Redefining Digital Trust

LOQR|one

In today's fast-evolving regulatory landscape and with customer expectations demanding seamless digital interactions, companies face increasing pressure to stay compliant while remaining competitive. LOQR|one was developed to meet this challenge, delivering a streamlined, cost-effective, plug-and-play compliance solution tailored to businesses with regulatory demands. It is designed for ease of integration and rapid deployment, allowing companies to onboard customers efficiently and automatically implement Know Your Customer (KYC) and Anti-Money Laundering (AML) regulations.

Whether you are a fintech innovator, a digital platform or a growing enterprise, with LOQR|one you gain the highest level of legal assurance, convenience, and efficiency in a single package! LOQR|one eliminates the need for large IT teams or extensive customisations - bringing enterprise-level compliance solutions to companies of any size.

Key Features and Benefits

Embedded Finance & Open Banking

LOQR|one is designed for fast implementation with minimal integration efforts. This allows companies to onboard customers and meet regulatory requirements without delays and with seamless financial operations.

Automated KYC & Advanced AI-Driven Compliance

Our Platform automates essential customer verification and compliance workflows, reducing manual intervention and minimising the risk of errors. With premium fraud detection and regulatory automation, LOQR|one ensures that institutions comply with Anti-Money Laundering (AML) and KYC regulations efficiently.

Cost-Effective Solution

Unlike complex, high-maintenance compliance systems, LOQR|one provides a cost-effective alternative. It offers essential compliance features without the high-priced costs of custom-built or enterprise-level solutions.

Scalability and Adaptability

While designed for businesses with lighter regulatory requirements, LOQR|one can scale as needed, supporting business growth and evolving compliance needs by offering a ready-to-use, low-maintenance compliance framework.

Enhanced Security

With robust data security and encryption algorithms, LOQR|one ensures that sensitive customer information remains protected while complying with regulations across jurisdictions.

Security & Regulatory Compliance

LOQR|one operates under strict security and compliance measures, including:

- eIDAS Regulation - Qualified Trust Service Provider (QTSP) recognition.
- GDPR Compliance - ensuring full data protection.
- ISO/IEC 27001 & ISO/IEC 30107-3 - certified information security & biometric authentication.
- LINCE Certification - advanced protection against cyber threats in video identification.

Pricing & Business Model

LOQR|one offers flexible pricing models to suit different business needs:

- SaaS subscription with modular pricing: feature-based and user-based license and per-transaction.
