Plastics Additives Handbook

Herausgegeben von Hans Zweifel, Ralph D. Maier, Michael Schiller

ISBN: 978-3-446-40801-2

For further information and order see

or contact your bookseller.

# Table of Content

- 1 Antioxidants
- 2 Light Stabilizers
- 3 PVC Stabilizers
- 4 Acid Scavengers
- 5 Lubricants
- 6 Polymer Processing Aids
- 7 Anti-blocking Additives
- 8 Slip Additives
- 9 Antifogging Additives
- 10 Antistatic Additives
- 11 Antimicrobials
- 12 Flame Retardants
- 13 Chemical Blowing Agents
- 14 Crosslinking and Controlled Degradation of Polyolefins (Peroxides)
- 15 Colorants
- 16 Fluorescent Whitening Agents
- 17 Fillers and Reinforcements/Coupling Agents
- 18 Nucleating Agents for Semi-crystalline Polymers
- 19 Additives for Mechanical Recycling of Plastics
- 20 The Physical Behavior of Polymer Additives
- 21 Analytical
- 22 Aspects of Plastics Additives Related to Health, Safety and Environment

# Content

## 1 Antioxidants

*Dr. K. Schwarzenbach, Dr. B. Gilg, D. Müller, Dr. G. Knobloch,  
J.-R. Pauquet, Dr. P. Rota-Graziosi, Dr. A. Schmitter, J. Zingg,  
Ciba Inc., Additives Division, Basel, Switzerland  
Prof. Dr. E. Kramer, FH Aarau, Brugg-Windisch, Switzerland*

1.1	Introduction . . . . .	1
1.2	Economic Situation . . . . .	1
1.3	Principles of Oxidative Degradation . . . . .	3
1.3.1	Introduction . . . . .	3
1.3.2	Autoxidation . . . . .	4
1.4	Inhibited Autoxidation . . . . .	9
1.5	Basic Antioxidant Mechanisms . . . . .	10
1.5.1	H-donors . . . . .	10
1.5.1.1	Aromatic Amines . . . . .	11
1.5.1.2	Phenols . . . . .	11
1.5.2	Hydroperoxide Decomposers (HD) . . . . .	13
1.5.2.1	Phosphites/Phosphonites . . . . .	14
1.5.2.2	Thiosynergists . . . . .	14
1.5.3	Alkyl Radical Scavengers . . . . .	15
1.5.3.1	Hindered Amine Stabilizers (HAS) . . . . .	15
1.5.3.2	Hydroxyl Amines . . . . .	17
1.5.3.3	Benzofuranone Derivatives . . . . .	17
1.5.3.4	Acryloyl Modified Phenols . . . . .	17
1.5.4	Metal Deactivators . . . . .	18
1.5.5	Multifunctional Stabilizers . . . . .	19
1.5.6	Blends of Stabilizers . . . . .	19
1.6	Testing of Antioxidants . . . . .	19
1.6.1	General Remarks . . . . .	19
1.6.2	Failure Mechanisms in Polymers . . . . .	19
1.6.2.1	Amorphous Polymers . . . . .	19
1.6.2.2	Semi-crystalline Polymers . . . . .	20
1.6.3	Preparation of Samples . . . . .	22
1.6.3.1	Laboratory Methods . . . . .	22
1.6.3.2	Production Scale Incorporation of Additives . . . . .	23
1.6.4	Overview of Test Methods . . . . .	23
1.6.5	Melt Processing Stability . . . . .	24
1.6.6	Thermal Analysis . . . . .	28
1.6.7	Chemiluminescence . . . . .	30
1.6.8	Testing Long-Term Thermal Stability . . . . .	31
1.6.8.1	Oven Aging Techniques . . . . .	31

1.6.8.2	Testing under External Stress . . . . .	36
1.6.9	Lifetime Prediction . . . . .	39
1.7	Stabilization of Selected Substrates . . . . .	40
1.7.1	Polyolefins . . . . .	40
1.7.1.1	General Aspects . . . . .	40
1.7.1.2	Specific Requirements for Special Applications . . . . .	61
1.7.2	Elastomers . . . . .	64
1.7.2.1	Polybutadiene (BR) . . . . .	64
1.7.2.2	Polysisoprene (IR) . . . . .	66
1.7.2.3	Styrene Butadiene Rubber, Random (SBR) . . . . .	66
1.7.2.4	Acrylonitrile Butadiene Copolymer (Nitrile Rubber, NBR) . . . . .	67
1.7.2.5	Ethylene Propylene Copolymers (EPR, EPDM) . . . . .	68
1.7.2.6	Thermoplastic Rubbers . . . . .	69
1.7.2.7	Styrene Butadiene Latex (X-SBR) . . . . .	71
1.7.3	Polystyrene, Impact Modified Polystyrene and Copolymers . . . . .	72
1.7.3.1	Crystal Polystyrene (CPS) . . . . .	72
1.7.3.2	Styrene-Acrylonitrile Copolymer (SAN) . . . . .	73
1.7.3.3	High Impact Polystyrene (HIPS) . . . . .	74
1.7.3.4	Mass Transparent Impact Modified Polystyrene . . . . .	75
1.7.3.5	Acrylonitrile-Butadiene-Styrene Copolymers (ABS) . . . . .	77
1.7.3.6	Methyl Methacrylate-Butadiene-Styrene Copolymers (MBS) . . . . .	79
1.7.3.7	Other Styrene-based Graft Copolymers . . . . .	80
1.7.4	Polyamides (PA) . . . . .	80
1.7.4.1	Aliphatic Polyamides . . . . .	80
1.7.4.2	Aromatic Polyamides . . . . .	84
1.7.5	Polyesters . . . . .	84
1.7.5.1	Poly(ethylene terephthalate) (PET) . . . . .	84
1.7.5.2	Poly(butylene terephthalate) (PBT) . . . . .	85
1.7.6	Polyacetals . . . . .	86
1.7.7	Polycarbonate, PC . . . . .	88
1.7.8	Polyurethanes (PUR) . . . . .	88
1.7.9	High Performance Engineering Thermoplastics . . . . .	91
1.7.10	Polymer Blends and Alloys . . . . .	91
1.8	Technological Trend . . . . .	92
1.9	References . . . . .	92
1.10	Appendix A: Chemical Structures, CAS – Numbers, Producers and Tradenames of Stabilizers . . . . .	97
1.10.1	Primary Antioxidants . . . . .	98
1.10.2	Secondary Antioxidants/Phosphites/Phosphonites . . . . .	109
1.10.3	Secondary Antioxidants/Sulfur Compounds . . . . .	112
1.10.4	Metal Deactivators . . . . .	113
1.10.5	Ni-Quenchers . . . . .	114

