

# TILED UNIVERSAL MOUNTS

## EASY TO ORDER

Use starter mounts and extender mounts to build your video wall. Starter mounts form the base of your wall. They're available in three sizes to hold two, three or four display panels and come in a set of two rails. Next, add extender mounts (also designed to hold two, three or four displays) to achieve the desired height of your video wall.

## HOW TO ORDER

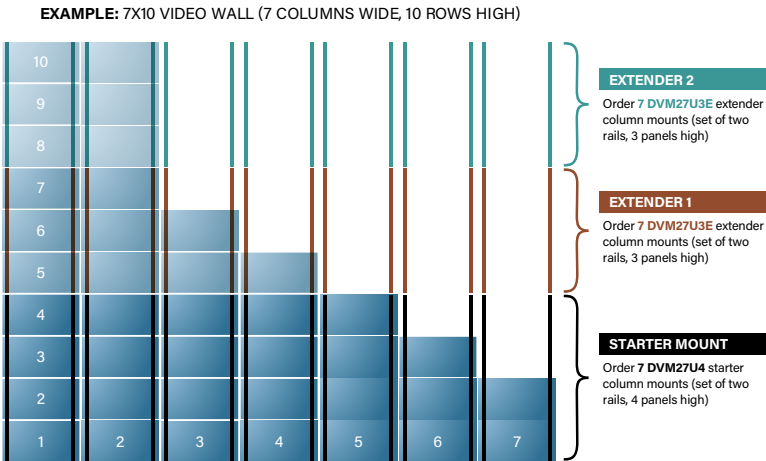

From the first column, select your video wall height (# of rows). Order the SKUs from the next columns for your starter and extender mounts. The quantity needed will be the same as the width of your display. For example, if you're installing a video wall that's 7 displays wide by 5 displays high, you will need 7 starter mount sets that hold three panels (DVM27U3) and 7 extender mounts that hold two panels (DVM27U2E).

Helpful hint: The last digit of the part number indicates how many display panels the mount will hold. For example, DVM27U4 holds four panels. The extender DVM27U3E holds 3 panels.

### EXAMPLE #2

If you're installing a video wall that's 7 displays wide by 10 displays high, you will need:

- 7 starter mount sets that hold 4 panels (**DVM27U4**) and
- 7 extender mounts that hold 3 panels (**DVM27U3E**) and
- 7 extender mounts that hold 3 panels (**DVM27U3E**)
