

Whether you joined us on the show floor or are catching up from afar, we're bringing the energy of InfoComm 2026 straight to your inbox. Under our theme, Where Solutions Live, we showcased award-winning innovations, expert insights, and connected AV solutions designed to help you create better experiences in the spaces where people work, learn, connect, and collaborate. Here's a quick look at what Legrand | AV shared, celebrated, and showcased this year.

Where Solutions Win

We're proud to celebrate 18 wins that reflect the power, performance, and ingenuity of solutions designed to help you create better AV experiences.

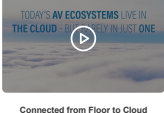

Training is Available Long After the Show

At InfoComm, we offered a full day of live Pro Training Room sessions – six practical courses covering real-world AV topics like AI in AV, ADA-conscious design, AVoIP, cloud management, and dLID. If you missed them – or want to keep learning – explore more training opportunities through Legrand University.

Connected from Floor to Cloud

Unveiled at InfoComm 2026, Legrand | AV's award-winning Unified Cloud Platform is an AI-powered remote monitoring and management solution powered by Xyle that helps teams gain real-time visibility, support predictive maintenance, and automate remediation across connected AV environments.