1.10.6	UV-Absorbers . . . . .	116
1.10.7	Hindered Amine Stabilizers HA(L)S . . . . .	123
1.10.8	Mailing Addresses of Suppliers . . . . .	137
<b>2</b>	<b>Light Stabilizers</b>	
	<i>F. Gugumus, Consultant, CH-4123 Allschwil, Switzerland</i>	
2.1	Introduction . . . . .	139
2.2	Photodegradation of Synthetic Polymers . . . . .	141
2.2.1	Ultra-Violet Spectrum of Sunlight . . . . .	141
2.2.2	Physico-Chemical Processes Occurring on Light Absorption . . . . .	143
2.2.3	Energy of Light and Its Absorption . . . . .	150
2.2.4	Photo-oxidation Scheme . . . . .	152
2.2.5	Photo-oxidation of Polyolefins . . . . .	152
2.2.5.1	Photo-oxidation of PP . . . . .	159
2.2.5.2	Photo-oxidation of PE . . . . .	161
2.2.6	Photo-oxidation of Elastomers . . . . .	164
2.2.7	Photo-oxidation of Styrenic Polymers . . . . .	166
2.2.8	Photo-oxidation of Polyamides . . . . .	169
2.2.8.1	Aliphatic Polyamides . . . . .	169
2.2.8.2	Aromatic Polyamides . . . . .	172
2.2.9	Photo-oxidation of Polyvinyl Chloride . . . . .	173
2.2.10	Photo-oxidation of Polycarbonate . . . . .	176
2.2.11	Photo-oxidation of Polyacetals . . . . .	181
2.2.12	Photo-oxidation of PUR . . . . .	182
2.2.13	Photo-oxidation of Linear Polyester . . . . .	186
2.2.14	Photo-oxidation of Thermoplastic Polyester Elastomers . . . . .	190
2.2.15	Photo-oxidation of Polyacrylates and Polymethacrylates . . . . .	190
2.2.16	Photo-oxidation of PPE . . . . .	193
2.2.17	Photo-oxidation of Polysulfone . . . . .	198
2.2.18	Photo-oxidation of Epoxy Resins . . . . .	201
2.2.19	Photo-oxidation of Other Polymers . . . . .	204
2.3	Mechanisms of UV Stabilization . . . . .	204
2.3.1	UV Absorption . . . . .	204
2.3.2	Quenching . . . . .	215
2.3.3	Hydroperoxide Decomposition . . . . .	219
2.3.4	Free Radical Scavenging . . . . .	219
2.3.5	Hindered Amine Light Stabilizers (HALS) . . . . .	221
2.3.5.1	Stabilization Mechanisms of HALS Oxidation Products . . . . .	221
2.3.5.2	Stabilization Mechanisms of HALS . . . . .	228
2.4	Light Stabilizer Testing . . . . .	236
2.4.1	Artificial Weathering . . . . .	236
2.4.2	Natural Weathering . . . . .	239
2.4.3	Influence of Pigments on Light Stabilizer Testing . . . . .	240

2.5	Technical Aspects of Light Stabilization . . . . .	242
2.5.1	Stability and Volatility . . . . .	242
2.5.2	Solubility, Compatibility, Migration and Extraction of Light Stabilizers . . . . .	244
2.5.3	Handling and Safety . . . . .	244
2.5.4	Practical Aspects of Light Stabilization . . . . .	245
2.5.5	Structures of Light Stabilizers . . . . .	245
2.6	Stabilization of Selected Plastics . . . . .	245
2.6.1	Stabilization of Polyolefins . . . . .	246
2.6.1.1	UV Stabilization of PP . . . . .	246
2.6.1.2	Stabilization of PE . . . . .	286
2.6.2	Stabilization of Elastomers . . . . .	329
2.6.2.1	Light Stabilization of Adhesives . . . . .	336
2.6.3	Stabilization of Styrenic Polymers . . . . .	342
2.6.4	Stabilization of Polyamides . . . . .	350
2.6.4.1	Stabilization of Polyamide Fibers . . . . .	359
2.6.5	Stabilization of Polyvinyl Chloride . . . . .	362
2.6.6	Stabilization of Polycarbonate . . . . .	367
2.6.7	Stabilization of Polyacetal . . . . .	370
2.6.8	Stabilization of Polyurethane . . . . .	378
2.6.9	Stabilization of Linear Polyesters . . . . .	387
2.6.10	Stabilization of Unsaturated Polyesters . . . . .	392
2.6.11	Stabilization of Thermoplastic Polyester Elastomers . . . . .	393
2.6.12	Stabilization of Polyacrylates . . . . .	393
2.6.13	Stabilization of Polyphenylene Ether . . . . .	396
2.6.14	Stabilization of Polysulfones . . . . .	399
2.6.15	Stabilization of Epoxy Resins . . . . .	400
2.6.16	Stabilization of Other Polymers . . . . .	401
2.7	List of Tradenames and Suppliers . . . . .	401
2.8	References . . . . .	401

### 3 PVC Stabilizers and Plasticizers

*W. H. Starnes, Jr., College of William and Mary, Williamsburg, VA 23187-8795,  
USA*

*T. C. Jennings, Shaker Heights, OH, USA, L. G. Krauskopf, Vinyl Consulting  
Co. Inc., Baton Rouge, LA, USA*

3.1	World PVC Stabilizer Market . . . . .	425
3.2	Chemistry of Degradation and Stabilization . . . . .	426
3.3	Mechanism of Thermal Dehydrochlorination . . . . .	427
3.3.1	Thermally Labile Structural Defects . . . . .	427
3.3.2	Hypothetical Labile Structures . . . . .	429
3.3.3	Polyene Elongation . . . . .	429
3.3.3.1	Ion-Pair/Quasiionic Mechanism . . . . .	429

