LOQR|core: Superior, Scalable & Secure Compliance Solution

Redefining Digital Identity Management

LOQR|core

In today's digital landscape, identity management has evolved into a complex, high-risk challenge that encompasses security, compliance, user experience, and business agility. LOQR|core is LOQR's high-level orchestration Platform that handles the complete lifecycle of digital identities. Designed with security, modularity, scalability, and regulatory compliance framework, LOQR|core empowers organisations - in regulated industries like banking and fintech - to seamlessly integrate and manage trust services with a superior customer experience. From identity verification to secure transactions and qualified signatures, LOQR|core provides the mechanisms to build secure and efficient digital journeys.

LOQR

Key Features and Benefits

🚀 **Seamless Integration**

Trough drag-and-drop workflows or API-based flow management, we ensure compatibility with core banking systems, CRM (Customer Relationship Management) platforms, and other relevant applications.

📑 **Compliance by Design**

Full compliance with eIDAS, GDPR, PSD3, and ISO/IEC 27001 Regulations.

🔒 **Enhanced Security and Privacy**

LOQR prioritises data security and privacy, using advanced encryption algorithms and robust security measures to protect the information entrusted to us.

📝 **Scalability and Customisation**

Designed to scale with financial institutions' growth and evolving needs, our solution can handle large volumes of data without compromising performance or accuracy. We offer customisation options, allowing institutions to tailor our solution to their specific requirements, workflows, and brands.

Competitive Advantages

✓ **Highly Configurable**

Adaptable to any financial industry-specific compliance requirement.
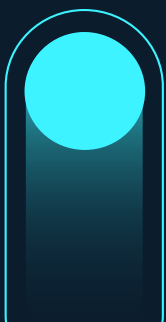

✓ **Expanded Customer Base**

A reduced implementation time means a faster go-to-market, reducing operational costs and improving onboarding success rates.
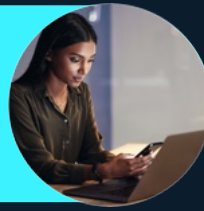

✓ **Customer-Centric Plarform**

Embedded AI, encryption and digital identity management save time and fulfil the expectations of today's customers for a fast, convenient and anytime/anywhere banking experience.

Use Cases

→ **Digital Account Opening / Digital Onboarding**

Build a secure, fast, and compliant customer-centric onboarding experience through a smooth journey.

→ **Customer Data Update – pKYC**

Keeping customer databases up to date to comply with regulation and increase efficiency.

→ **Online Access Recovery**

Provide a seamless experience to recover credentials. Eliminate the necessary burden from support center.

→ **Device Enrollment**

Enroll additional devices binding them to the same account easily and practically.

→ **Strong Customer Authentication**

Reduce fraud and ensure secure online transactions.

→ **Proof of Life**

A simple way to verify and validate identity online.

Security & Regulatory Compliance

LOQR|core operates under strict security and compliance measures, including:

- eIDAS Regulation - Qualified Trust Service Provider (QTSP) recognition.
- GDPR Compliance - ensuring full data protection.
- ISO/IEC 27001 & ISO/IEC 30107-3 - certified information security & biometric authentication.
- LINCE Certification - advanced protection against cyber threats in video identification.

Pricing & Business Model

LOQR|core offers flexible pricing models to suit different business needs:

- Annual SaaS contracts (ARR-based pricing, multi-year deals).
