

New Graduate Rotation Program

The Lee Health Rotation Program is a perfect opportunity for the new graduate Physical Therapist to get additional mentorship, training, and experience in a variety of therapy settings all in a fulltime, fully salaried and benefited position.

Lee Health Rotator Therapists have the opportunity to gain experience in the following care settings:

- Acute Care
- Inpatient Rehab
(Rehab Hospital)
- Outpatient
(both adult and pediatric)
- Skilled Nursing Facilities
- Home Health
(available as an option only after 2 years of experience)

Rotations are four to six months in length. Each rotator is assigned a mentor and receives accentuated orientation and clinical support, starting primarily as an observer and picking up their own caseload (with oversight) as competence and comfort level in that setting increases. The expectation is that by the end of the four to six-month rotation, the rotator is able to function independently with a full case load in that setting.

Benefits of a Rotation Position:

- Full salary and benefit package
- Additional mentorship and support
- Experience in multiple care settings helps provide a solid clinical foundation for your career whichever area you end specializing in
- Not locked in to rotate forever. Can apply to a regular staff position at any time
- Meet lots of other therapists and other professionals
