Future-proof thanks to a wide array of wired and wireless interfaces
- Optional wireless accessories using dedicated radio band
- System updates / critical fixes without a need of remote connection available
- Private and secure, thanks to integrated VPN over LPWA
- Radio equipment directive 2014/53/EU (red) compliant
- Emergency operation using smart user bypass function
- Up to four external chargers can be adapted
- Integrated GNSS and fleet services
- Low-power usage
- Recommended display panel: DT740 (sold separately)

DT 740 sold separately

POWER ON BOARD

EBL 150

Electroblock I Motorcaravan

- Devices for generating charging voltages for all batteries installed in the motorcaravan (living area, starter, or auxiliary battery)
- EBLs distribute and protect the output circuits
- The overall supply switching is via two main switches (MOSFETS)
- The living area supply on / off switch and the vehicle supply on / off switch with complete isolation of all consumers from the batteries (shutdown)
- Connection facility for solar charge controller (up to 25 A charging current)
- Refrigerator supply (configurable) for absorber, compressor, or AES refrigerators
- IUoU, integrated charging output with adjustable slide switch for lithium and AGM
- Low quiescent current consumption
- D+ signal evaluation

POWER ON BOARD

LRM 1218

**Solar regulator I Caravan or motorcaravan**

This clocked regulator ensures the connected solar modules are always properly functioning while the battery is in the mains charging phase, regardless of solar radiation, battery voltage, and module temperature.

- Easily adjust the charging voltage for the living area battery through the setting options and optional temperature sensor
- Supports up to 20 A for living area batteries and 2.5 A for starter batteries
- Works with 12V lead-acid, AGM, or lead-gel batteries
- Charging range is 13.2V to 14.9V and is temperature controlled
- SDTBUS capable

LR 1218

Solar regulator I Caravan or motorcaravan

This regulator limits and regulates the charging voltage from the solar modules. It ensures up to two batteries are partially charged.

- Built-in isolation diode prevents discharge if the charging voltage is insufficient, in the dark for example
- Suitable for six-cell 12V lead acid or lead-gel batteries
- End-of-charge voltage for both batteries 14,2V, characteristic curve: IU
- Longitude controller
- Battery connection via AMP 6.3 flat connectors

OVP 01
Peripheral devices

An overvoltage protector should be used to protect all devices on board a vehicle operated using 230V AC from overvoltage. It is important to note, particularly when visiting campsites in the Southern Hemisphere, that dislocated power supplies causing such overvoltage occur as a result of defective installations. There is also a risk of overvoltage on ferries and when operating power generators in particular.

- If overvoltage or undervoltage occurs, (Ueff: <175V AC, >265V AC), cut-off occurs within 10 milliseconds
- The devices remain switched off until the mains Voltage is normal
- Simply connected downstream of the motorhome's power plug (CEE)
- All devices supplied with mains voltage are protected

Lippert offers a number of electronics and specialty accessories to maximize functionality on any caravan or campervan. Check out our camera systems, cooler, solar panel, propane tank holder, stabilizing jacks, and more.

FURRION® VISION S®

Camera system kits

Monitors

- HD monitor with anti-glare display allows you to toggle between cameras
- Toggle between multiple camera views on the touchscreen monitor
- Low-profile design promotes an unobstructed view out of the windshield

Displays a clear image for up to four cameras for all-around coverage

Reliable, wireless communication with no lag between camera and monitor

Cameras

- Reliable digital connection (2.4GHz)
- High-resolution cameras
- Wide viewing angle with up to four cameras displayed
- Night vision and intelligent IR cut filter for clear viewing
- Motion detection and microphone promotes safety
- Security camera auto-wake with motion detection
- IP65 waterproof-rated cameras for durability
- HD monitor with anti-glare display
- Wireless cameras are easy to set up
- Rear park assist marker lines to align your vehicle

Increases visibility while backing the campervan or motorcaravan into a parking space or campsite

Provides 360-degree views for observation while driving so you can see all around you on the road

Windshield mount

- Provides a convenient and reliable mounting point for sticking onto a hard, flat surface
- Compatible with all Furrion Vision S monitors
- Suction cup provides a sturdy mount with option to remove
- Allows angling of monitor to suit driver preferences
- Easy-to-use lever locking and release system

Interior table stand

- Compatible with Furrion Vision S 5" and 7" monitors
- Provides a sturdy mount for positioning camera on a flat surface
- Allows angling of monitor to suit driver preferences

Provides a convenient mounting point for the monitor and allows pivoting as needed

Pivoting mounting base for setting up the monitor on a flat surface

ACCESSORIES

FURRION® eROVE®

Electric cooler

- Iceless, portable electric cooler for camping, boating, and off-grid travels
- Capable of freezing to -22°C and holding ice for up to five days
- Four energy-saving modes keep food and drinks cold while completely off-grid
- Efficient 12V DC input provides a backup power source whenever you need it
- Features USB ports (two 2.0 / one 3.0) and wireless charging to keep your devices fully charged while on the go
- Interior LED lights, detachable cupholders, and umbrella holder for added convenience
- Compatible with the foldable 100W solar panel for a sustainable energy solution (sold separately)
- Includes a wheel kit for maximum mobility
- Compatible with the Furrion ePod® lithium-ion battery (sold separately)

eRove is capable of freezing to -22°C and keeping cooler contents chilled for up to five days

Easily switch between modes: beverage mode, freezer mode, eco-mode, and smart mode

USB ports keep your devices fully charged when using the ePod battery while on the go

Use with the foldable 100W solar panel for a modern and sustainable energy solution

LIPPERT EMEA

Our journey

In 2016, Lippert began to focus its attention and resources in the European Caravanning Market acquiring some of the most successful companies in the industry. Headquartered in Tuscany, Italy, Lippert's manufacturing capabilities include entry door manufacturing and lamination, bed lifts, pop-up roofs for camper vans, slide-outs, table legs, TV brackets, bike carriers, entry steps, blinds, and flyscreens. In 2019, Lippert acquired the Italian Femto brand, which specializes in engineering parts, product design, prototype construction, and production equipment for a variety of industries. Lippert also expanded into The Netherlands by acquiring the Dutch Polyplastic group of entities, which specialize in producing window system solutions for the Caravanning and Equestrian industries and cooling door system solutions for the Retail industry. Most recently, Lippert acquired the German brand Schaudt, a manufacturer of power management, battery chargers, and electronic control systems. In 2023, Schaudt rebranded to Lippert.

As Lippert expanded into the European Caravanning Market, several strategic acquisitions were made in the Global Rail Industry, creating the Lippert Rail Division, manufacturing glass windows and interior furniture for trains. In the Rail Sector, Lippert's continued focus is on highly engineered products and extensive research of innovative solutions, offering these products to vehicle owners, operators, manufacturers and refurbishers, industry subcontractors, authorities, and organizations.
Lippert also made a substantial investment in the Global Marine Market with the acquisition of the Lewmar Limited group of entities, an industry leader in hardware, winches, hydraulics, windlasses, anchors, thrusters, steering systems, hatches, and portlights that suits every vessel from the smallest day fisher to largest mega-yacht.
