Maumee, OH**

**SAF-TUV2T**

**September 21-25  
Madison Heights, MI**

McNaughton-McKay offers functional safety machinery courses in cooperation with Rockwell Automation® and TÜV Rheinland. The curriculum for these in-person courses is hands-on and designed to give industrial automation professionals the skills they need to safely perform responsible tasks for machinery (designing, operating, maintaining, reviewing, etc.). Don't miss this opportunity to understand, design and implement strategies that will keep your facility in compliance with current safety standards.
