Contents

Preface	V
1 Introduction and Planning	1
1.1 Introduction	1
1.2 Oversimplification	3
1.2.1 Definitions	3
1.3 Is Injection Molding the Right Choice for this Product?	4
1.4 The Injection Molding Machine	5
1.4.1 The Right Machine for the Mold	6
1.5 The Injection Mold	7
1.5.1 What Is an Injection Mold?	7
1.5.2 Elements of an Injection Mold	9
2 The Plastic Product	11
2.1 The Product Design	12
2.2 Product Drawings	13
2.2.1 Product Shape: How Can the Product Best Be Molded?	13
2.2.2 Parting Line (P/L)	13
2.2.3 Side Cores	15
2.3 Accuracy and Tolerances Required	18
2.3.1 General and Specific Tolerances	20
2.3.2 Are Special Fits with Matching Products Required?	21
2.3.3 Tolerances for the Filling Volume	21
2.3.4 Stacking of Products and Free Dispensing	22
2.3.5 Mismatch (Deliberate)	23
2.4 Tolerances, Mold Alignment, and Mold Costs	25
2.5 Heat Expansion, Alignment, and Mold Cost	28
2.6 Surface Finish	29
2.6.1 Finish of Molding Surfaces	29
2.6.2 Texturing of Surfaces	30
2.6.3 Fitting Surfaces of Mold Parts	31
2.7 Engravings	31
2.7.1 Engravings Versus Applied Labels	31
2.7.2 Two-Color and Two-Material Engraving	32
2.7.3 Depth of Engravings	32

2.7.4	Font Style and Size of Artwork	33
2.7.5	Polarity of Engraving	33
2.7.6	Are the Locations Selected for Engraving Practical?	34
2.7.7	Engravings in the Walls and Bottoms of Products	34
2.8	General Appearance of the Product	37
2.8.1	Flatness	37
2.8.2	Sinks and Voids	39
2.8.3	Witness Lines	40
2.8.4	Weld Lines	43
2.8.5	Surface Defects (Flow Marks, Splay, Record Grooves, Haze, Jetting, Hooks, and Ripples)	43
2.8.6	Identification of the Molded Piece	44
2.9	Product Strength Requirements	45
2.9.1	Gate Location to Increase Product Strength	46
2.10	Special Features	46
2.10.1	Holes and Counter Bores for Assembly Screws or Rivets	47
2.10.2	Hinges and Snaps for Assembly	47
3	Cost Factors Affecting Productivity	49
3.1	Where Will the Mold Be Operated?	49
3.1.1	Condition of Ambient (Shop) Air	49
3.2	Coolant Supply	51
3.2.1	Is the Coolant Supply Large Enough for the Planned Mold?	51
3.2.2	Is the Cooling Water Clean?	51
3.3	Power Supply	52
3.4	Will the Mold Run in a Variety of Machines or a Single Machine?	53
3.5	Is the Mold Planned to Run in a Newly Created Operation?	54
3.6	Projected Requirements	55
3.6.1	Making Prototype or Experimental Molds	55
3.6.2	Production Molds	57
3.7	Forecasting the Cycle Time	59
3.7.1	Type of Plastic Molded	60
3.7.2	Wall Thickness of Product	60
3.7.3	Mold Materials	61
3.7.4	Efficiency of Cooling	62
3.7.5	Venting	66
3.7.6	Effect of Molding Machine on Cycle Time	67
3.7.7	Ejection	85
3.7.8	Ambient Temperatures and Humidity	94

3.7.9	Comparing Molding Cycles of the Same Product in New Molds	94
3.8	Number of Cavities Required	95
3.8.1	Available Operating Time	95
3.8.2	The Minimum Number of Cavities	96
3.8.3	Machine Hour Cost per Unit Molded	97
3.8.4	Mold Cost per Unit Molded	99
3.8.5	Calculation of the Required Clamp Size	100
3.8.6	Shot Size	102
3.8.7	Plasticizing Capacity	102
3.8.8	Preferred (Practical) Number of Cavities	102
3.8.9	Business Decisions	104
3.8.10	Preliminary Estimate of Product Cost	105
4	Mold Selection	113
4.1	Selection of an Appropriate Mold	113
4.1.1	Dedicated Mold, Universal Mold Shoe	113
4.1.2	“One-Product” Molds or “Family” Molds?	114
4.1.3	Where to Gate	116
4.1.4	Gate Size and Runner Systems	123
4.1.5	Hot Runner Molds	125
4.1.6	Single Cavity Molds	129
4.1.7	Two and More Cavities, Cold or Hot Runner Molds	135
4.1.8	Single- or Multi-Level Molds?	142
4.1.9	Semi or Fully Automatic Operation?	154
4.1.10	Insert Molding	155
4.2	Summary	158
5	Mold Cost, Mold Price and Delivery	159
5.1	Mold Cost and Records	159
5.1.1	Spare Parts for the Mold	160
5.1.2	The Basic Elements of the Mold Cost	161
5.1.3	Cost of the Preparation of a Mold Manual	170
5.2	Overhead	170
5.3	Mold Price	171
5.3.1	Risk Factor	173
5.4	Mold Cost Is Absorbed by the Molder	175
5.5	Arriving at Mold Cost and Delivery Time	175
5.5.1	Calculating the Mold Cost	176
5.5.2	Estimating the Mold Cost	176

5.5.3	“Guesstimating” the Mold Cost	180
5.5.4	“Ball Parking” the Mold Price	180
5.5.5	Mold Price Catalogue	180
5.6	The Quotation	181
5.6.1	Delivery Time	181
5.6.2	Confirmation	182
5.7	In-House Mold Making Operations	183
6	Warranties, Patents, and Ethical Considerations	185
6.1	Warranties and Guaranties	185
6.1.1	Guaranteed Quality	185
6.1.2	Guaranteed Shrinkage	185
6.1.3	Guaranteed Cycle Time	186
6.1.4	Guaranteed Delivery	186
6.2	Patents and Ethical Considerations	186
6.2.1	Patents	187
6.2.2	Ethical Considerations	189
	References	191
	Appendix	193
	Appendix 1: Suggested Contents of a Mold Manual	193
	Appendix 2: Mold Set-up Guide Blank	194
	Appendix 3: Example of Light-Weighting a Product and Increasing Productivity	197
	Appendix 4: Buying a Mold	199
	Appendix 5: Suggested Format of a Confirmation of Order	204
	Appendix 6: Molding Properties of Injection-Grade Plastics	208
	Appendix 7: General Properties	210
	Appendix 8: Mechanical Properties	212
	Appendix 9: Thermal Properties	216
	Appendix 10: Typical Mold Materials	220
	Appendix 11: What Characterizes a Good, High-production Mold?	222
	Appendix 12: Advice for the Mold Designer	225
	Appendix 13: Surface Finishes	228
	Index	229