3.3.3.2	Other Proposed Mechanisms . . . . .	430
3.3.3.3	Autocatalysis . . . . .	432
3.4	Thermal Stabilization . . . . .	433
3.4.1	General Mechanisms . . . . .	433
3.4.2	Stabilizers Containing Metals . . . . .	433
3.4.3	Organic Stabilizers . . . . .	435
3.4.3.1	Costabilizers . . . . .	435
3.4.3.2	Principal Stabilizers (Ester Thiols) . . . . .	436
3.5	Lead Stabilizers . . . . .	439
3.5.1	Lead Stabilizer Chronology . . . . .	439
3.5.2	Lead Stabilizer Manufacturing . . . . .	441
3.5.3	Lead Stabilization Mechanisms . . . . .	441
3.5.4	Lead Stabilizers of Commercial Importance . . . . .	442
3.5.5	Lead Stabilizer Strengths and Weaknesses . . . . .	442
3.5.6	Lead Stabilizer/Lubricant Use Levels . . . . .	444
3.6	Organotin Stabilizers . . . . .	444
3.6.1	Organotin Stabilizer Chronology . . . . .	445
3.6.2	Organotin Stabilizer Manufacturing . . . . .	447
3.6.3	Organotin Stabilizer Mechanisms . . . . .	449
3.6.4	Organotin Stabilizers of Commercial Importance . . . . .	449
3.6.5	Organotin Stabilizer Synergists . . . . .	451
3.6.6	Lubrication of Organotin Stabilizers . . . . .	452
3.6.7	Organotin Stabilizer Strengths and Weaknesses . . . . .	452
3.6.8	Organotin Stabilizer/Lubricant Use Levels . . . . .	453
3.7	Mixed Metal Stabilizers . . . . .	453
3.7.1	Mixed Metal Chronology . . . . .	453
3.7.2	Mixed Metal Manufacturing . . . . .	455
3.7.3	Mixed Metal Stabilizer Mechanisms . . . . .	457
3.7.4	Mixed Metal Stabilizer Synergists . . . . .	459
3.7.4.1	Epoxy Esters . . . . .	461
3.7.4.2	Phosphite Esters . . . . .	462
3.7.4.3	Minor Organic Synergists . . . . .	464
3.7.4.4	Inorganic Acid Scavengers . . . . .	464
3.7.5	Mixed Metal Strengths and Weaknesses . . . . .	464
3.7.6	Mixed Metal Stabilizer/Lubricant Use Levels. . . . .	465
3.8	PVC Stabilizer Environmental Concerns . . . . .	466
3.8.1	General Environmental Concerns . . . . .	466
3.8.2	Lead Environmental Concerns . . . . .	467
3.8.3	Cadmium Environmental Concerns . . . . .	468
3.8.4	Barium Environmental Concerns . . . . .	469
3.8.5	Organotin Environmental Concerns . . . . .	470
3.8.6	Stabilizers Based Upon Food Additives . . . . .	471
3.9	Test Methods . . . . .	474
3.9.1	Heat Stability Testing . . . . .	474

3.9.1.1	Static Heat Tests . . . . .	474
3.9.1.2	Dynamic Heat Tests . . . . .	475
3.9.1.3	Determination of Dehydrochlorination . . . . .	475
3.9.1.4	Residual Heat Stability . . . . .	475
3.9.2	Testing the Effects of Heat Stabilizers on Processing Properties . . . . .	476
3.9.3	Testing Electrical Properties . . . . .	476
3.9.4	Fogging Test . . . . .	476
3.9.5	Testing Weathering and Light Stability . . . . .	477
3.10	Acknowledgment . . . . .	477
3.11	Index of Tradenames and Suppliers of PVC Stabilizers . . . . .	478

## 4 Acid Scavengers

*A. Holzner, Dr. K. Chmil, Baerlocher GmbH, Unterschleissheim, Germany*

4.1	Introduction . . . . .	515
4.2	Basic Principles of Mechanism/Action . . . . .	515
4.3	Physical and Chemical Descriptions of the Additives . . . . .	517
4.3.1	Metallic Stearates . . . . .	517
4.3.2	Hydrotalcite . . . . .	520

4.3.3	Hydrocalumite . . . . .	521
4.3.4	Zinc Oxide . . . . .	522
4.4	Incorporation of Additives in the Polymers . . . . .	523
4.5	Testing Additives in the Polymers . . . . .	523
4.5.1	Corrosion Resistance Test . . . . .	523
4.5.2	Multiple Extrusion . . . . .	524
4.5.3	Yellowness Index (ASTM D-1925; DIN ISO 6167) . . . . .	525
4.5.4	Melt Flow Index/Melt Volume Index (ASTM D1238-95; DIN ISO 1133-1991) . . . . .	525
4.5.5	Filtration Index . . . . .	525
4.6	Examples of Formulations and Additive Performance in Various Polymers . . . . .	526
4.7	Interference with Other Additives . . . . .	535
4.8	Technological Trends . . . . .	535
4.9	Conclusion . . . . .	535
4.10	List of Manufacturers per Product Group . . . . .	536
4.11	References . . . . .	537

## 5 Lubricants

*Dr. E. Richter, Clariant GmbH, Werk Gersthofen, Germany*

5.1	Introduction . . . . .	539
5.1.1	Lubricants for Plastics Processing . . . . .	539
5.1.2	Definitions and Distinctions . . . . .	540
5.1.3	Commercial Importance of Lubricants . . . . .	540
5.2	Effects of Lubricants . . . . .	542
5.2.1	Understanding the Lubricating Effect . . . . .	542
5.2.2	Internal Lubricating Effects . . . . .	544
5.2.2.1	Viscosity Reduction . . . . .	544
5.2.2.2	Reduction of Heat Dissipation . . . . .	547
5.2.3	External Lubricating Effects . . . . .	548
5.2.3.1	Release Effect . . . . .	548
5.2.3.2	Plastification Retarding (Friction-Reducing) Effect . . . . .	550
5.2.3.3	Prevention of Melt Fracture . . . . .	550
5.2.4	Effects on Finished Part Surfaces . . . . .	551
5.2.4.1	Mold-Release Effect . . . . .	551
5.2.4.2	Slip Effect . . . . .	553
5.2.4.3	Antiblocking and Antislip Effects . . . . .	553
5.2.5	Dispersing Effect . . . . .	553
5.3	Testing Lubricants . . . . .	555
5.3.1	Product Characterization . . . . .	555
5.3.2	Tests on Plastic Melts . . . . .	557
5.3.2.1	Capillary Viscometry . . . . .	557
5.3.2.2	Spiral Flow Test . . . . .	558
5.3.2.3	Testing Weld Line Strength . . . . .	558

