

PRODUCT UPDATE

CG03137

1ft (0.3m) 18 AWG Outlet Saver Power Extension Cord (NEMA 5-15P to NEMA 5-15R)

Please note the following updates to one of our existing products, the **18 AWG Outlet Saver Power Extension Cord (NEMA 5-15P to NEMA 5-15R)**. In our continuous efforts to improve product quality and performance to align with industry standards, we have made some minor changes to the male connector and have updated the temperature rating.

What Has Changed?

1. The NEMA 5-15P now features a minor visual change with double lines around the pins.
2. The NEMA 5-15P connector dimensions have been changed from: 40mm \pm 0.8 mm x 26mm \pm 0.5mm x 25mm \pm 1mm (LxWxH) to: 38mm \pm 1mm x 21mm \pm 0.4mm x 23.6mm \pm 0.4mm (LxWxH).
3. The temperature rating has been upgraded from 75°C to 105°C to comply with the latest UL and CUL standards.

We want to reassure you that despite these changes, the cable's high performance remains unchanged, and there will be no impact on its usage.

During this transition, you may still receive shipments of the old product model until existing stock runs out with our distributors. Both the old and new models meet our quality standards.

If you have any questions or need more information, please don't hesitate to reach out. We appreciate your continued support and look forward to providing you with our improved product.
