<b>1</b>	<b>Introduction and Historical Survey</b>	
1.1	Overview . . . . .	1
1.2	Historical Survey. . . . .	3
<b>2</b>	<b>Classification and Structure</b>	
2.1	Phase Structure . . . . .	9
2.2	Phase Properties . . . . .	10
2.3	Polymer Structure. . . . .	12
	2.3.1 Nomenclature. . . . .	13
<b>3</b>	<b>Styrenic Block Copolymers</b>	
3.1	Common Features . . . . .	15
	3.1.1 Domain Theory . . . . .	15
	3.1.2 Filler Effects. . . . .	18
	3.1.3 Polystyrene/Elastomer Ratio. . . . .	19
	3.1.4 Clarity. . . . .	21
	3.1.5 Thermodynamics of Phase Separation. . . . .	22
	3.1.6 Miscibility with Other Polymers. . . . .	23
	3.1.7 Solubility. . . . .	25
3.2	Styrenic Block Copolymers Produced by Anionic Polymerization . . . . .	26
	3.2.1 Polymerization . . . . .	27
	3.2.2 Elastomer Segment . . . . .	29
3.3	Styrenic Block Copolymers Produced by Carbocationic Polymerization . . . . .	31
	3.3.1 Polymerization . . . . .	32
	3.3.2 Elastomer Block. . . . .	32
	3.3.3 Styrenic End Block . . . . .	33

<b>4 Multi Block Copolymers</b>	
4.1 Thermoplastic Elastomers Based on Polyurethanes, Polyethers, and Polyamides . . . . .	39
4.1.1 Polymerization . . . . .	40
4.1.2 Monomers and their Effects on Polymer Properties . . . . .	42
4.1.2.1 Polyurethane Thermoplastic Elastomers . . . . .	42
4.1.2.2 Polyester Thermoplastic Elastomers . . . . .	43
4.1.2.3 Polyamide Thermoplastic Elastomers . . . . .	43
4.1.3 Common Features . . . . .	45
4.2 Thermoplastic Elastomers Based on Polyolefins . . . . .	45
4.2.1 Segmental Structures . . . . .	46
4.2.2 Polymerization . . . . .	48
4.3 Miscellaneous Block Copolymers . . . . .	50
<b>5 Hard Polymer/Elastomer Combinations</b>	
5.1 Simple Blends . . . . .	54
5.2 Dynamic Vulcanizates . . . . .	59
<b>6 Graft Copolymers, Ionomers, and Core-Shell Morphologies</b>	
6.1 Importance . . . . .	65
6.2 Graft Copolymers . . . . .	65
6.2.1 Structure . . . . .	65
6.2.2 Chain Statistics . . . . .	66
6.2.3 Molecular Parameters . . . . .	67
6.2.4 Production . . . . .	69
6.2.5 Properties . . . . .	70
6.3 Ionomers . . . . .	71
6.4 Core-Shell Morphologies . . . . .	72
<b>7 Commercial Applications of Thermoplastic Elastomers</b>	
7.1 Styrenic Block Copolymers . . . . .	75
7.1.1 Styrenic Block Copolymers as Replacements for Vulcanized Rubber . . . . .	76
7.1.2 Styrenic Block Copolymers as Adhesives, Sealants, and Coatings . . . . .	80
7.1.2.1 Pressure Sensitive Adhesives . . . . .	81
7.1.2.2 Assembly Adhesives . . . . .	82
7.1.2.3 Sealants . . . . .	82
7.1.2.4 Coatings . . . . .	82
7.1.2.5 Oil Gels . . . . .	83

7.1.3	Styrenic Block Copolymers in Blends with Thermoplastics or Other Polymeric Materials . . . . .	83
7.1.3.1	Thermoplastics . . . . .	83
7.1.3.2	Thermosets . . . . .	85
7.1.3.3	Asphalt Blends . . . . .	85
7.1.3.4	Wax Blends . . . . .	86
7.2	Multi-Block Copolymers . . . . .	86
7.2.1	Replacements for Vulcanized Rubber . . . . .	88
7.2.2	Adhesives, Sealants, and Coatings . . . . .	90
7.2.3	Polymer Blends . . . . .	90
7.3	Hard Polymer/Elastomer Combinations . . . . .	91
7.3.1	Hard Polymer/Elastomer Combinations as Replacements for Vulcanized Rubber . . . . .	92
7.3.2	Polymer Blends . . . . .	93
<b>8</b>	<b>Economic Aspects, Tradenames and Glossary, Future Developments</b>	
8.1	Economic Aspects . . . . .	97
8.1.1	Price . . . . .	97
8.1.2	Commercial Sales . . . . .	97
8.2	Tradenames and Glossary . . . . .	98
8.3	Future Developments . . . . .	99
<b>Subject Index</b>	. . . . .	105
