**Uses Most
Energy**
531

kWh/year (kilowatt-hours per year) is a measure of energy (electricity) use.
Your utility company uses it to compute your bill. Only standard size dishwashers
are used in this scale.

Dishwashers using more energy cost more to operate.

This model's estimated yearly operating cost is:

\$28

When used with an electric water heater

\$20

When used with a natural gas water heater

Based on four wash loads a week using the normal cycle and a 2004 U.S. Government national average cost of 8.60¢ per kWh for electricity and 91.0¢ per therm for natural gas. Your actual operating cost will vary depending on your local utility rates and your use of the product.

Important: Removal of this label before consumer purchase violates the Federal Trade Commission's Appliance Labeling Rule (16 C.F.R. Part 305)
