

PRODUCT UPDATE

CG03131

6ft (1.8m) 14 AWG Premium Universal Power Cord (NEMA 5-15P to IEC320C13)

Please note the following updates to one of our existing products, the **14 AWG Premium Universal Power Cord (NEMA 5-15P to IEC320C13)**. In our continuous efforts to improve product quality and performance to align with industry standards, we have made some minor changes to the male connector and have updated the temperature rating.

PREVIOUS MODEL

UPDATED VERSION

What Has Changed?

1. The NEMA 5-15P now features a minor visual change with double lines around the pins.
2. The temperature rating has been upgraded from 75°C to 105°C to comply with the latest UL and CUL standards.

We want to reassure you that despite these changes, the cable's high performance remains unchanged, and there will be no impact on its usage. During this transition, you may still receive shipments of the old product model until existing stock runs out with our distributors. Both the old and new models meet our quality standards.

If you have any questions or need more information, please don't hesitate to reach out. We appreciate your continued support and look forward to providing you with our improved product.
