writer may create a marvelous book. But translating it into another language puts at risk the power of words that carry the authentic author's thought.

UI designs share the same fate. The visual and functional logic embedded by the designer can be interpreted superficially and get damaged during implementation.

However, they can be built flawlessly through direct collaboration with the author. This is my belief.

Experience

16+ years

Aug 2019 → **ongoing** (4 years & 8 months) Sofia, Bulgaria

Lead FE Developer • LabO8

As a vital Agile team member, I collaborate closely with an UI/UX designer to craft meticulously designed and customized interfaces.

I make architectural decisions for front-end projects, guide developers, plan and assign tasks, develop business logic and UI components in *Storybook*, review pull requests, and present client-side results at the end of each Scrum Sprint.

I also contribute to the company by conducting technical interviews for front-end candidates.

Jul 2018 → Aug 2019 (1 year & 2 months) Sofia, Bulgaria

Senior FE Web Developer • The Stars Group

Contributed to *React/Redux/TypeScript* web app development. Actively involved in planning, presenting features in demo meetings, and conducting routine pull request reviews for code quality.

Dec 2013 → Jul 2018 (4 years & 8 months) Sofia, Bulgaria

Senior Web UI Engineer • Komfo

Led the in-house UI framework development, defining interface patterns and establishing architecture. Applied *Atomic Design* principles for cohesive and scalable user interfaces.

Early Career Summary Sofia, Bulgaria

Jan 2012 → Dec 2013 (2 years) FE Developer • Edamam

Dec 2009 → Dec 2011 (2 years) Web Technologist • BSH