5.3.2.4	Demolding Force . . . . .	558
5.3.2.5	Laboratory Kneader (Plastograph) . . . . .	559
5.3.2.6	Extrusiometer . . . . .	560
5.3.2.7	Melt Strength . . . . .	561
5.3.2.8	Roll Mill Tests . . . . .	562
5.3.3	Finished Part Testing . . . . .	563
5.3.3.1	Gloss and Smoothness . . . . .	563
5.3.3.2	Slip Measurements . . . . .	563
5.4	Lubricant Product Groups and Their Properties . . . . .	563
5.4.1	Structure/Effect Relationships . . . . .	563
5.4.2	Important Lubricant Product Groups . . . . .	563
5.4.2.1	Fatty Alcohols and Their Dicarboxylic Acid Esters . . . . .	564
5.4.2.2	Fatty Acid Esters of Short-Chain Alcohols . . . . .	565
5.4.2.3	Fatty Acids . . . . .	565
5.4.2.4	Fatty Acid Amides . . . . .	565
5.4.2.5	Metal Soaps . . . . .	565
5.4.2.6	Oligomeric Fatty Acid Esters (Fatty Acid Complex Esters) . . . . .	566
5.4.2.7	Fatty Acid Esters of Long-Chain Alcohols . . . . .	566
5.4.2.8	Montan Waxes . . . . .	566
5.4.2.9	Polar PE Waxes . . . . .	566
5.4.2.10	Polar PP Waxes . . . . .	567
5.4.2.11	Non-polar PE Waxes . . . . .	567
5.4.2.12	PP Waxes . . . . .	568
5.4.2.13	Natural and Synthetic Paraffin Waxes . . . . .	568
5.4.2.14	Fluoropolymers . . . . .	568
5.4.2.15	Other Groups of Lubricants . . . . .	568
5.4.2.16	Blends and Combinations of Lubricants . . . . .	569
5.4.2.17	Toxicological and Environmental Aspects . . . . .	569
5.5	Practical Use of Lubricants . . . . .	570
5.5.1	Lubricants for PVC . . . . .	570
5.5.2	Lubricants for Styrenic Polymers . . . . .	573
5.5.3	Lubricants for Polyolefins . . . . .	573
5.5.4	Lubricants for Engineering Thermoplastics . . . . .	574
5.6	Technological Trends and Outlook . . . . .	576
5.7	List of Trade Names and Suppliers . . . . .	577
5.8	References . . . . .	579

## 8 Slip Additives

*F. Wylin, Uniqema, Everberg, Belgium*

8.1	Introduction . . . . .	629
8.2	Basic Principles of Additive Action . . . . .	629
8.3	Description of Slip Additives . . . . .	630
8.4	Structures of Slip Additives . . . . .	632
8.5	Incorporation of Slip Additives in Polymers . . . . .	632
8.6	Testing of Slip Performance . . . . .	632
8.7	Examples of Formulations/Performance of Additives in Various Polymers . . . . .	633
8.8	Trends . . . . .	634
8.9	List of Trade Names and Suppliers . . . . .	634
8.10	References . . . . .	635

## 9 Antifogging Additives

*F. Wylin, Uniqema, Everberg, Belgium*

9.1	Introduction . . . . .	637
9.1.1	Food Packaging Films . . . . .	638
9.1.2	Agricultural Film . . . . .	638
9.1.2.1	Black Mulching Film . . . . .	638
9.1.2.2	Small Tunnels . . . . .	638
9.1.2.3	Large Domes/Large Greenhouses . . . . .	638
9.1.2.4	Flat Lay, Perforated, Temporary Protection Film . . . . .	639
9.1.2.5	Heat Retention Film for Glass Greenhouses . . . . .	639
9.2	Basic Principles of Action of Antifogging Additives . . . . .	640
9.3	Description of Antifogging Additives . . . . .	643
9.3.1	Types of Antifogging Additives . . . . .	643
9.3.2	Commercial Antifogging Additives . . . . .	643
9.4	Structure of Antifogging Additives . . . . .	644
9.5	Incorporation of Antifogging Additives into Polymers . . . . .	645
9.6	Testing of Antifogging Performance . . . . .	646
9.6.1	Evaluation Test Procedures . . . . .	646
9.6.2	Tests for Food Packaging Films . . . . .	646
9.6.2.1	The Cold 'Fog' Test . . . . .	646
9.6.2.2	The Hot 'Fog' Test . . . . .	647
9.6.3	Tests for Agricultural Films . . . . .	648
9.7	Examples of Formulations and Performance of Antifogging Additives in Various Polymers . . . . .	649
9.7.1	Food Packaging Film . . . . .	649
9.7.2	Agricultural Film . . . . .	650
9.8	Trends . . . . .	652
9.9	List of Trade Names and Suppliers . . . . .	653
9.10	References . . . . .	654

**10 Antistatic Additives***F. Wylin, Uniqema, Everberg, Belgium*

10.1	Introduction . . . . .	655
10.2	Basic Principles of Action of Antistatic Additives . . . . .	656
10.2.1	External Antistatic Additives . . . . .	656
10.2.2	Internal Antistatic Additives . . . . .	657
10.2.3	Conductive Fillers . . . . .	658
10.3	Description of Antistatic Additives . . . . .	660
10.3.1	Non-ionic Antistatic Additives . . . . .	660
10.3.1.1	Fatty Acid Esters . . . . .	660
10.3.1.2	Ethoxylated Alkylamines . . . . .	662
10.3.1.3	Diethanolamides . . . . .	663
10.3.1.4	Ethoxylated Alcohols . . . . .	663
10.3.2	Anionic Antistatic Additives . . . . .	664
10.3.3	Cationic Antistatic Additives . . . . .	664
10.3.4	Amphoteric Antistatic Additives . . . . .	664
10.4	Structures of Antistatic Additives . . . . .	664
10.5	Incorporation of Antistatic Additives into Polymers . . . . .	666
10.6	Testing Antistatic Performance . . . . .	666
10.6.1	Qualitative Testing . . . . .	666
10.6.2	Quantitative Testing . . . . .	666
10.6.3	Connection between Half-life Value and Surface Resistivity [2] . .	667
10.7	Examples of Formulations and Performance of Antistatic Additives in Various Polymers . . . . .	668
10.7.1	Polyolefins . . . . .	668
10.7.2	Styrenics . . . . .	669
10.7.3	PVC . . . . .	669
10.7.4	Engineering Polymers . . . . .	672
10.8	Trends . . . . .	672
10.9	List of Tradenames and Suppliers . . . . .	672
10.10	References . . . . .	673

**11 Antimicrobials***D. Ochs, Ciba Inc., Grenzach-Wylen, Germany*

11.1	Introduction . . . . .	675
11.2	Use of Antimicrobials and Requirements . . . . .	678
11.2.1	Biostabilizers (Preservatives) . . . . .	679
11.2.2	Antimicrobial Active Ingredients . . . . .	679
11.2.3	Requirements of Antimicrobials . . . . .	679
11.2.4	Antimicrobials as Biostabilizers . . . . .	679
11.2.4.1	Manifestation of Biodeterioration . . . . .	682
11.2.5	Antimicrobials as Active Ingredients . . . . .	683
11.2.5.1	Effects of Active Ingredients . . . . .	684

