

THE CENTRAL

TECH CONNECTED

As one of the top three sites for IT infrastructure in Dallas Fort-Worth Metroplex, The Central offers an unparalleled technological advantage — with platinum wired certification underway. Advancements include:

- Choice of 6 unique dedicated fiber options from AT&T, Centurylink, Zayo, Verizon Enterprise, Crown Castle, and Fiberlight, enabling tenants to obtain competitive pricing for any connectivity and cloud services
- High capacity connectivity services available for speeds up to 100 Gbps
- Redundant dark fiber connectivity available for tenants that rely heavily on cloud infrastructure or require low-latency connections
- Unparalleled critical infrastructure resiliency with N+2 electrical resiliency with 3 separate incoming utility feeds from diverse substations
- Multiple points of entry for incoming connections to enable tenants with mission-critical up-time requirements to obtain physically redundant primary and back-up internet services
- On-staff telecommunications consultants to assist with procurement and management of internet service delivery
