

BULK CATEGORY CABLE

TAA COMPLIANT

Innovative Next-Generation Packaging

C2G's TAA-Compliant Bulk Category Cable is an excellent choice for custom length horizontal network cable runs. Not only is this high-quality cable in compliance with 568.2-D standards, it's easy to work with, thanks to an innovative package design.

- Innovative package design reduces plastic and cardboard waste
- Smooth, hassle-free cable-pulling experience
- Certified quality: Meets and exceeds ANSI/TIA-568.2D standards for enhanced compatibility and interoperability
- Available in Cat5e, Cat6 or Cat6a, packaged in 1000 ft (304.8m) spools, in a range of colors, jacket ratings and cable shields
- Backed by a lifetime warranty and world-class support from C2G

Slimmer packaging with 40% less cardboard and plastic

Core uses less plastic and delivers a smooth cable pulling experience

Innovative design saves space and creates less waste

The new sustainable slim packaging reduces cardboard waste. The inner spool has a lightweight design that uses less plastic. What does it mean for you? A smaller package means you can ship and store more cable in the same amount of space as before. Because more boxes fit onto each pallet, you can potentially save on shipping costs. And of course, less cardboard and plastic means there's less to recycle.

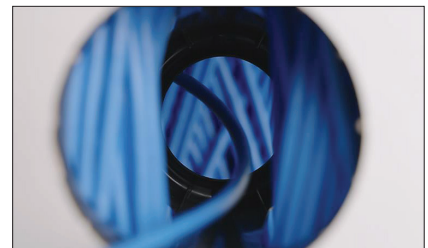

**Slimmer
Packaging**

To save valuable space, C2G Bulk ethernet cable is delivered in packaging that is slimmer than most conventional packaging.

Tangle-free cable-pulling experience

Because of its innovative center spool design, you're assured of a smooth cable pulling experience every time. And that means your installation team is more productive, and you finish the job sooner.

Ordering Information

C2G offers a range of bulk Ethernet cables, including Cat5e, Cat6 and Cat6a options, available in 1000 ft (304.8m) spools of various colors. They are available in various jacket types, including CM-rated for in-wall installations, CMR-rated for vertical riser applications, CMP-rated for plenum spaces. A variety of color options helps you simplify cable management and organization, making it easier to identify and troubleshoot connections.

C2G’s bulk cable line features both unshielded and shielded options. For environments with high EMI potential, C2G offers shielded F/UTP (Foiled Unshielded Twisted Pair) cables to protect against high-frequency noise. This design ensures superior signal transmission and minimizes data errors. C2G also offers UTP (Unshielded Twisted Pair) cables which are sufficient for most LAN installations.

Cat6a Ethernet Cables

- Deliver maximum performance for the most demanding network environments
- Support data transmission speeds up to 10Gbps over distances up to 328 ft (100m)
- Ideal for high-density data centers, enterprise networks, and applications requiring the highest level of reliability and speed

Cat6 Ethernet Cables

- Support data transmission speeds up to 10Gbps over distances up to 180 ft (55m)
- Ideal for corporate networks, data centers, and AV installations where higher data throughput and reliable connections are essential

Cat5e Ethernet Cables

- Supports data frequency ranges up to 350 MHz
- Ideal for applications such as office networks, residential setups, and voice and data transmission, providing reliable performance with minimal interference