11.3	Mode of Action . . . . .	685
11.4	Test Methods . . . . .	686
11.4.1	Agar Plate Tests . . . . .	686
11.4.2	Direct Contamination of the Test Specimen . . . . .	689
11.4.3	In-Use Tests . . . . .	690
11.4.4	Other Useful Test Methods . . . . .	690
11.4.4.1	Standard Methods . . . . .	692
11.5	Regulations Related to Antimicrobials . . . . .	693
11.5.1	USA . . . . .	693
11.5.2	Europe . . . . .	694
11.6	Future Trends . . . . .	694
11.7	List of Products, Tradenames, and Suppliers . . . . .	695
11.8	References . . . . .	698

## **12 Flame Retardants**

*Paul F. Ranken, Albemarle Corporation, Baton Rouge, Louisiana, USA*

12.1	Introduction . . . . .	701
12.2	Flame Retardant Mechanisms . . . . .	702
12.3	Organic Flame Retardant Structures, Physical Properties, and Typical Uses . . . . .	705
12.4	Typical Flame Retardant Formulations . . . . .	708
12.5	Evaluation of Flame Retardants . . . . .	710
12.6	Technological Trends . . . . .	712
12.7	List of Trade Names, Manufacturers/ Suppliers . . . . .	715
12.8	References . . . . .	717

## **13 Chemical Blowing Agents**

*H. Hurnik, Lanxess Deutschland GmbH, Dormagen, Germany*

13.1	Introduction . . . . .	719
13.2	Basic Principles and Function of Blowing Agents . . . . .	719
13.2.1	General Requirements and Choices . . . . .	720
13.2.2	Main Properties . . . . .	720
13.3	Product Classes and Mechanisms of Action . . . . .	721
13.3.1	Azo Compounds . . . . .	722
13.3.1.1	Azodicarbonamide (ADC) . . . . .	722
13.3.1.2	Mechanism of Decomposition . . . . .	722
13.3.1.3	Methods of Affecting the Decomposition of ADC . . . . .	724
13.3.2	Hydrazine Derivatives . . . . .	727
13.3.2.1	p-Toluenesulfonylhydrazide (TSH) . . . . .	727
13.3.2.2	4,4'-Oxibis (Benzenesulfonylhydrazide) (OB SH) . . . . .	728
13.3.3	Semicarbazides . . . . .	729
13.3.3.1	p-Toluenesulfonylsemicarbazide (TSSC) . . . . .	729
13.3.3.2	Mechanism of TSSC Decomposition . . . . .	730
13.3.4	Tetrazoles . . . . .	731

13.3.4.1	5-Phenyltetrazole (5-PT) . . . . .	731
13.3.5	Nitroso Compounds . . . . .	732
13.3.5.1	N,N'-Dinitroso-pentamethylenetetramine (DNPT) . . . . .	732
13.3.6	Carbonates . . . . .	733
13.3.6.1	Sodium Bicarbonate ( $\text{NaHCO}_3$ ) . . . . .	733
13.3.6.2	Mechanism of $\text{NaHCO}_3$ Decomposition . . . . .	733
13.4	Blowing Agent Preparations . . . . .	734
13.5	Testing Chemical Blowing Agents . . . . .	735
13.6	Incorporation of Chemical Blowing Agents into Polymers . . . . .	736
13.6.1	Commercial Forms . . . . .	736
13.6.2	Applications . . . . .	736
13.6.3	The Polymers . . . . .	737
13.6.4	Commercial significance . . . . .	738
13.7	Processing and Applications . . . . .	739
13.8	Technological Trends and Outlook . . . . .	741
13.9	List of Trade names and Manufacturers of Chemical Blowing Agents . . . . .	742
13.10	References . . . . .	743

## **14 Crosslinking and Controlled Degradation of Polyolefins**

*Dr. Dan Munteanu, BASF Catalysts, Timisoara, Romania*

14.1	Introduction . . . . .	745
14.2	Principles of Polyolefin Crosslinking and Controlled Degradation . . . . .	747
14.2.1	Generation and Fate of Macroradicals in Polyolefins . . . . .	747
14.2.1.1	Free Radical Systems in Polyolefins . . . . .	747
14.2.1.2	Chain-scission versus Branching and Crosslinking . . . . .	749
14.2.1.3	Grafting Functional Monomers . . . . .	751
14.2.2	Irradiation Crosslinking . . . . .	752
14.2.3	Peroxide Crosslinking . . . . .	754
14.2.4	Silane Crosslinking . . . . .	755
14.2.4.1	Silane-functionalized Polyolefins . . . . .	755
14.2.4.2	Moisture-crosslinking of Silane-functionalized Polyolefins . . . . .	757
14.3	Organic Peroxides for Crosslinking, Chain-scission and Grafting . . . . .	759
14.3.1	Structures and General Properties . . . . .	760
14.3.2	Peroxide Decomposition . . . . .	764
14.3.3	Storage and Safety Requirements . . . . .	771
14.3.4	Major Producers and Commercial Grades of Peroxides . . . . .	772
14.4	Organofunctional Silanes . . . . .	774
14.4.1	Structures and General Properties . . . . .	774
14.4.2	Liquid Silane Formulations . . . . .	775
14.4.3	Dry Silane Formulations . . . . .	776
14.5	Incorporation of Peroxides and Silanes in Polyolefins . . . . .	777
14.5.1	Dosing Solid Additives. . . . .	778

