Release Notes and Update Instructions

EasyIP PCC Four-Camera Joystick Controller

Current Release

EasyIP PCC 2.0.0
December 2, 2024

New Features

- Added support for multicast streams, allowing EasyIP video to be received by multiple EasyIP endpoints. This enables flexible video routing and content distribution across larger systems.
- Introduced a new CLISH 'info' command to query product and room label information.
- Added the HDMI Video Input connection state display on the EasyIP streaming panel, providing users with enhanced monitoring capabilities.
- Added support for the 'cut' transition effect, offering a new video switching option.
- Added support for 256 camera presets via CLISH, enabling more extensive camera configuration options.
- Added support for passwordless login over Telnet, improving ease of access in secure environments.

Improvements

- Various cosmetic improvements have been made to the web interface, providing a more intuitive and polished user experience.
- Enhanced custom UI rendering in Firefox, ensuring consistent display across browsers.

Release History

EasyIP PCC 1.0.0
September 15, 2023

Notes

- Initial release.

Firmware Update Instructions – EasyIP PCC

The process for updating firmware is the same for virtually all Vaddio products. *Your device's web interface may display different information from the screen shot in this procedure.*

Caution
The camera must remain connected to power and to the network during the update. Interrupting the update could make the camera unusable. If the update does not run, DO NOT DISCONNECT POWER. Call Vaddio Tech Support immediately: +1 763-971-4400 or 800-572-2011.

---

1. Download the firmware file if you have not done so already.
2. Access the device's web interface and log in as `admin`.
3. On the System page, select Choose File and select the file you downloaded. Then select Begin Firmware Update.

4. Read the Confirm dialog box, then select Continue. You will be prompted to log in again when the process is complete.

This update can take up to 5 minutes to complete. While you're waiting, you could try the following:

- Think of the worst possible security questions for password recovery. "What are you thinking right now?" is one of my favorites.)
- See if you can remember how to extract a square root by hand. I dare you.
- Make a list of things that you can talk about in polite company but wouldn't dare Google on your work computer.

After the update is complete, the System page will display the new firmware version under System Information. Enjoy that new-firmware smell!
