

# Bowel Mover

## DIGESTIVE & DETOX SUPPORT

Bowel Mover promotes healthy gut motility and provides non-habit forming support to help deter occasional constipation.

The product contains a proprietary blend of a dozen herbs, plus fulvic acid extracts. During more than 10 years of product development, these ingredients were precisely formulated in the needed proportions. Altering these ratios would render Bowel Mover less effective.

The fulvic acid extracts in the supplement help protect the herbs from damage as they travel through the intestinal tract. The fulvic acid also helps drive the herbs where they're needed.

Upon introducing Bowel Mover, allow about 2 to 3 weeks for the body to adjust to the product and get optimal benefits.balance.

## As Part of the Protocol

## Ingredients

- Carbon Technology  
(Extracts of Humic and Fulvic Acid)
- Molybdenum 10 MCG
- Extracts of Broccoli Sprout
- Extracts of Yucca Root

## Key Benefits

- Helps promote natural intestinal peristalsis to keep the bowels moving regularly
- Encourages soft stools that are easy and comfortable to eliminate
- Supports normal gut microbial composition to promote immune and digestive health