14.5.2	Spraying Liquid Additives . . . . .	779
14.5.3	Direct Injection of Liquid Additives . . . . .	779
14.5.4	Additional Dosing Concerns . . . . .	779
14.6	Technical Aspects of Peroxide Crosslinking . . . . .	780
14.6.1	Selection of Peroxides . . . . .	781
14.6.2	Process Parameters . . . . .	782
14.6.2.1	Processing and Crosslinking Temperature . . . . .	782
14.6.2.2	Peroxide Concentration . . . . .	783
14.6.2.3	Polyolefin Structure . . . . .	783
14.6.2.4	Crosslinking Coagents . . . . .	785
14.6.2.5	Stabilization Packages . . . . .	786
14.6.2.6	Fillers and Other Auxiliaries . . . . .	787
14.6.3	Crosslinking Techniques . . . . .	787
14.6.3.1	Wire and Cable Insulation . . . . .	787
14.6.3.2	Pipes . . . . .	789
14.6.3.3	Injection Molding and Rotomolding . . . . .	789
14.6.4	Peroxide-related Crosslinking Techniques . . . . .	790
14.6.4.1	UHF Crosslinking . . . . .	790
14.6.4.2	Crosslinking with Highly Stable Initiators . . . . .	790
14.7	Technical Aspects of Silane Crosslinking . . . . .	791
14.7.1	Silane Grafted Polyolefins . . . . .	791
14.7.1.1	Two-step Processes . . . . .	791
14.7.1.2	One-step Processes . . . . .	792
14.7.1.3	Dry Silane Processes . . . . .	793
14.7.2	Ethylene-silane Random Copolymers . . . . .	793
14.7.3	Moisture-crosslinking of Silane-modified Polyolefins . . . . .	795
14.7.3.1	Influence of Process Parameters . . . . .	795
14.7.3.2	Crosslinking Techniques . . . . .	796
14.8	Structures and General Properties of Crosslinked Polyolefins . . . . .	797
14.8.1	Structures . . . . .	797
14.8.2	Analytical Methods for Investigating Polyolefin Crosslinking . . . . .	798
14.8.3	General Properties . . . . .	800
14.9	Specific Properties and Applications of Crosslinked Polyolefins . . . . .	801
14.9.1	Product Differentiation and Technology Competition . . . . .	801
14.9.2	Wire and Cable Insulation . . . . .	802
14.9.2.1	Insulation for Low Voltage Cables . . . . .	803
14.9.2.2	Insulation for Medium Voltage Cables . . . . .	803
14.9.2.3	Insulation for High Voltage Cables . . . . .	805
14.9.3	Pipe and Conduit . . . . .	806
14.9.4	Crosslinked Foams . . . . .	809
14.9.5	Other Applications . . . . .	810
14.10	Controlled Degradation of Polypropylene . . . . .	811
14.10.1	Selection of Peroxides . . . . .	812

14.10.2	Affects of Process Parameters . . . . .	813
14.10.2.1	Peroxide Concentration . . . . .	813
14.10.2.2	Processing Temperature . . . . .	813
14.10.2.3	Processing Equipment . . . . .	813
14.10.2.4	Stabilization Packages . . . . .	814
14.10.3	Properties of CR-PP . . . . .	815
14.11	Technological Trends and Outlook . . . . .	816
14.12	List of Suppliers, Tradenames and Producers . . . . .	818
14.13	List of Abbreviations and Symbols . . . . .	819
14.14	References . . . . .	821

## 15 Colorants

*R. Scherrer, Ciba Inc., Basel, Switzerland*

*R. L. Sykes, Ciba Inc., Basel, Switzerland*

15.1	Color . . . . .	831
15.1.1	Introduction . . . . .	831
15.1.2	Definition of Color . . . . .	831
15.1.2.1	The Light Source . . . . .	831
15.1.2.2	Absorption by the Colorant . . . . .	832
15.1.2.3	Observation. . . . .	833
15.1.3	Metamerism . . . . .	834
15.1.4	Transparency and Opacity . . . . .	834
15.1.5	Dichroism – Optical Anisotropy . . . . .	834
15.1.6	Definition of Pigments and Dyes . . . . .	834
15.1.6.1	Pigments . . . . .	835
15.1.6.2	Dyes . . . . .	836
15.1.7	Properties, Test Methods and Assessment of Performance . . . . .	836
15.1.7.1	Heat Resistance . . . . .	836
15.1.7.2	Light Fastness . . . . .	837
15.1.7.3	Weather Fastness . . . . .	838
15.1.7.4	Migration. . . . .	838
15.1.7.5	Abrasion . . . . .	839
15.1.7.6	Plate-out . . . . .	839
15.1.7.7	Chalking . . . . .	839
15.1.7.8	Effect on Rheological Properties . . . . .	839
15.1.7.9	Warping . . . . .	839
15.2	Colorants . . . . .	840
15.2.1	Introduction. . . . .	840
15.2.2	Color Index. . . . .	840
15.2.3	White Colorants . . . . .	840
15.2.3.1	Titanium Dioxide. . . . .	840
15.2.3.2	Other White Pigments . . . . .	841

15.2.4	Black Colorants . . . . .	841
15.2.4.1	Carbon Black . . . . .	841
15.2.4.2	Iron Oxide . . . . .	841
15.2.4.3	Mixed Metal Oxides . . . . .	841
15.2.4.4	Organic Black Colorants . . . . .	841
15.2.5	Colored Inorganic Pigments . . . . .	841
15.2.5.1	Introduction . . . . .	841
15.2.5.2	Yellow Pigments . . . . .	842
15.2.5.3	Orange Pigments . . . . .	842
15.2.5.4	Brown Pigments . . . . .	842
15.2.5.5	Red Pigments . . . . .	843
15.2.5.6	Violet Pigments . . . . .	843
15.2.5.7	Blue Pigments . . . . .	843
15.2.5.8	Green Pigments . . . . .	843
15.2.6	Organic Colorants . . . . .	844
15.2.6.1	Anthraquinone, Anthanthrone . . . . .	844
15.2.6.2	Azo, Monoazo, Arylamide . . . . .	845
15.2.6.3	Benzimidazolone . . . . .	846
15.2.6.4	BONA Lakes . . . . .	846
15.2.6.5	Diketopyrrolo-pyrrole . . . . .	847
15.2.6.6	Dioxazine . . . . .	847
15.2.6.7	Disazo Condensation . . . . .	847
15.2.6.8	Disazo, Diarylide . . . . .	848
15.2.6.9	Flavanthrone, Indanthrone . . . . .	849
15.2.6.10	Isoindolinone and Isoindoline . . . . .	849
15.2.6.11	Metal Complexes . . . . .	850
15.2.6.12	Monoazo Salts (Laked Pigments) . . . . .	850

## **16 Fluorescent Whitening Agents**

*Alfred G. Oertli, Ciba Inc., Basel, Switzerland*

16.1 Introduction . . . . .	901
16.2 Basic Principles of Whitening Mechanisms . . . . .	901
16.3 Selection and Technical Requirements of Optical Brighteners . . . . .	903
16.4 Structure of Optical Brighteners . . . . .	905
16.5 Incorporation of Optical Brighteners into Polymers . . . . .	905
16.6 Testing of Optical Brighteners in Polymers . . . . .	906
16.6.1 Migration and Exudation . . . . .	906
16.6.2 Whitening Effect . . . . .	906
16.6.3 Light-fastness . . . . .	907
16.7 Performance data of optical brighteners in various substrates . . . . .	908
16.7.1 Polyvinyl chloride . . . . .	908
16.7.2 Polystyrene and Styrene Copolymers . . . . .	909
16.7.3 Polycarbonate . . . . .	911
16.7.4 Polyurethane . . . . .	912
16.7.5 Polyolefins . . . . .	913
16.7.6 Poly(methylmethacrylate) . . . . .	913
16.7.7 Unsaturated Polyesters . . . . .	914
16.7.8 Polyethylene terephthalate Fibers (PET) . . . . .	915
16.7.9 Polyamide Fibers . . . . .	915
16.8 Technological Trends . . . . .	916
16.9 Index of Trade Names, Manufacturers and Suppliers . . . . .	917
16.10 References . . . . .	917

