

Body temperature results in seconds.

## Fluke 67 MAX Clinical Infrared Thermometer

The Fluke 67 MAX Clinical Infrared Thermometer\* is a handheld non-contact thermometer optimized for measuring human temperature. With its small size and versatile features, is extremely easy to use. Plus, it's rugged enough to take a 6.5 foot drop, helpful if you work in busy, crowded work areas. You can also easily clean the surface of the Fluke 67 MAX with disinfecting wipes.

- Accurate down to 0.5 °F across all ambient temperatures from 59 °F to 104 °F
- Built-in **Body Mode**, which adds an offset to account for the difference between surface skin temperature and core body temperature.
- **SCAN** functionality allows the user to scan the forehead for the highest temperature to improve measurement repeatability, when compared to a single spot temperature measurement.
- Engineered to withstand a 6.5 foot drop

\*The Fluke 67 MAX accuracy complies with and accuracy tested in accordance with ASTM E1965-98 and ISO 80601-2-56 standard but is not FDA 510(k) cleared or approved
