POLIFILM

Surface protection film Antiviral Protection Plus

This self-adhesive and transparent surface protection film Antiviral Protection Plus with its antiviral and antibacterial coating provides effective protection against bacteria and viruses on almost all smooth surfaces. Thus, it guarantees your customers and employees hygienic protection against viruses and bacteria. The film is effective against a wide range of viruses and bacteria spread via smear infections. Applied to frequently touched surfaces such as doorknobs, counters and tables, but also in sanitary areas, the films help to contain the spread of numerous germs through surfaces. In this way, they help reduce the risk of many common flu triggers, as well as causative agents of gastrointestinal illnesses. The film has been awarded the dermatest seal ("very good"), so it has been dermatologically tested. Antiviral efficacy against some viruses, including SARS-CoV-2 (corona virus), was confirmed by an external laboratory, according to ISO standard 21702:2019. A film for indoor and outdoor use. Material: co-extruded polyolefin film, with a thickness of about 80µ (+/- 2µ). Color: transparent

The reliable way of DISINFECTION

VEGA

UVC Air Protector ROOMMAP 500

UVC Air Protector (My Air Protector) as a stand-alone or wall-mounted unit in an attractive, modern design. Neutralizes or inactivates by means of UVC light up to 99.99% of all viruses and bacteria in the air, minimizing the risk of infection via droplets and aerosols indoors. UVC light is a reliable, environmentally friendly and safe way of disinfection. Metal housing is extremely strong, safe and UVC resistant, ensuring isolated, absolutely non-hazardous UVC irradiation.

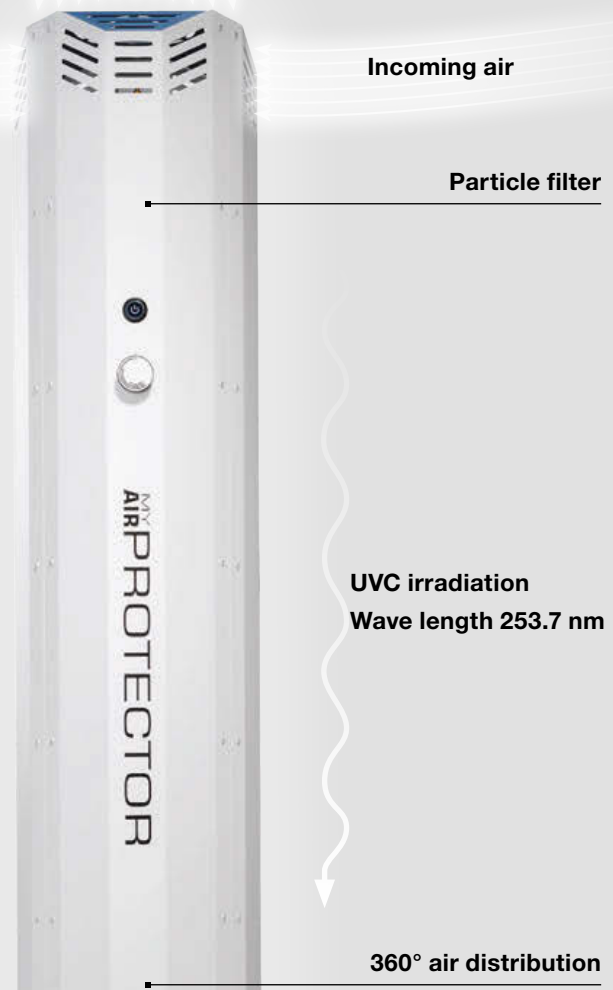

Includes two built-in particle filters against pollen, spores, etc. to protect the already installed UVC lamps. Fan power infinitely variable. Cleans up to 400 m³ of air per hour. Volume from 38 dBA (minimum level) to 57 dBA (maximum level). Suitable for permanent use in closed rooms.

Easy self-assembly, installation and operation. Three UVC lamps and two filters (1x G2 and 1x G4) are already installed upon delivery. Free-standing unit with castors on the stand. Specified dimensions including stand/wall mount. Body dimensions 24.8x142x23.4(WxHxD). Power cord 1.90 m.

Spare parts: UVC lamps in a pack of three, G2 and G4 filters. Please order directly. Lifetime of UVC lamps 9,000 hours. For the usage time of one year we recommend 3x fluorescent tubes (1 pack), 1x G2 particle filters, 4x G4 particle filters.

Information brochure for your guests in various sizes in the download area. This will familiarize your guests with the device and create a feel-good atmosphere in e.g. your hotel rooms, reception areas and restaurant areas. The device serves as an additional prevention strategy and should be used in addition to current hygiene recommendations. Developed and produced in Germany. 2-year warranty.

Hygiene protection wall Malo

This contact protection is optimal for maintaining the recommended safety distance e.g. in restaurants, offices, gyms, hairdressers and many other concerned facilities to prevent droplet infection. It consists of a silver anodized aluminum frame and an easy-to-clean transparent PVC film (B1 fire protection certified). The dimensions of the contact protection are 95x201 cm. Thanks to the light weight and integrated castors with locking brake, the contact guard can be easily repositioned as needed. If you no longer need the contact protection as such, the transparent PVC film can be easily replaced with a printed textile banner with motif. This can be specially requested from us. The hygiene protection wall can be used indoors and in wind-protected places also outdoors.
