

## ELECTRO BLOCK POWER SUPPLY KITS

Electro block systems are typically developed for the OEM in a manner suitable for the respective use. A common feature of all EBLs is that they are housed in a compact plastic casing made of premium polyamide. This organizes all of the modules required for a leisure vehicle in one place.

## COMPLETE SYSTEM FOR AFTERMARKET USE

Traditional EBLs (where the cables within the vehicle are guided centrally to the EBL), EBLs with CIBus ports are also available. They are suitable for use in vehicles where decentralized control of the various devices is required via the CIBus (including those made by third party manufacturers). Manufacturer-specific bus solutions are also possible.

- For use with motorcaravans
- EBL 208 for use with six-cell lead-acid and lead-gel batteries
- EBL 211 for use with six-cell AGM and lead-gel batteries
- Charging module: Characteristic curve IUoU, charging current 18-amp
- Bistable mains latching relay (12-volt) and battery monitor module
- Features a battery cutoff switch for winter storage
- Connection for a solar charge regulator LR(M) 1218
- Kits include electro block power supply (EBL 208 or EBL 211), control panel (LT 453), water tank level probe (M 400) and all required connectors, fuses and cables with instructions

EBL 208

### Electro block system control panel

- LED display panel can be mounted inside the motorcaravan
- Voltage displays in eight levels for living area and starter batteries
- An optical battery alarm will trigger if the battery voltage drops significantly
- Displays water tank level in four increments for up to two water tanks
- 12-volt mains switch with switch-on control unit
- 230-volt network control unit
- Pump switch with switch-on control unit

2021104727

### Water tank level probe

- Measures fresh and wastewater tanks up to 400 mm deep
- Quick, easy installation
- Includes cable, lock-nut and seal
- Other cable and probe lengths available on request