## **17 Fillers and Reinforcements/Coupling Agents**

*Walter Hohenberger, Villach, Austria*

17.1 Introduction . . . . .	919
17.1.1 Definition . . . . .	919
17.1.2 Economics . . . . .	920
17.2 Principle Mechanisms in Polymers . . . . .	920
17.2.1 Theory . . . . .	920
17.2.2 Application Criteria . . . . .	921
17.2.3 Properties of Filled Plastics . . . . .	921
17.2.3.1 Density . . . . .	921
17.2.3.2 Tensile Properties . . . . .	922
17.2.3.3 Impact Properties . . . . .	922

17.2.3.4	Thermal Properties . . . . .	922
17.2.3.5	Tribological and Surface Properties . . . . .	923
17.2.3.6	Electrical Properties . . . . .	923
17.2.3.7	Optical Properties . . . . .	923
17.2.3.8	Acoustic Properties . . . . .	924
17.2.3.9	Stability . . . . .	925
17.2.3.10	Viscosity . . . . .	925
17.2.3.11	Organoleptic Properties . . . . .	925
17.2.3.12	Permeability . . . . .	926
17.2.3.13	Flammability . . . . .	926
17.3	Properties of Fillers and Guiding Selection . . . . .	926
17.3.1	Introduction . . . . .	926
17.3.2	Classification of Fillers . . . . .	927
17.3.3	Density . . . . .	927
17.3.4	Particle Size and Shape . . . . .	927
17.3.5	Specific Surface Area . . . . .	928
17.3.6	Maximum Packing Fraction . . . . .	928
17.3.7	Particle Geometry . . . . .	929
17.3.8	Optical Properties . . . . .	930
17.3.9	Hardness and Abrasiveness . . . . .	930
17.3.10	Electrical and Magnetic Properties . . . . .	931
17.3.11	Acid Solubility . . . . .	931
17.3.12	Chemical Composition . . . . .	931
17.3.13	Loss on Ignition . . . . .	932
17.3.14	pH . . . . .	932
17.3.15	Moisture Content . . . . .	932
17.4	Characterization of Fillers . . . . .	932
17.4.1	Cubic and Spheroidal Fillers . . . . .	933
17.4.1.1	Natural Calcium Carbonate . . . . .	933
17.4.1.2	Precipitated Calcium Carbonate (PCC) . . . . .	934
17.4.1.3	Dolomite . . . . .	935
17.4.1.4	Magnesium Carbonate . . . . .	935
17.4.1.5	Calcium Sulfate . . . . .	936
17.4.1.6	Barium Sulfate . . . . .	937
17.4.1.7	Glass Beads and Ceramic Beads . . . . .	937
17.4.1.8	Synthetic Silica . . . . .	939
17.4.1.9	Natural Silica . . . . .	940
17.4.1.10	Feldspar and Nepheline-syenite . . . . .	940
17.4.1.11	Aluminium Trihydroxide and Magnesium Hydroxide . . . . .	941
17.4.1.12	Carbon Black . . . . .	942
17.4.1.13	Wood Flour . . . . .	942
17.4.2	Platy Fillers . . . . .	944
17.4.2.1	Talc . . . . .	944

17.4.2.2	Mica . . . . .	946
17.4.2.3	Kaolin and Clay . . . . .	947
17.4.2.4	Graphite . . . . .	948
17.4.3	Acicular and Fibrous Fillers . . . . .	948
17.4.3.1	Wollastonite . . . . .	948
17.4.3.2	Whiskers . . . . .	949
17.4.3.3	Glass Fibers (chopped strand) . . . . .	949
17.4.3.4	Aramid Fibers . . . . .	950
17.4.3.5	Carbon Fibers . . . . .	951
17.4.3.6	Other Fillers . . . . .	952
17.4.3.7	Conductive Fillers . . . . .	952
17.4.3.8	Lubricant Fillers . . . . .	952
17.4.3.9	Organic Fillers . . . . .	952
17.4.3.10	Nanofillers . . . . .	953
17.5	Processing . . . . .	953

18.2.5.2	Characterization of Nucleating Agent Efficiency . . . . .	975
18.2.5.3	Effect of Nucleating Agents on the Properties of Semi-crystalline Polymers . . . . .	976
18.3	Nucleation of Polyolefins . . . . .	978
18.3.1	Polyethylene (PE) . . . . .	978
18.3.2	Polypropylene (PP) . . . . .	978
18.4	Nucleation of Engineering Plastics . . . . .	983
18.4.1	Thermoplastic Polyesters . . . . .	983
18.4.2	Polyamides . . . . .	984
18.5	Nucleation of Other Semi-crystalline Polymers . . . . .	984
18.6	Future Trends . . . . .	986
18.7	List of Chemical Designations, Trade names and Suppliers . . . . .	986
18.8	References . . . . .	988

## 19 Additives for Mechanical Recycling of Plastics

*Rudolf Pfaendner, Ciba Inc., Lampertheim, Germany*

19.1	Introduction . . . . .	991
19.1.1	The Potential for Mechanical Recycling of Plastics . . . . .	991
19.1.2	Recycling Targets Set by Legislation . . . . .	992
19.1.3	Use of Recyclates in Food Contact Applications . . . . .	993
19.2	Differences between Virgin Materials and Recyclates . . . . .	993
19.2.1	Structural Inhomogeneities and Impurities in Recyclates . . . . .	993
19.2.2	Influence of Additive Content on the Quality of Recyclates . . . . .	996
19.3	Upgrading Recycled Plastics . . . . .	997
19.4	Restabilization . . . . .	999
19.4.1	Polypropylene (PP) . . . . .	1000
19.4.1.1	PP Films (closed loop) . . . . .	1001
19.4.1.2	PP Crates (closed loop) . . . . .	1001
19.4.1.3	PP Crates (new application) . . . . .	1002
19.4.1.4	PP Containing Filler (stadium seats) . . . . .	1002
19.4.2	PP Copolymers . . . . .	1003
19.4.2.1	PP/PE Battery Cases (closed loop) . . . . .	1003
19.4.2.2	PP/EPDM Bumpers (closed loop) . . . . .	1004
19.4.3	Polyethylene (PE) . . . . .	1005
19.4.3.1	LDPE/LLDPE Films (closed loop) . . . . .	1005
19.4.3.2	LDPE/LLDPE Films (into pipes) . . . . .	1006
19.4.3.3	HDPE Crates (closed loop) . . . . .	1006
19.4.3.4	HDPE Containers (closed loop) . . . . .	1008
19.4.3.5	HDPE Waste Bins (closed loop) . . . . .	1009

