What is Frame
to Furniture?

Where function meets design.

OVERVIEW

Frame to Furniture is Middle Atlantic's hallmark furniture design and integration solution drawing on four decades of market-leading expertise in supporting and protecting audiovisual systems.

BUILT TO LAST

The Frame to Furniture approach protects your investment by providing system longevity. The built in passive or active thermal management and cable management ensures consistent system uptime. The removable wood kit means that if a panel gets damaged, the room gets updated or you just want a new finish, simply order a different wood kit to replace the previous one without disturbing the already installed equipment.

HOW IT WORKS

The majority of our collaboration furniture is built around a robust steel frame to properly support AV systems and then is concealed by the wood kit, elegantly hiding the AV system in plain sight.

The frame is delivered first to allow for unobstructed integration of the system and prevent any accidental on-site damage to the wood. The frame provides proper thermal and cable management for maximum uptime of the equipment inside. The wood arrives shortly after and completely conceals the system in the environment.

SEAMLESS WORKFLOW

We understand the integration and commissioning workflow of an AV system to get a room up and running in a timely manner. Our limitless options for wood kits meet the aesthetic requirements of any space and are designed to be easily installed once the system is in place.

C3 Series

The C3 Series displays modern finishes, versatile storage options and integrated display mount options using Chief's Fusion™ technology for a truly all-in-one localized AV system that can fit in any collaboration space.

CUSTOMIZED CONFIGURATIONS AVAILABLE **HERE.**

Features

Available in Moderno style.

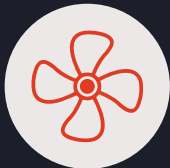

Wall-mounted ADA compliant design.

Available in 1, 2, 3 and 4 bay models in 24" and 32" heights.

Designed using High Pressure Laminate (HPL) finishes available from industry-leading manufactures like Wilsonart® and Formica®.

Add a Rack Kit for 4RU of equipment mounting in each bay.

The C3 Fan Kit provides proper thermal management within the bays to keep equipment performing as expected, all at a whisper quiet 24dB.
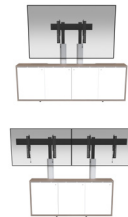

Optional Single and Dual Display Mounts accessories were co-developed with Chief, using the Fusion™ Modular Extrusion. Compatible with all accessories for Vaddio camera mounting and more.
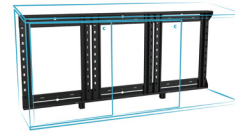

Frame to Furniture™ design complements the technology integration workflow, while protecting the elegant Wood Kit from damage during the installation process.

Fully assembled Credenza Frame ships first, to support accessible technology integration, while the furniture Wood Kit ships separately.

Flexible AV/IT equipment mounting storage options include vertical slide-out racks and stationary rack units, removable Lever Lock™ small device mounting system, and standard shelving options for general storage.

C3 Series

Low-profile 10" depth provides a comfortable reach range for interactive displays above

Top cover panels available in modern aluminum, white or black. This is where the Display Mounts attach.
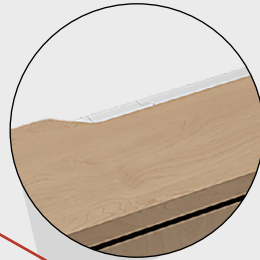

Magnetic push latch and lock for security

Sleek Moderno style design

Rack Kits include thermostatically controlled fan, 7 outlet power strip (15A) and your choice of stationary or slide out 4RU rack for vertical mounting

C5 Series

The C5 Series Credenza merges technology and design for an attractive solution that expertly stores and protects audiovisual equipment within stylish furniture that is customizable to blend into any environment,ideal for conference rooms and meeting spaces.

Features

Choose from our three unique wood kit styles.

Available in 1, 2 or 3 Bay sizes with 14RU of equipment mounting per bay.

22", 27" and 31" depth models.

Choose from a variety of furniture finish materials like Veneer and High Pressure Laminate (HPL) from industry leading manufactures like Wilsonart® and Formica®.

Each bay has an integrated, thermostatically controlled blower that moves up to 50CFM at only 32dB to keep equipment from overheating and failing.

MIDDLE ATLANTIC
A brand of legrand®

Select accents and accessories to create a custom design without the custom wait.

Add internal accessories like bookshelves and wastebaskets to unused bays without equipment mounted.
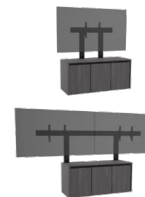

Single and Dual Display Mount Option co-developed with Chief. It uses the Fusion™ Modular Extrusion and is compatible with all accessories for Vaddio camera mounting and more.

Fully assembled frame ships first, with furniture grade woodkit shipping separately to allow for easier installation and integration of equipment.
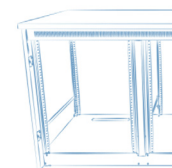

Want to create your own design? Our Frame + Woodworker's Kit allows you to create your own wood kit and attach it directly to our frame so you still get the same equipment mounting, cable management and thermal management benefits.

C5 Series

Veneer and High Pressure Laminate finish options.

Magnetic push latch

Vent finishes in white, black, or silver

Integrated, thermostatically controlled blower in each bay that moves up to 50CFM at only 32dB

Models available in three widths and three depths to accommodate technology systems small and large.
