

## PROTOCOL USAGE

PHASE 3

PHASE 5

## Key Functions

- Promotes the lymphatic movement needed to support the normal drainage of lymph, including in the brain
- Deters stagnation of unwanted microbial factors and everyday toxins
- Supplies antioxidant-rich herbs and supports normal immune function

## Details

The importance of establishing drainage begins with the lymphatic system, and our Lymphatic Support supplement is comprised of a variety of natural ingredients, including Astragalus root, graviola, chuchuhuasi, and several other natural components whose anthraquinones, sterols and tannins provide antioxidants and other immune-supporting properties.

## How it Works

- If lymphatic flow is sluggish, unwanted items can stagnate in the body. That includes in the brain. This stagnation may lead to brain fog and other cognitive challenges.
- Lymphatic Support includes several herbs to promote fluid drainage. These include burdock root and sheep sorrel. They may act as mild diuretics to help relieve temporary fluid buildup.
- The herbs are paired with BioActive Carbon (Fulvic acid extracts) to help deliver the herbal constituents to where they're needed.

## Ingredients

BioActive Carbon (Extracts of Humic and Fulvic Acid)

Turkey Rhubarb

Sheep Sorrel

Burdock Root

Slippery Elm Bark

Astragalus Root

Graviola

Chuchuhuasi