19.4.4	Polyolefin Blends . . . . .	1010
19.4.4.1	HDPE/PP Bottles . . . . .	1010
19.4.4.2	HDPE/LDPE for Pipes . . . . .	1012
19.4.4.3	HDPE/LDPE/PP for pallets . . . . .	1012
19.4.5	Polystyrenes . . . . .	1014
19.4.5.1	IPS . . . . .	1014
19.4.5.2	EPS . . . . .	1014
19.4.5.3	ABS . . . . .	1015
19.4.6	PVC . . . . .	1015
19.4.6.1	Rigid PVC (window profiles) . . . . .	1016
19.4.6.2	Rigid PVC (pipes) . . . . .	1016
19.4.6.3	Plasticized PVC (roofing sheets, cable) . . . . .	1016
19.4.6.4	PVDC-Containing PO . . . . .	1017
19.4.7	Polyamides . . . . .	1017
19.4.8	Polyesters/Polycarbonates . . . . .	1017
19.4.8.1	PET Bottles . . . . .	1017
19.4.8.2	Polycarbonate . . . . .	1018
19.4.8.3	PBT/PC Bumpers . . . . .	1018
19.4.8.4	Other Engineering Plastics . . . . .	1019
19.4.9	Mixed Plastics . . . . .	1019
19.5	Compatibilization . . . . .	1020
19.5.1	Examples of Compatibilization . . . . .	1020
19.5.2	Potential Complications Arising from Compatibilization of Recyclates . . . . .	1022
19.6	Other Additives . . . . .	1023
19.6.1	Repair of Predegradation . . . . .	1023
19.6.2	Rheology Modification . . . . .	1023
19.6.3	Other Conditions . . . . .	1024
19.7	Troubleshooting Post Consumer Recyclates . . . . .	1025
19.8	Conclusions . . . . .	1027
19.9	Abbreviations of Products . . . . .	1027
19.10	Test procedures mentioned in Chapter 19 . . . . .	1028
19.11	References . . . . .	1028

## 20 The Physical Behavior of Polymer Additives

*N C Billingham, School of Chemistry, Physics, and Environmental Science  
University of Sussex, Brighton, UK*

20.1	Introduction . . . . .	1035
20.2	Solubility of Additives in Polymers . . . . .	1036
20.2.1	Theory of Solubility . . . . .	1036
20.2.2	Solubility in Practice. . . . .	1038
20.3	Diffusion of Additives in Polymers . . . . .	1044
20.3.1	Fick's Laws and the Diffusion Coefficient . . . . .	1044

20.3.2	Effects of Polymer Morphology . . . . .	1046
20.3.3	Effect of Temperature . . . . .	1047
20.3.4	Effect of Polymer Type . . . . .	1047
20.3.5	Effects of Diffusant Molecular Weight . . . . .	1050
20.4	Physical State of Additives in Polymers . . . . .	1051
20.5	Additive Loss from Polymers . . . . .	1054
20.5.1	Evaporative Loss into Air . . . . .	1054
20.5.2	Solvent Leaching of Additives . . . . .	1057
20.5.3	Blooming of Additives . . . . .	1059
20.6	Additive Design for Permanence . . . . .	1059
20.7	Physical Effects in Aging Tests . . . . .	1060
20.8	Conclusions . . . . .	1061
20.9	References . . . . .	1062

## 21 Analytical

*Pierre Bataillard, Leonard Evangelista, Ciba Specialty Chemicals Inc.,*

*Additives Division, Basel, Switzerland*

*Mark Thomas, Ciba Cor., Additives Division, Tarrytown,*

*New York, USA*

22.1.5	Risk Assessment, Responsible Care, Product Stewardship . . . . .	1111

22.1.5.1	Risk Assessment . . . . .	1111
22.1.5.2	Responsible Care . . . . .	1112
22.1.5.3	Product Stewardship . . . . .	1113
22.1.6	Safety Data Sheet (SDS) . . . . .	1114
22.1.7	Recommended Literature for chapter 22.1 . . . . .	1114
22.2	Regulatory Aspects . . . . .	1115
22.2.1	Chemical Control Schemes . . . . .	1115
22.2.2	The Regulation of the Production and Marketing of Additives as Chemical Substances . . . . .	1115
22.2.2.1	General Principles of Chemical Control Legislation . . . . .	1115
22.2.2.2	Notification of New Chemical Substances . . . . .	1116
22.2.2.3	Safety Data Requirements for Existing Substances . . . . .	1120
22.2.3	Legal Requirements for Additives Intended for Use in Food Contact Applications . . . . .	1122
22.2.3.1	General Principles . . . . .	1122
22.2.3.2	EU Requirements . . . . .	1122
22.2.3.3	Food Additives Regulation in the USA: The Food, Drug and Cosmetic Act . . . . .	1126
22.2.3.4	Regulations on Food Contact Additives in Other Countries . . . . .	1128
22.2.4	References for chapter 22.2 . . . . .	1129
22.3	Handling of Solid Additives . . . . .	1130
22.3.1	Introduction . . . . .	1130
22.3.2	Additive Handling Methods . . . . .	1130
22.3.2.1	Process Considerations . . . . .	1130
22.3.2.2	Common Additive Handling Methods . . . . .	1131
22.3.3	Sources of Hazards . . . . .	1135
22.3.3.1	Worker Exposure . . . . .	1135
22.3.3.2	Fire and Explosion . . . . .	1135
22.3.3.3	Electrostatic Discharge . . . . .	1135
22.3.4	Practical Countermeasures Against Fire and Explosions . . . . .	1137
22.3.4.1	Prevention: Solvent-free Systems . . . . .	1137
22.3.4.2	Prevention: Systems with Solvents . . . . .	1138
22.3.4.3	Protection . . . . .	1139
22.3.4.4	Product Form and Housekeeping Considerations . . . . .	1139
22.3.5	Conclusion . . . . .	1140
22.3.6	References for chapter 22.3 . . . . .	1140
